

Unidrive M101

Simplicity in control

Value, quality and performance for open-loop applications

0.25 kW - 7.5 kW (0.33 hp - 10 hp)

100 V | 200 V | 400 V

Even though it runs on the same technology as our more complex drives, the M101 is ideal for basic motor control. We've stripped out all the extra features, giving you the foundation of what makes the Unidrive M great.

CONTROL TECHNIQUES™

Nidec
All for dreams

Unidrive M101

In just a few settings, your drive is ready to go

Introducing our most user-friendly drive yet. We designed it to make installation simple and quick. All the parameters you need to get started are on the front of the drive. For everything else, there's the step by step guide that comes in the box.

If you prefer, you'll find online support at our companion site:
www.drive-setup.com

Even faster setup

Save even more time by transferring settings before you install the drive. All you need is our AI-Backup module or AI-Smart Adaptor, and a 24V power supply.

Simple to use

Running in

4 steps

Saves energy

98%

efficient

Robust

150% (60s)

overload

Made to last

up to 5 years

extended warranty

Customer focused

40 years'

experience

A reliable workhorse

Our drives keep your machines running, even in the toughest environments. That means working to international standards IEC60068-2-60 to levels defined by IEC721-3-3 2C3.

Technology you can trust

By the time they're shipped, we'll have tested our drives up to forty times. Giving you the confidence to fit our drives without the worry of premature failure.

Drive specifications

Onboard Potentiometer	✓
