EL100

Explosion-Proof Linear Actuators

This electromechanical system provides process engineers with a clean, fast, simple, and cost effective replacement for hydraulic actuation and a longer life alternative to pneumatic actuation. The roller screw technology manufactured by Exlar offer 15 times the travel life of rival ball screws and can carry higher loads. The compact design allows users to effectively replace hydraulic or air cylinders with an electromechanical actuator, while meeting all required capabilities of the application. Servo electric actuation reduces emissions, lowers energy consumption (80% system energy efficiency), and increases position control and accuracy—all leading to reduced cost.

The EL100 explosion-proof linear actuator offers a Class 1, Division 1, Groups B, C, D, and T3 rating. Additionally, it meets ATEX essential requirements and are in conformance with the EU ATEX Directive 94/9/EC.

The EL Series linear actuators are compatible with nearly any manufacturer's resolver-based amplifier.

II 2 G
Ex d IIB+H2 T3 Gb
IECEX SIR 13.0139X

163694
Class I Division 1
Groups B, C, D, T3C

Features
T-LAM technology yielding 35% increase in continuous motor torque over traditional windings
Forces up to 2000 lbs
Speeds up to 25 ips
Resolver feedback
Strokes up to 6 inches
8 pole motors
Rod end options
Several mounting configurations
Potted NPT connectors
Windings available from 24 VDC to 460 VAC rms
Class 180H insulation, IP66S Standard

