

Nidec

Precision Gear Technology Catalog

NIDEC DRIVE TECHNOLOGY CORPORATION

Letter from the President

The Nidec Drive Technology Corporation was originally founded in Kyoto Japan in 1952. Since our inception, we have made every possible effort to improve our manufacturing skill and capabilities, including the advancement of power transmission products to support new technologies and markets. Nidec DTC initially established an industry-wide leadership position in the area of mechanical variable speed drives. We are very proud of our storied past with mechanical drive technology, through which Nidec DTC helped contribute to the growth of the emerging industries that are now the cornerstone of our world economy today.

Over time, within the field of power transmission engineering, Nidec DTC has maintained the highest level of skill and production quality throughout the industry. We have earned a reputation as a long term dependable partner to our customers, and this solid reputation is firmly supported by the many industrial awards we hold, such as the Japanese Machinery Society Award, and Deming Award, among others.

Today, the growing global market for motion control has driven us to continuously develop products that provide the highest level of accuracy, reliability and value for our customers. We are technical experts across all of the various gear technologies we offer, and are the only company in the world producing such a wide range of product. Our Precision Gear Technology Catalog provides in-depth technical detail for our planetary, worm, cycloidal and rotary index table products.

Nidec DTC promises to continue to provide high precision power transmission products at unmatched value, which solve the new requirements of our customer base and allow them to be competitive in an increasingly tough global market. Within our company, we have coined this promise as "Enduring Process of Nidec DTC" - a pledge by our employees to approach all of their day-to-day work activities with full effort, full dedication, and full energy to support the evolving needs of our customers.

Your continued support and loyal patronage to our company is highly appreciated. Thank you for your time.

Best Regards,
President
T. Nishimoto

Table of contents

Company Overview **2-15**

Inline Planetary Gearboxes

VRSF Series **16-27**

Planetary Inline Configuration
Economy class

VRL Series **28-59**

Planetary Inline Configuration
General purpose

VRB Series **60-91**

Planetary Inline Configuration
High accuracy, thru bolt mount

VRS Series **92-123**

Planetary Inline Configuration
High accuracy, high bearing capacity

VRT Series **124-159**

Planetary Inline Configuration
High accuracy and bearing capacity, ISO flange mount

Right-angle Worm Gearboxes

EJM Series **296-313**

Right-angle Worm Configuration
Economy class

EJL Series **314-349**

Right-angle Worm Configuration
Performance class, wide mounting range

EJH Series **350-367**

Right-angle Worm Configuration
Heavy duty class, wide mounting range

EJP Series **368-385**

Right-angle Worm Configuration
High performance class, wide mounting range

EJS Series **386-407**

Right-angle Worm Configuration
Hygienic class

Right-angle Planetary Gearboxes

NEV Series **160-179**

Planetary Right-angle Configuration
Economy class, hollow and solid shaft

EVL Series **180-207**

Planetary Right-angle Configuration
General purpose

EVB Series **208-235**

Planetary Right-angle Configuration
High accuracy, thru bolt mount

EVS Series **236-267**

Planetary Right-angle Configuration
High accuracy, high bearing capacity

EVT Series **268-295**

Planetary Right-angle Configuration
High accuracy and bearing capacity, ISO flange mount

Rotary Index Tables

STH Series **408-415**

Hollow Rotary Index Table
General purpose, lighter loads

STR Series **416-445**

Hollow Rotary Index Table
Arc-second accuracy, high loads

Cycloidal Gearboxes

ERH Series **446-457**

Inline Cycloidal Configuration
High shock-load, industrial duty

NIDEC Corporation

With annual sales exceeding \$11 Billion, the NIDEC Corporation is the world's largest manufacturer of brushless DC motors. NIDEC has operations in 40 countries through 297 group companies. Founded in 1973 by current Chairman of the Board and CEO, Shigenobu Nagamori, the NIDEC Corporation has built out a portfolio of motor technologies that span all industries and impact us in our everyday lives. NIDEC is making significant contributions to energy savings by developing and manufacturing highly efficient motor and drive technologies—technologies that keep the world moving forward.

The NIDEC Group umbrella includes over 200 corporate subsidiaries that span the globe. More than 100,000 employees are supplying products and services to customers every day, in over 150 countries. The NIDEC Group companies are categorized into the following complementary business segments:

Sales by Product Group (FY2019)

Automotive, Appliance, Commercial & Industrial Products

Motors for automobiles, home electronic appliances and industrial equipment

Small Precision Motors

HDD Motors

Other Small Motors

Optical disk drive motors, OA equipment motors, polygon scanners, MPU cooling fans, game machine fans, PC/communications fans, home appliance fans, automobile fans, vibration motors, brush motors, stepping motors, actuator units

Auto

Vibration motors, brush motors, stepping motors

Appliance Commercial Industrial

Game machine consoles, MPU cooling fans, PC/communications devices, home appliances, automobiles

Machinery:

Industrial robots, card readers, circuit board testers, high-speed press machines, chip mounters, measuring equipment, power transmission equipment, factory automation systems

Electronic & Optical Components:

Camera shutters, switches, trimmer potentiometers, precision plastic mold products

Others:

Logistics and services, musical instruments

The NIDEC Group has numerous manufacturing operations across the globe, which allows them to maintain a leading global market share position across its primary focus areas. NIDEC invests a significant portion of its yearly revenue in R&D in order to remain in the forefront of precision motor and drive technology. NIDEC believes strongly in education and established its own Institute for Industrial Science in 2016.

The NIDEC Corporation continues to expand its product portfolio in various motor technologies and has maintained its leadership position through aggressive product development and global acquisitions. The corporate slogan – **All for Dreams** – coined by founder Shigenobu Nagamori himself, epitomizes the NIDEC Group spirit and the promise to continue to deliver on the high value products and technologies that make our dreams possible.

We begin with dreams.

Dreams drive our motivation.

Dreams are our future.

The world's dreams, people's dreams, our dreams.

Our passion creates ideas that make dreams come alive.

Technology and products that were only dreams become reality.

All for dreams

Dreams challenge and the Nidec-Group

will continue to meet the challenge.

For the world's tomorrow,

we will develop the world's first technologies and provide the world's best products. We will continue our part in creating a better society.

Nidec Drive Technology Corporation

Nidec Drive Technology Corporation has established itself as the leading supplier of precision gearing solutions to the industrial automation marketplace. Since 1952, when we introduced the world's first mechanical variable speed drive, Nidec DTC has expanded into a diverse manufacturer of high precision power transmission systems for highly dynamic motion control applications.

In 1994, SHIMPO was acquired by the NIDEC Corporation and became formally known as Nidec DTC. Nidec Drive Technology began to focus on accelerating production volumes as the global market for motion control and mechatronics grew at an accelerated rate. We saw a unique opportunity to supply our customer base with the highest variety of transmission technologies, which brought forward strain wave, index table and worm gear products to complement our existing portfolio of planetary and cycloidal gearheads. The result for our customers was a single source drive solutions supplier.

Today, our company is shipping over 100,000 gearheads per month out of our manufacturing plants in Kyoto and Shanghai. Our products are used in robotics, machine tools, food packaging, printing, pulp & paper, material handling, medical, semiconductor and aerospace related systems. Our diverse product portfolio, state-of-the-art equipment, engineering know-how and manufacturing scale allow our customers to compete and expand their businesses globally. Our aim is to continue to innovate and provide the highest quality, best-in-class products and services for our customer base.

Sales and Distribution Network

Nidec DTC is committed to being a world class partner for our customers. To support the needs of a constantly expanding and evolving global economy, we continue to invest heavily in extending the footprint of our support network, distribution channels and manufacturing capabilities. Our customers know our products will always be supported, no matter where they're shipped.

