Upgrade your Allen-Bradley® RSLogix™ System with Add-On Instructions

WAGO's Add-On Instruction (AOIs) program is an easy way to increase the capabilities, as well as reduce the costs, of an Allen Bradley® RSLogix™ system. Our predefined AOIs provide the variables and logic for WAGO-I/O-SYSTEM modules and are easily placed

within an RSLogix™ program – reducing engineering time. While our special function I/O modules increase the application range, our standard I/O modules further enhance the system by reducing foot print, increasing flexibility and are typically more cost-effective

than expansion racks and system I/O. You can also extend your system into extreme environments with our 750 XTR line of I/O, engineered for -40 °F to +158 °F operating temperatures plus resistant to condensation and high vibration.

Required Tools

- RSLogix 5000® Software (version 16 and up)
- WAGO predefined AOI XML file

Three Easy Steps

1. Open the Import feature in RSLogix 5000®
2. Select correct Add-On Instruction XML file
3. Insert Add-On Instructions into your PLC logic

All that is left is to establish the parameters required for your application!

Visit www.wago.us/addon Digital Media for a step-by-step video guide to your Add-On Instructions. Contact technical support at 1-800-346-7245

Over 60 AOIs available for the WAGO-I/O-SYSTEM:

- Serial Communications
- Stepper Motor Control
- Vibration Monitoring
- DC Motor Control
- NTC Input
- Current and Voltage Analog Inputs
- Resistor Bridge
- 3-Phase Power Measurement
- AS-Interface Gateway
- Current and Voltage Analog Outputs
- Pulse Width Output
- Incremental Encoder
- EnOcean Radio Receiver
- Frequency Counter
- Input Module
- MODBUS RTU Interface
- Electronic Circuit Breaker
- Up/Down-Counter
- SSI Transmitter
- Thermocouple Input
- RTD Input