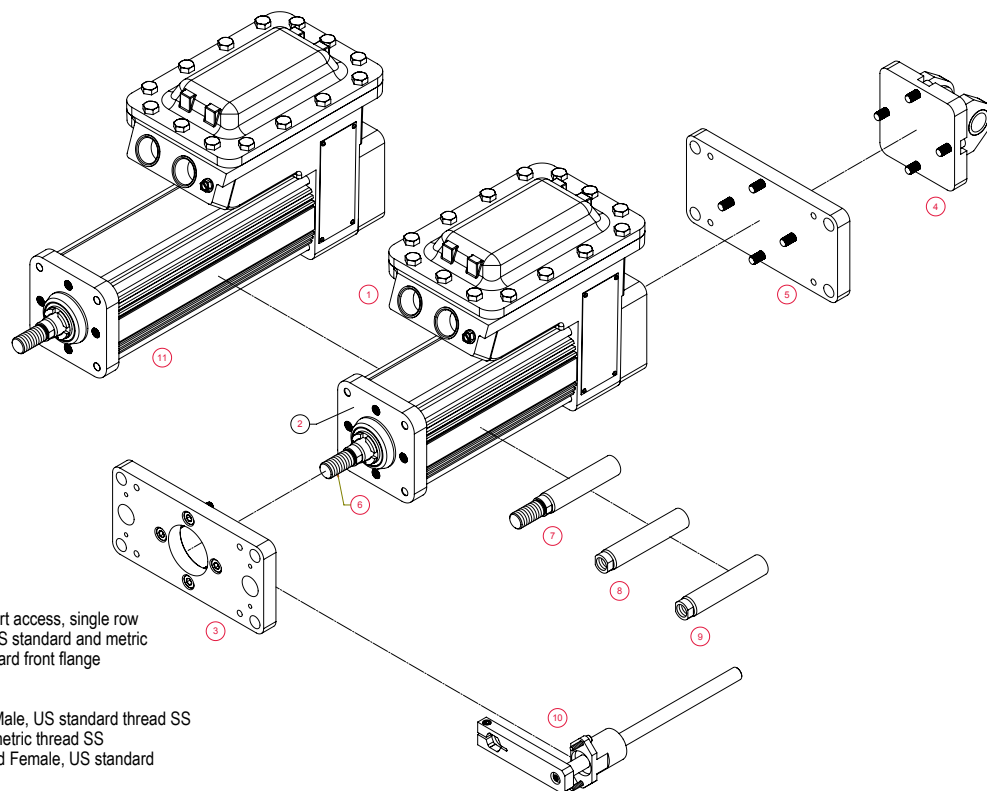

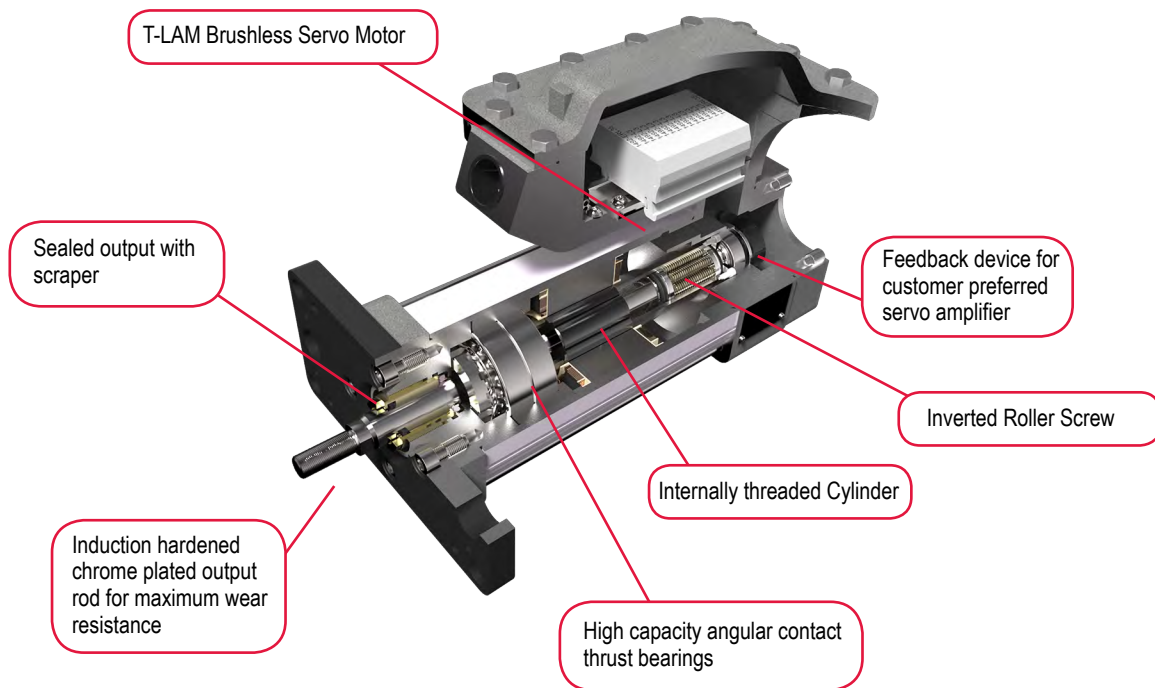

* "Class I" means that flammable gases or vapors may be present in the air in quantities sufficient to produce explosive or ignitable mixtures. "Division 1" means that hazardous concentrations in the air may exist continuously, intermittently, or periodically under normal operating conditions. "Group B" allows for atmospheres containing hydrogen, gases, or vapors of equivalent hazard, such as manufactured gas. "Group C" allows for atmospheres containing ethyl-ether vapors, ethylene or cyclo propane. "Group D" allows for atmospheres containing gasoline, hexane, naphtha, benzene, butane, alcohol, acetone, benzol, lacquer solvent vapors or natural gas. EL Series actuators are not rated for operation in atmospheres containing acetylene. Temperature classification defines the maximum surface temperature the product will reach at full load. T3 = 200° C, T3A = 180° C, T4 = 135° C.