We utilize the latest manufacturing techniques, equipment technology and inventory management systems to ensure our products to get market fast. In addition to our primary manufacturing and assembly facilities in Japan, China and the US, we have over 30 stocking points throughout the Americas, Asia-Pacific and Europe. We leverage our broad scale but rely on these local regions to intimately serve the needs of our customers in an increasingly competitive environment. This guarantees a high level of flexibility for various gearbox adaptations and the fastest delivery times in the industry.

Nidec DTC offers worldwide support with application assistance, installation and start-up, troubleshooting and repair as well as phone support and internet tools. Our footprint allows us to handle multi-national projects with distributed design and build locations, helping equipment manufacturers speed up their time to market. Whether the need is for emergency service or international project coordination, Nidec DTC is a company you can rely on.

Nidec Drive Technology Corporation has grown to over 2,400 employees strong with a presence across five continents. Our engineering staff, customer support team and distribution partners undergo rigorous product training to ensure the quickest response to our customers' needs.

Total Quality Management

The spirit of challenge is basic to the Nidec Drive Technology Corporation culture, influencing all aspects of product development, manufacturing and customer satisfaction. The practice of challenging each individual in our organization has helped drive innovation and foster an environment of continuous improvement. We place quality and reliability at the forefront of everything we do—from design, to production, to service. We refuse to cut corners and continue to set standards within our industry.

In 1969 Nidec DTC received The Deming Prize for our outstanding quality control based on the Total Quality Management (TQM) Method. Since that time, Nidec DTC's desire to deliver top notch products has steered us towards internalizing a unique statistical quality control procedure across all departments and functional teams. Our rigid quality control program and Kaizen philosophy influences all aspects of product development, raw material procurement, production, logistics and post-sales support. By instilling the Deming Cycle – *Plan, Do, Check, Act* – deep within our company culture, Nidec DTC develops and manufactures products that exceed our customers' specifications and requirements across all criteria when benchmarked against our competition.

Nidec Drive Technology constantly measures the reliability of new technologies, consistency of raw materials, and failures rates of all components within our products to ensure new and existing designs exceed the performance benchmarks we put in place. For example, we utilize the highest quality case hardened carbon steel when designing gears for optimum safety under high pressures and bending. Our gears are carburized and also undergo a proprietary secondary finishing operation after heat treatment to improve accuracy and surface finish, which protects against wear and reduces noise during operation. Our bearings are only sourced from leading manufacturers in Japan.

What truly sets us apart is our testing. No other manufacturer in our industry puts their products through such strenuous tests as

STATE-OF-THE-ART TECHNOLOGY

Nidec DTC. We conduct several tests during development, most of which are done at 10 million cycles. We run accelerated endurance tests at full load, in a variety of environmental conditions, to demonstrate that our calculated safety factors are achieved in reality. Our gearheads are 100% exit-tested and critical factors such as backlash, noise, vibration and no-load running torque are recorded and serialized for each of the million plus products we ship yearly. From bearings, to seals, to castings, our quality inspections at material point of entry are as stringent as any testing done throughout our manufacturing process. We can setup and execute unique bench tests to mimic our customers' motion profiles and operating conditions—making us a partner from prototyping through production.

Our quality management system has been certified according to ISO 9001:2008 and ISO 14001:2004 standards. Copies of these certificates for our manufacturing facilities can be found on our website. Nidec DTC regularly undergoes strict quality audits. We take this process very seriously, realizing we must maintain these standards in order to build brand awareness and establish credibility globally.

Nidec Drive Technology will continue to challenge itself and our individual employees while striving for greater levels of product quality. It is a daunting challenge, as the incremental gains in quality become smaller and much harder to achieve. However, the challenge is ingrained within the spirit of each Nidec DTC employee. This "*Do It Now, Complete The Job and Follow Through*" Attitude exhibited by our employees helps create superior products for the global marketplace.

Manufacturing Strength and Capabilities

Nidec Drive Technology Corporation's state-of-the-art manufacturing facilities are located in Kyoto, Japan and Shanghai, China. Both facilities have undergone significant expansions over the past few years, bringing our combined monthly output to over 100,000 units. These facilities house several hundred gear fabrication machines, CNC machines and test equipment. Gear cutting, hobbing, shaping, milling, EDM, broaching, heat treatment and secondary finishing processes are all employed under one roof, giving us complete control over the entire manufacturing process.

Nidec DTC utilizes the latest robotics and automation

equipment, allowing for fast machine tool changeover times, increased productivity, increased safety, reduced labor cost and reduced defect rates. Automated storage and retrieval systems and automated guided vehicles are used to ensure the proper parts get to where they need to be, quickly.

Our company thrives on challenging designs that often daunt others. These include extremely accurate products with <1 arc-min backlash, gearboxes designed to withstand extreme temperatures, units customized to meet certain weight targets, special lubrication and unique output shafts for streamlined connection to the

customer equipment. Our cleanroom facility houses special product assembly for medical, semiconductor, aerospace and other mission-critical customer applications.

We strongly believe and have proved in practice that providing a high quality product can not only lower our own manufacturing costs, but can allow our customers to reduce their costs and compete globally. Lean processes, rigorous inventory control, modular design, fewer returns, reduced waste and negligible repair translate to reduced costs that enable Nidec DTC to offer a superior, cost-effective product.

We have developed a core competency at quickly developing products and applying our know-how to efficiently scale-up a manufacturing process from prototype testing to large volume production. We promise to leverage this intrinsic skill set in order to continue to push the product development envelope and provide the greatest value to our customers. If you are a new customer considering our products for the first time, we strongly encourage and welcome a visit to any of our manufacturing facilities to see our capabilities first-hand.

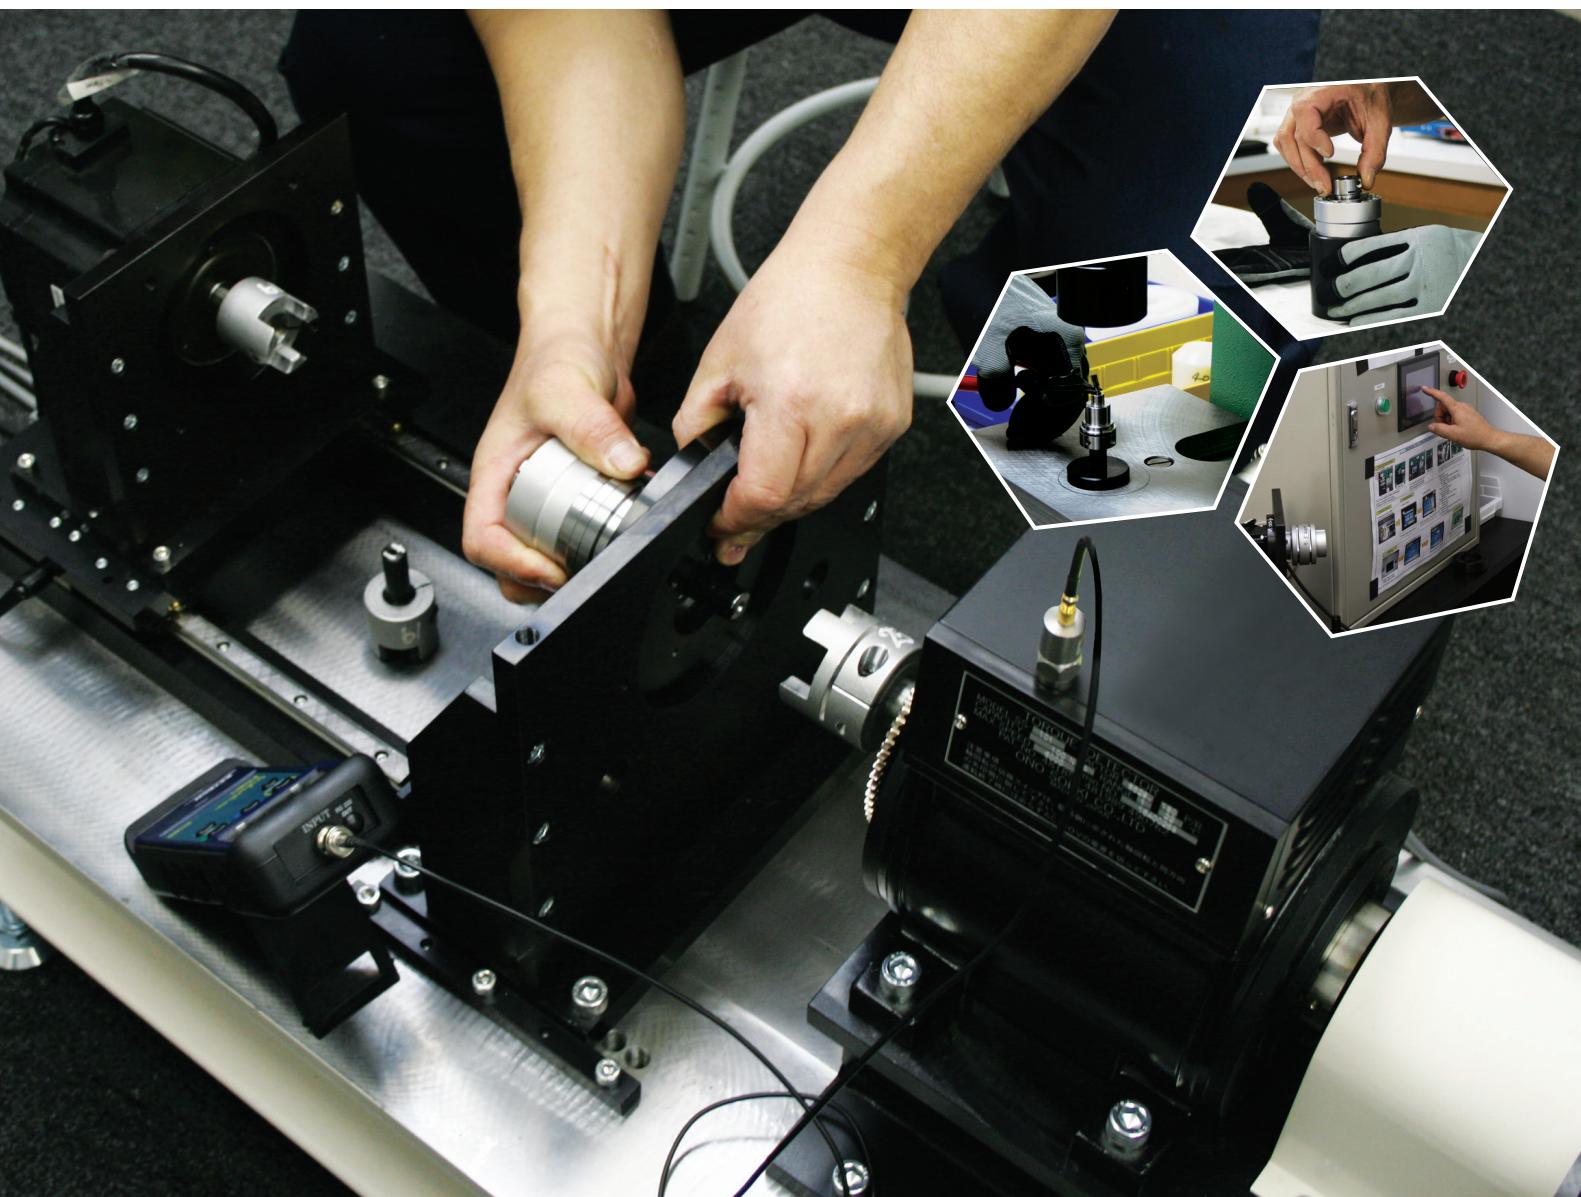

North American Assembly Operations

Nidec Drive Technology Corporation services the North American market through our Headquarters and 50,000 sq. ft. assembly facility in Glendale Heights, Illinois. This facility houses our sales, design and application engineering and customer support teams. We assemble over 75% of our products in North America, most of which can ship within 1 week. Motor adapters are readily available for easy mounting to any servomotor manufacturers' models. With over \$3MM in inventory, next day delivery is available for several common models and for emergency replacements for equipment in the field.

We are highly flexible and can fulfill custom requirements such as special output shafts dimensions, coatings, lubrication, materials of construction and integrated product assemblies. Our products are 100%

exit-tested to ensure all performance specifications are met, giving our customers security and peace of mind. Each gearbox is inspected for noise, backlash, vibration, no-load running torque, concentricity and input shaft slipping using the latest equipment and methods. Our 5 Year Standard Warranty is our way of demonstrating Nidec DTC's commitment to quality and durability over the long term.

Local, personal support is a phone call or email away. Each Nidec DTC customer has a dedicated team of customer service and technical support professionals, on standby to assist with pricing, delivery, sizing, repairs, installation support or other needs. We strive to deliver the highest quality, value and service in the industry.