Technical Characteristics	
Frame Sizes in (mm)	4 (100)
Screw Leads in (mm)	0.1 (2.54), 0.2 (5.08), 0.5 (12.7)
Standard Stroke Lengths in (mm)	5.9 (150)
Force Range	up to 4081 lbf-in (18 kN)
Maximum Speed	up to 37.5 in/sec (953 mm/s)

Operating Conditions and Usage		
Accuracy:		
Screw Lead Error	in/ft (µm / 300 mm)	0.001 (25)
Screw Travel Variation	in/ft (µm / 300 mm)	0.0012 (30)
Screw Lead Backlash	in (mm)	0.004 maximum
Ambient Conditions:		
Ambient Temperature	°C	-29 to 93
Storage Temperature	°C	-54 to 93
IP Rating		IP66S
Shock		10g
Vibration		5 grms, 5 to 2000 hz

EL100 Explosion-Proof Linear Actuators

Product Features

- 1 - Terminal strips with 3/4" NPT port access, single row
- 2 - Threaded front and rear face, US standard and metric
- 3 - Front and rear flange and standard front flange
- 4 - Standard rear clevis
- 5 - Front and rear flange
- 6 - Male, US standard thread and Male, US standard thread SS
- 7 - Male, metric thread and Male, metric thread SS
- 8 - Female, US standard thread and Female, US standard thread SS
- 9 - Female, metric thread and Female, metric thread SS
- 10 - External anti-rotate assembly (requires flange mount option)
- 11 - Rear brake

Industries and Applications

Process Control

Turbine fuel flow
Chemical process plants
Fuel distribution systems
Shipbound fuel management
Valve control
Damper control
Fuel Skids
Silos

Defense

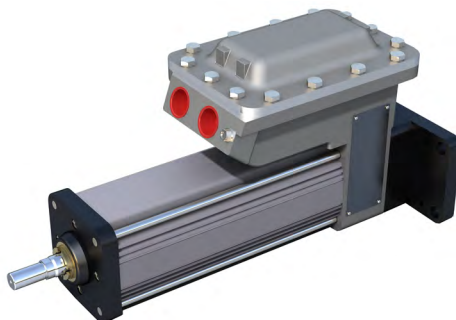

Weapons room

Material Handling

Printing presses

Automotive

Engine test stands
Paint booths

The EL100 actuator is another simple, clean, and cost effective replacement for hydraulics meeting Class 1, Division 1, Group B, C, D, and T3 as well as ATEX requirements.

Performance Curves

The below speed vs. force curves represent approximate continuous thrust ratings at indicated linear speed. Different types of servo amplifiers offer varying motor torque and, thus,

varying actuator thrust. These values are at constant velocity and do not account for motor torque required for acceleration.

DEFINITIONS:

Continuous Force: The linear force produced by the actuator at continuous motor torque.

Max Velocity: The linear velocity that the actuator will achieve at rated motor rpm.

Friction Torque (standard screw): Amount of torque required to move the actuator when not coupled to a load.

Friction Torque (preloaded screw): Amount of torque required to move the actuator when not coupled to a load.

Back Drive Force: Amount of axial force applied to the rod end of the actuator that will produce motion with no power applied to the actuator.

Min Stroke: Shortest available stroke length.

Max Stroke: Longest available stroke length.

C_a (Dynamic Load Rating): A design constant used when calculating the estimated travel life of the roller screw.

Inertia (zero stroke): Base inertia of an actuator with zero available stroke length.

Inertia Adder (per inch of stroke): Inertia per inch of stroke that must be added to the base (zero stroke) inertia to determine the total actuator inertia.