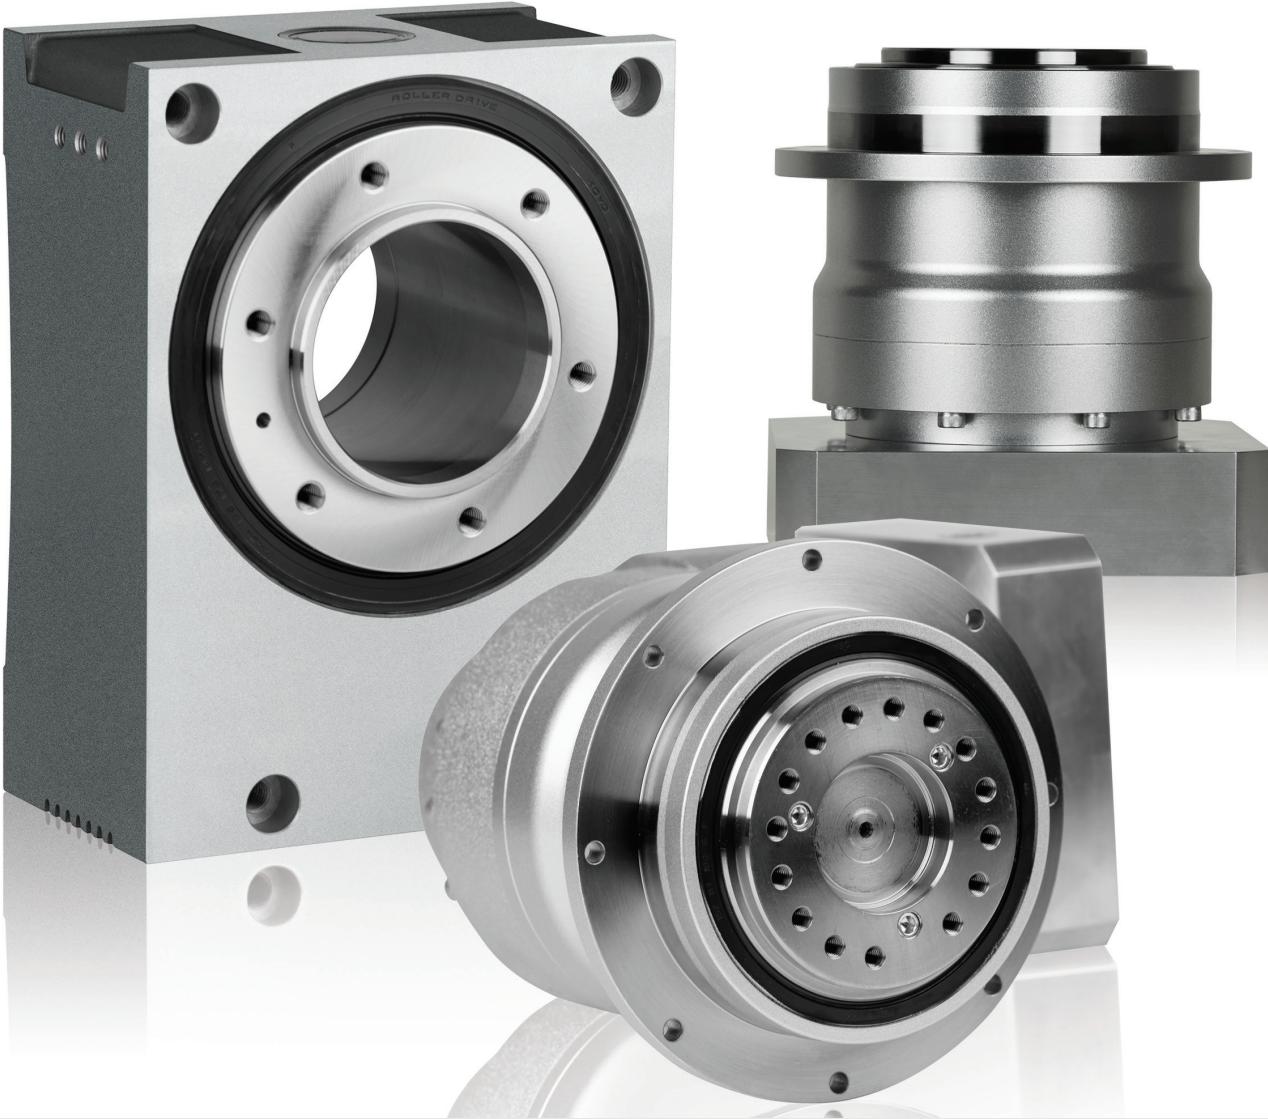

Unmatched Product Availability

Whether our customer is an OEM bringing a new product to market or an end user maintaining equipment in their manufacturing plant, down time is not an option. Our manufacturing, local assembly, inventory and distribution process ensures seamless communication between all parties and the fastest turnaround times. Put us to the test and see how we can save you time and money.

Solutions for Industry

Machine Tool and Metal Forming

A robust portfolio of planetary, cycloidal, strain wave and rotary index table products to drive every axis of your machine. We offer accuracies down to the arc-second, which enable our customers to make the most accurate cuts. Our pancake gear units are excellent solutions when space savings is of concern.

Assembly and Test Automation

Our wide range of technologies give custom machine builders design flexibility, all available from one source. Our servo-driven hollow shaft rotary indexers are often used in turn table applications, replacing legacy mechanical camming drives. Many products are available within 1-2 days, to accommodate project-based business.

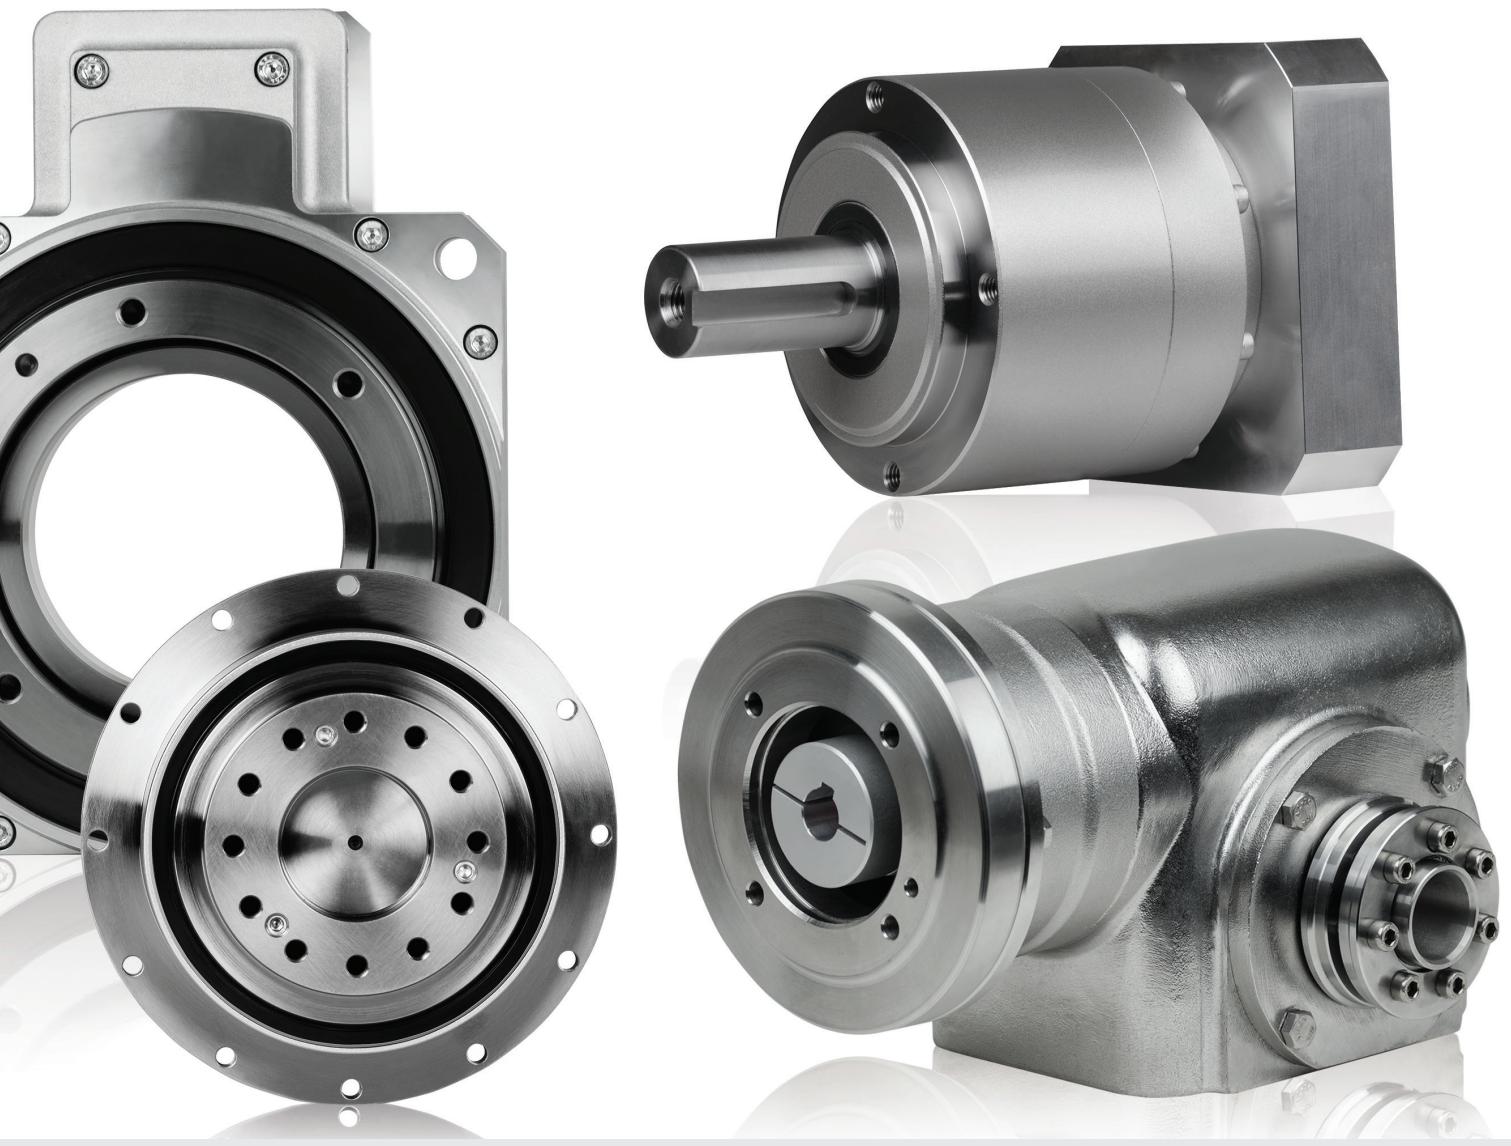

Packaging and Filling

Our products can be customized with coatings and lubrication to meet various food grade and wash down requirements. Our EJS series is the ultimate hygienic solution for extreme environments. Cost-effective planetary and worm options are available for OEMs transitioning from mechanical to servo technology.