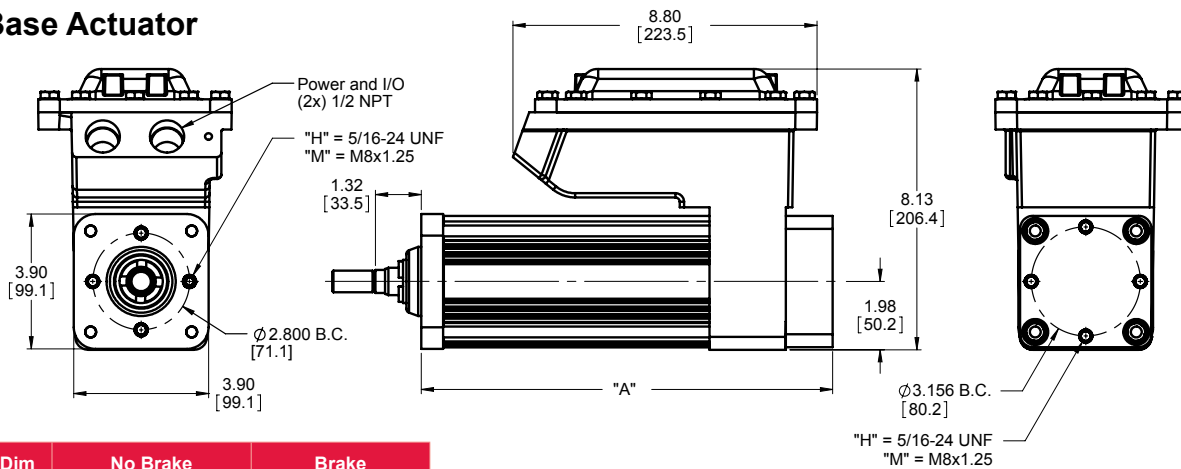

Weight (zero stroke): Base weight of an actuator with zero available stroke length.

Weight Adder (per inch of stroke): Weight adder inch unit of stroke that must be added to the base (zero stroke) weight to determine the total actuator weight.

EL100 Explosion-Proof Linear Actuators

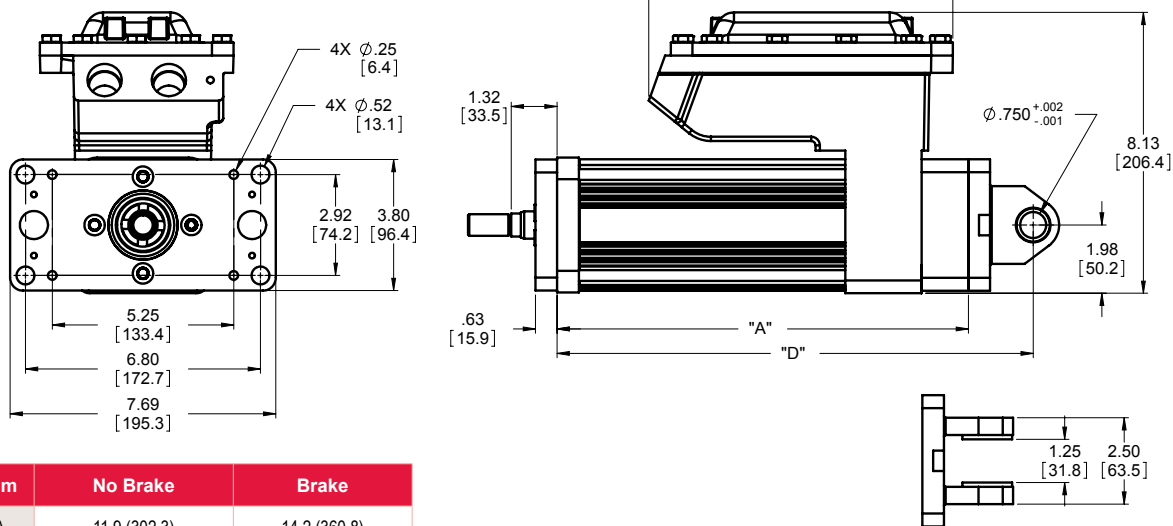

Dimensions

Base Actuator

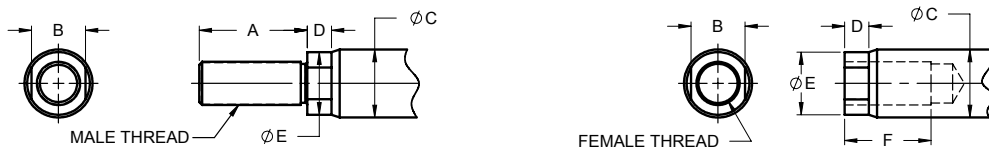

Dim	No Brake	Brake
A	11.9 (302.3)	14.2 (360.8)