Material Handling

Nidec Drive Technology Corporation is the global leader in drive technology for the Automated Guided Vehicle (AGV) market. We supply compact, energy efficient solutions that are not only modular, but scalable. We have experience designing custom solutions that withstand tough environments and demanding loads.

Printing and Converting

Our gear reducers are designed to minimize the heat generation and are therefore capable of operating at higher speeds, continuously. Operating at lower temperatures, our products act as a "heat sink", drawing heat from the servo motors, allowing them to run faster and longer.

Medical and Health Care Systems

We offer extremely accurate positioning characteristics and high quality gearheads that maintain a level of performance consistency required in medical applications. Our products are used across a gamut of applications, including diagnostic imaging, surgical robotics, exoskeleton systems and lab automation.

Robotics

NIDEC-SHIMPO is a leading supplier into the robotics industry. From 7th axis shuttle systems to end-of-arm tooling, we have solutions for every joint. Our strain wave gear component sets allow for optimized packaging, reduced weight and improved control. Both, standard products and custom engineered solutions are available.

Semiconductor and Circuit

A broad offering of high precision, clean room friendly planetary, strain wave and cycloidal solutions that are preferable over belt drives and other reduction methods that can introduce contamination. Custom coatings and materials of construction are available as necessary for corrosive chamber environments and different clean room classifications.

VRSF SERIES

The intelligent, value engineered selection for lower duty cycle servo and stepper motor applications. The VRSF utilizes a light-weight aluminum frame, making it optimal for traveling axes and end of arm tooling systems. Helical cut gearing allows the VRSF to operate much quieter than the industry standard economy products which rely on spur gearing. The VRSF comes standard with 15 arc-minutes of backlash, but can also be configured to higher accuracy levels.

The VRSF is available in four frame sizes, putting out a peak output torque of 274Nm across 9 reduction ratios. The VRSF is the ideal choice for OEMs producing high volume machines where cost is critical, accuracy relatively important and duty cycle not overly extreme. The VRSF's aluminum body has made it a popular choice in medical, food packaging and other harsh environments. The VRSF can be fitted with a NEMA output flange, for standardized connection to customer equipment.

VRSF SERIES

- Value engineered solution for simple servo and stepper motor applications
- Quiet operation: Helical cut gears contribute to reduced vibration and noise
- Wide range of mounting adapters offer a simple, precise attachment to any motor
- Lightweight aluminum body reduces excess weight
- Aluminum body, combined with other wash-down features can be used in harsh environments
- Maintenance-free solution that is lubricated for life. High performance grease allows flexible mounting in any orientation

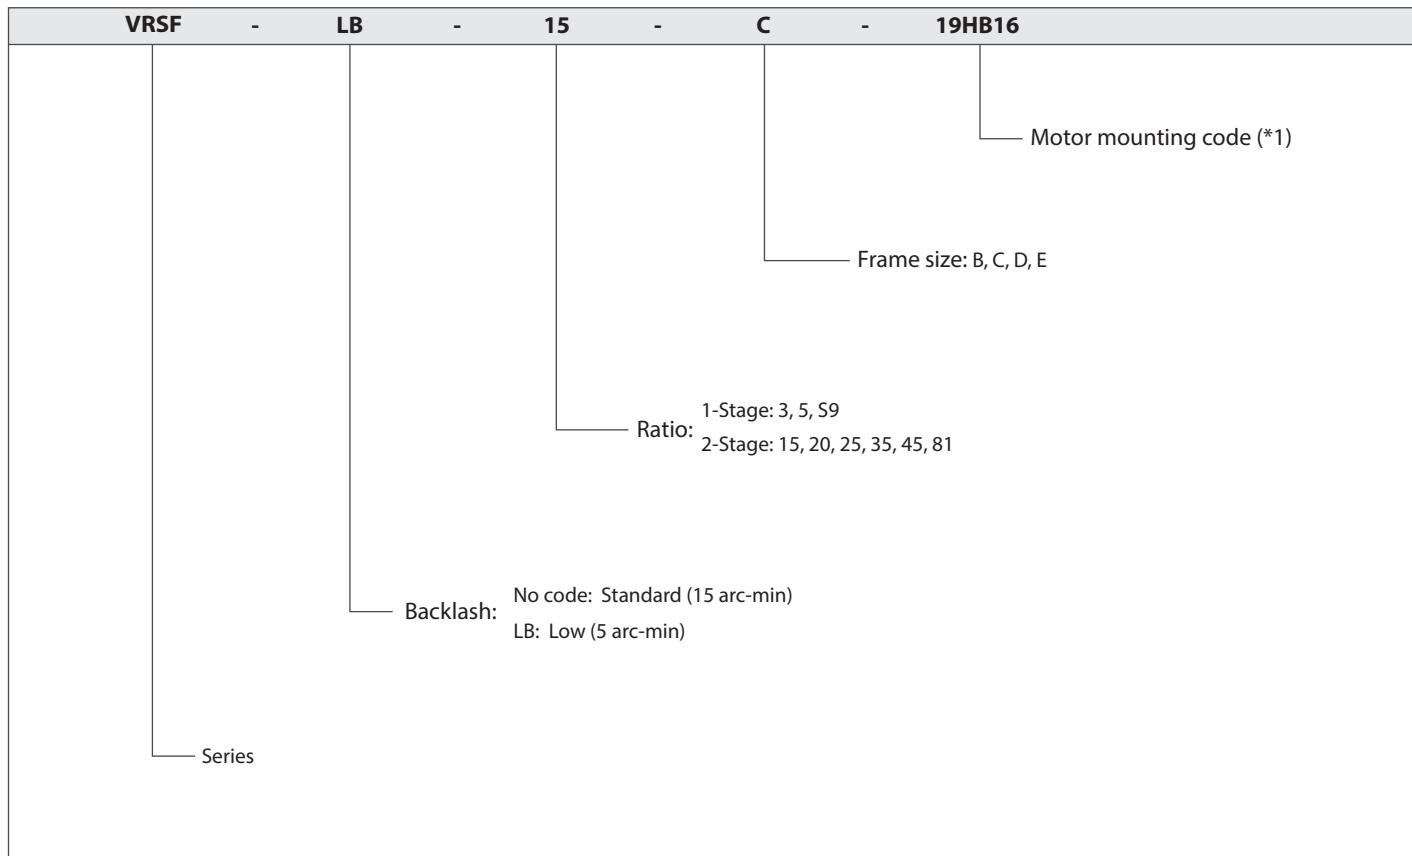

VRSF SERIES Inline Planetary

VRSF Series Features

- ① Carburized helical gears with proprietary secondary finishing process for higher accuracy and smooth, quiet operation
- ② One piece output shaft and planet carrier with two bearings straddling the planet gears. Higher stiffness and safety factor, with guaranteed alignment of gearing
- ③ Aluminum body for a light weight solution, capable of withstanding corrosive environments
- ④ Input seal allows for IP65 ingress protection
- ⑤ Optimized mounting system with active centering on motor pilot diameter guarantees alignment of motor. Motor can be installed in any orientation
- ⑥ True concentric clamping connection, optimized for your motor. Reduced inertia for dynamic performance and balanced for high speed operation