Front Flange or Clevis Mount

Dim	No Brake	Brake
A	11.9 (302.3)	14.2 (360.8)
D	13.77 (349.9)	16.7 (408.2)

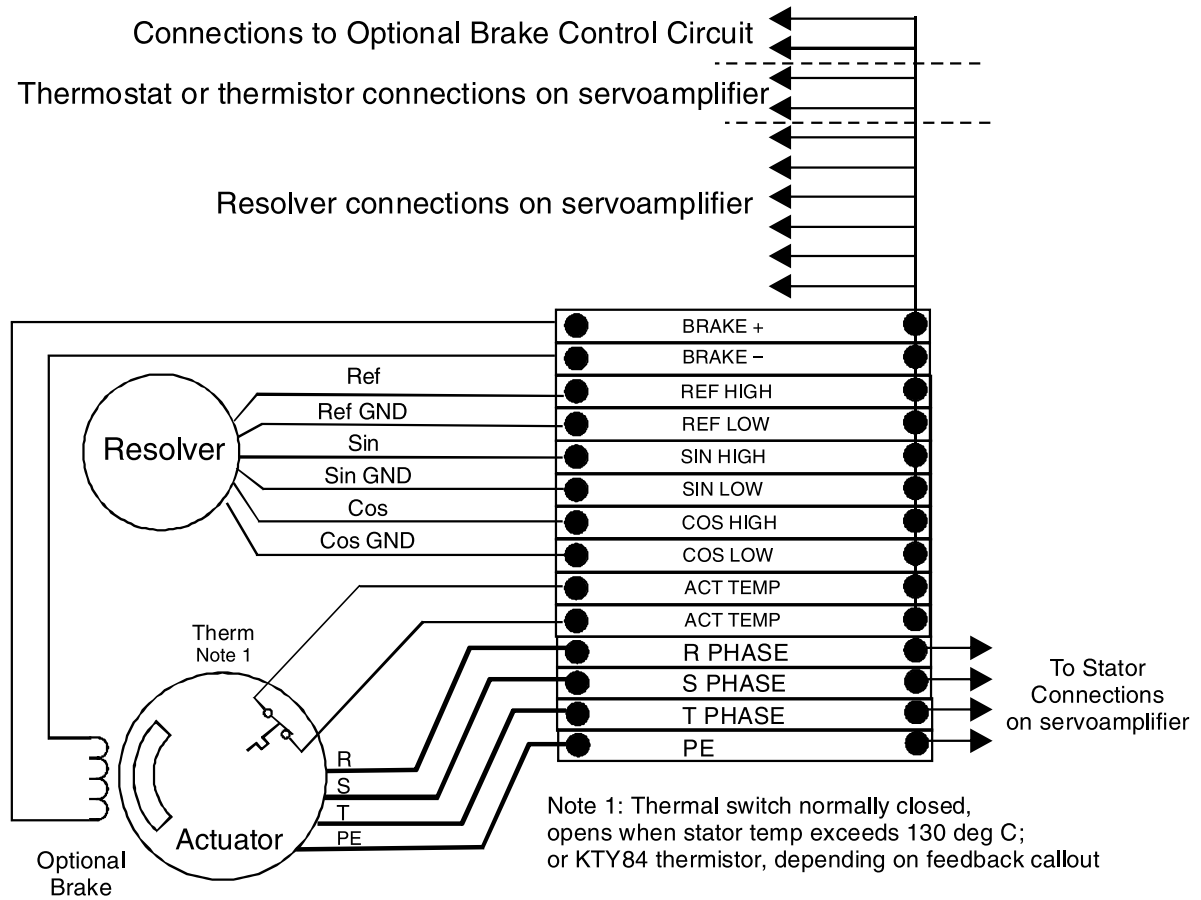

Rod End Options

	A	B	ØC	D	ØE	F	Male "M" Inch	Male "A" Metric	Female "F" Inch	Female "B" Metric