VRSF Series Model Code

*1) Code varies depending on the motor. Use the selection tool link below to configure the code

Contact us for additional information or refer to our online gearhead selection tool.
[Selection tool https://www.nidec-drivetechnology.co.jp/selection/all/](https://www.nidec-drivetechnology.co.jp/selection/all/)

The screenshot displays the Nidec Servo Reducer Selection Tool interface, which consists of three main windows:

- Left Window:** "Make a selection from the motor list". It shows a selection tree: "Selection flow" → "Choose motor" → "Choose ratio" → "Choose frame size" → "Complete". Below this is an "Application selection" section with a gear icon and a "Search reducer model" section with a search bar containing "VRS-010-VRB-15-100-15-15-15".
- Middle Window:** "Choose Motor". It includes dropdown menus for "Motor Manufacturer" (Nidec), "Reducer series" (VRB), "Motor Model" (S1V-100), and "Ratio" (15). It also shows a preview image of a motor and lists "Detailed reducer series" for VRS, VRT, VRB, VRL, VRG, and VRF.
- Right Window:** "Detailed reducer series". This is a detailed view of the VRB series, showing a table of options for various parameters like Appearance, Output shaft, Ratio, and Weight. It also includes sections for "Reducer model" (S1V-100-15-VRB14), "Reducer specification" (including ratio, torque, and speed), and "Attached motor" (AUTOMATION DR90T).

VRL SERIES

The VRL series is the all-rounder in the planetary gearbox market-place. With helical gearing, robust internal construction, smooth operation and high torque density, this product is truly best-in-class. 5 arc-min backlash allows the VRL to be applied to a wide range of applications where accuracy and dynamics are in play, but cost is of concern.

The VRL is an excellent choice for servo applications in packaging, handling and automation systems. A variety of standard wash down and food grade options are available, making it an attractive option for the toughest environments. We offer the broadest selection of frame sizes and ratios, giving our customers more flexibility than ever before. Industry standard mounting dimensions allow the VRL to be implemented in legacy machine designs, saving our customers valuable time.

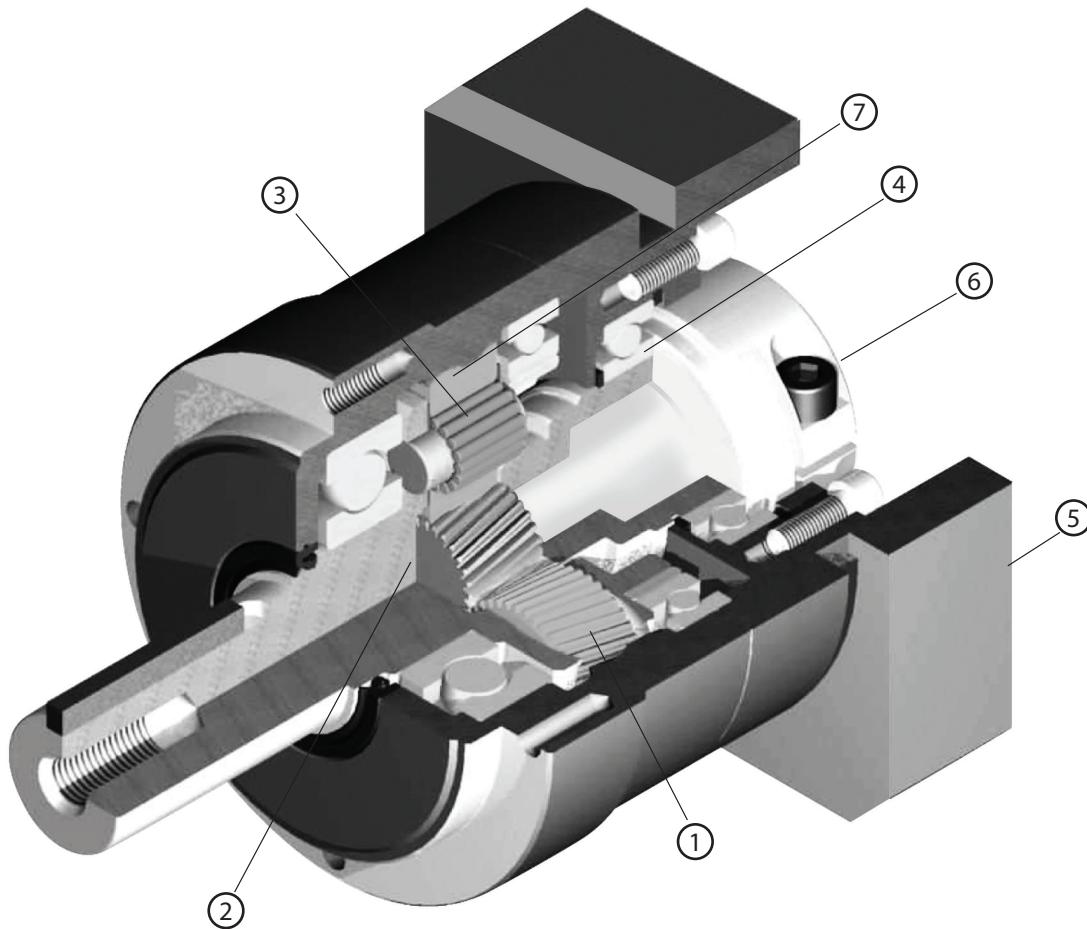

VRL SERIES

- The all-rounder for mid to high end motion control applications
- The widest range of frame sizes and ratios available in the market
- Best-In-class backlash (≤ 5 arc-min)
- Broad range of mounting adapters offer a simple, precise attachment to any motor
- Maintenance-free solution that is lubricated for life. High performance grease allows flexible mounting in any orientation
- Industry standard mounting dimensions
- Assembled in the USA, with immediate delivery

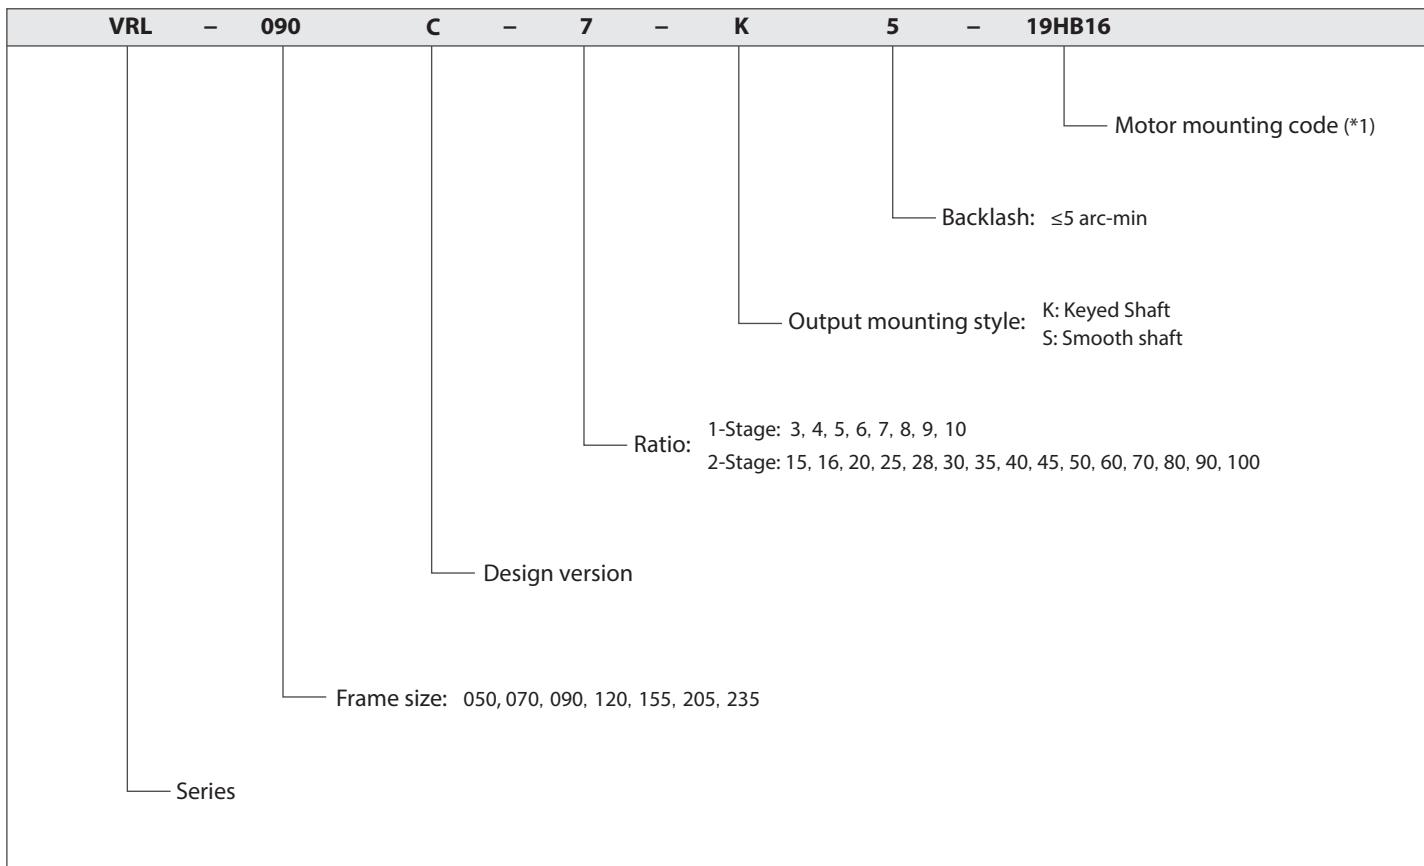

VRL SERIES Inline Planetary

VRL Series Features

- ① Carburized helical gears with proprietary secondary finishing process for higher accuracy and smooth, quiet operation. 40% higher tooth surface area than the industry standard
- ② One piece output shaft and planet carrier with two bearings straddling the planet gears. Higher stiffness, torque capacity and safety factor, with guaranteed alignment of gearing
- ③ Uncaged needle roller bearings provide excellent torque density and torsional rigidity. 43% larger bearing surface area compared to the rest of the industry
- ④ Unique labyrinth input seal design greatly reduces heat and increases system efficiency. IP65 protection is available for wash down applications
- ⑤ Optimized mounting system with active centering on motor pilot diameter guarantees alignment of motor. Motor can be installed in any orientation
- ⑥ True concentric motor shaft clamping connection, optimized for your specific motor. Reduced inertia for dynamic performance and balanced for high speed operation
- ⑦ Ring gear machined directly into the housing, not welded or pressed in. Provides greater concentricity and elimination of speed fluctuation

VRL Series Model Code

*1) Motor mounting code varies depending on the motor. Use the selection tool link below to configure the code.

Contact us for additional information or refer to our online gearhead selection tool.
[Selection tool https://www.nidec-drivetechnology.co.jp/selection/all/](https://www.nidec-drivetechnology.co.jp/selection/all/)

The screenshot shows the Nidec Servo Reducer Selection Tool interface, which consists of three main windows:

- Left Window:** Shows the selection process for a VRL series gearhead. It includes steps for choosing the motor, load condition, frame size, and application. A "Search reducer model" section is also present.
- Middle Window:** Displays the "Detailed reducer series" table. It lists various models (VRL10B8-B, VRL19B8-B, VRL28B8-B, VRL35B8-B, VRL23B8-B) along with their notes: "The motor is too small for the reducer." for all listed models.
- Right Window:** Provides detailed information for the selected model: VRL19B8-B. It shows the "Reducer specification" table, "Attached motor" details, and "Download dimensions".

*1) At nominal input speed, service life is 20,000 hours

*2) The maximum torque when starting or stopping operation. Apply Cycle Factor f_0 , found on page 468, for higher duty cycle applications

*3) Permitted 10,000 times during service life. Based on 10% of maximum radial load and smooth output shaft

*4) The maximum torque allowed under a stress situation. Permitted 1,000 times during service life

*5) The average input speed at nominal input torque. Maintain housing temperature below permitted value

*6) The maximum intermittent input speed

*7) Torque at no load applied to the input shaft at nominal input speed

*8) The maximum radial load that the gearbox can accept

*9) The maximum axial load that the gearbox can accept

*10) The efficiency at the nominal output torque rating

*11) This does not include lost motion

*12) Contact Nidec Drive Technology for the testing conditions and environment

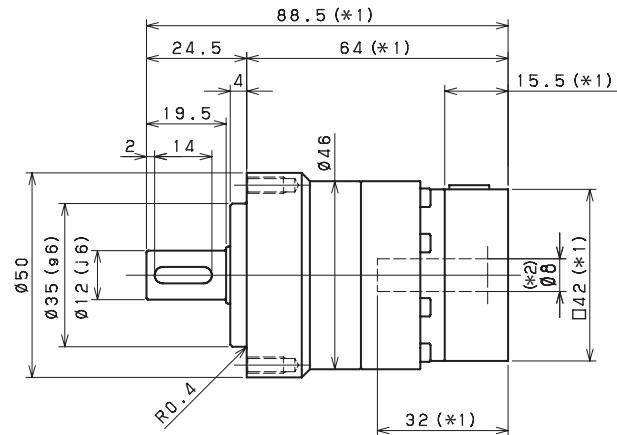

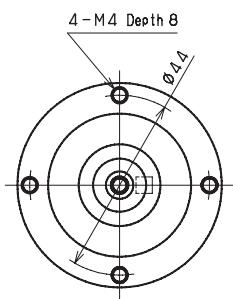

*13) IP65 (wash-down) is available as an option. Contact Nidec Drive Technology for more details

*14) Weight may vary slightly between models

*1) At nominal input speed, service life is 20,000 hours

*2) The maximum torque when starting or stopping operation. Apply Cycle Factor f_0 , found on page 468, for higher duty cycle applications

*3) Permitted 10,000 times during service life. Based on 10% of maximum radial load and smooth output shaft

*4) The maximum torque allowed under a stress situation. Permitted 1,000 times during service life

*5) The average input speed at nominal input torque. Maintain housing temperature below permitted value

*6) The maximum intermittent input speed

*7) Torque at no load applied to the input shaft at nominal input speed

*8) The maximum radial load that the gearbox can accept

*9) The maximum axial load that the gearbox can accept

*10) The efficiency at the nominal output torque rating

*11) This does not include lost motion

*12) Contact Nidec Drive Technology for the testing conditions and environment

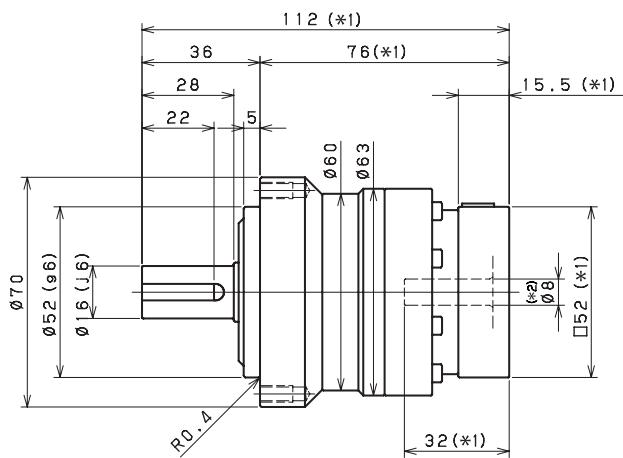

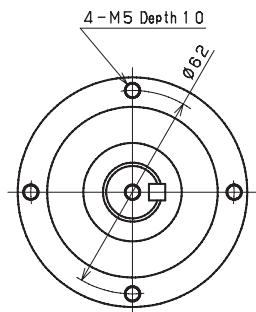

*13) IP65 (wash-down) is available as an option. Contact Nidec Drive Technology for more details

*14) Weight may vary slightly between models

*1) At nominal input speed, service life is 20,000 hours

*2) The maximum torque when starting or stopping operation. Apply Cycle Factor f_0 , found on page 468, for higher duty cycle applications

*3) Permitted 10,000 times during service life. Based on 10% of maximum radial load and smooth output shaft

*4) The maximum torque allowed under a stress situation. Permitted 1,000 times during service life

*5) The average input speed at nominal input torque. Maintain housing temperature below permitted value

*6) The maximum intermittent input speed

*7) Torque at no load applied to the input shaft at nominal input speed

*8) The maximum radial load that the gearbox can accept

*9) The maximum axial load that the gearbox can accept

*10) The efficiency at the nominal output torque rating

*11) This does not include lost motion

*12) Contact Nidec Drive Technology for the testing conditions and environment

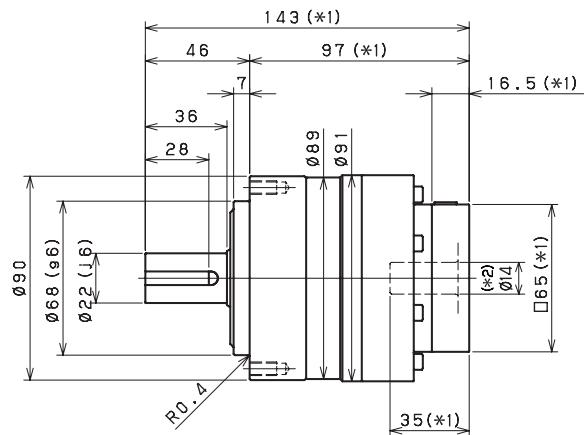

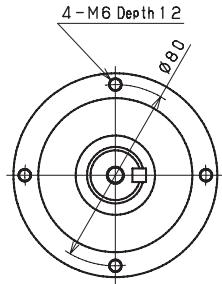

*13) IP65 (wash-down) is available as an option. Contact Nidec Drive Technology for more details

*14) Weight may vary slightly between models

VRB SERIES

A valuable alternative for applications requiring high positional accuracy and dynamic performance. The VRB is a <3 arc-min gearbox that offers a through hole mounting design, making it easier to assemble onto various equipment. This product is an ideal fit for various belt drive and actuator applications found throughout the packaging and assembly cell automation markets.

Various standard wash down and food grade options are available, making the VRB an attractive choice for the toughest environments. We offer the broadest selection of frame sizes and ratios, with immediate availability on most configurations. Industry standard mounting dimensions allow the VRB to be employed in legacy equipment designs, saving our customers time and money.

VRB

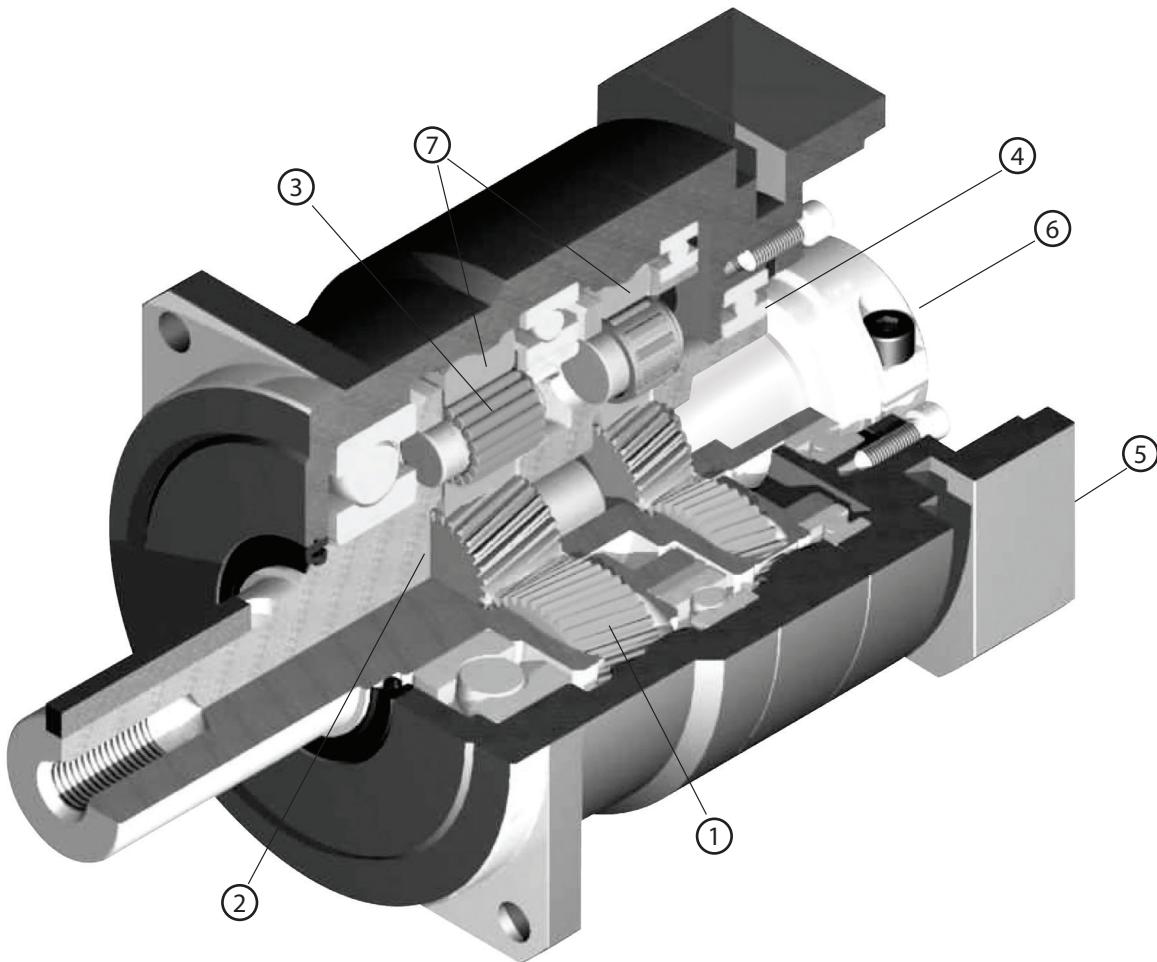

VRB SERIES

- Exceptional value for high end motion control applications with demanding accuracy requirements
- The widest range of frame sizes and ratios available in the market
- Best-In-class backlash (≤ 3 arc-min)
- Broad range of mounting adapters offer a simple, precise attachment to any motor
- Maintenance-free solution that is lubricated for life. High performance grease allows flexible mounting in any orientation
- Industry standard through-bolt mounting style
- Assembled in the USA, with immediate delivery

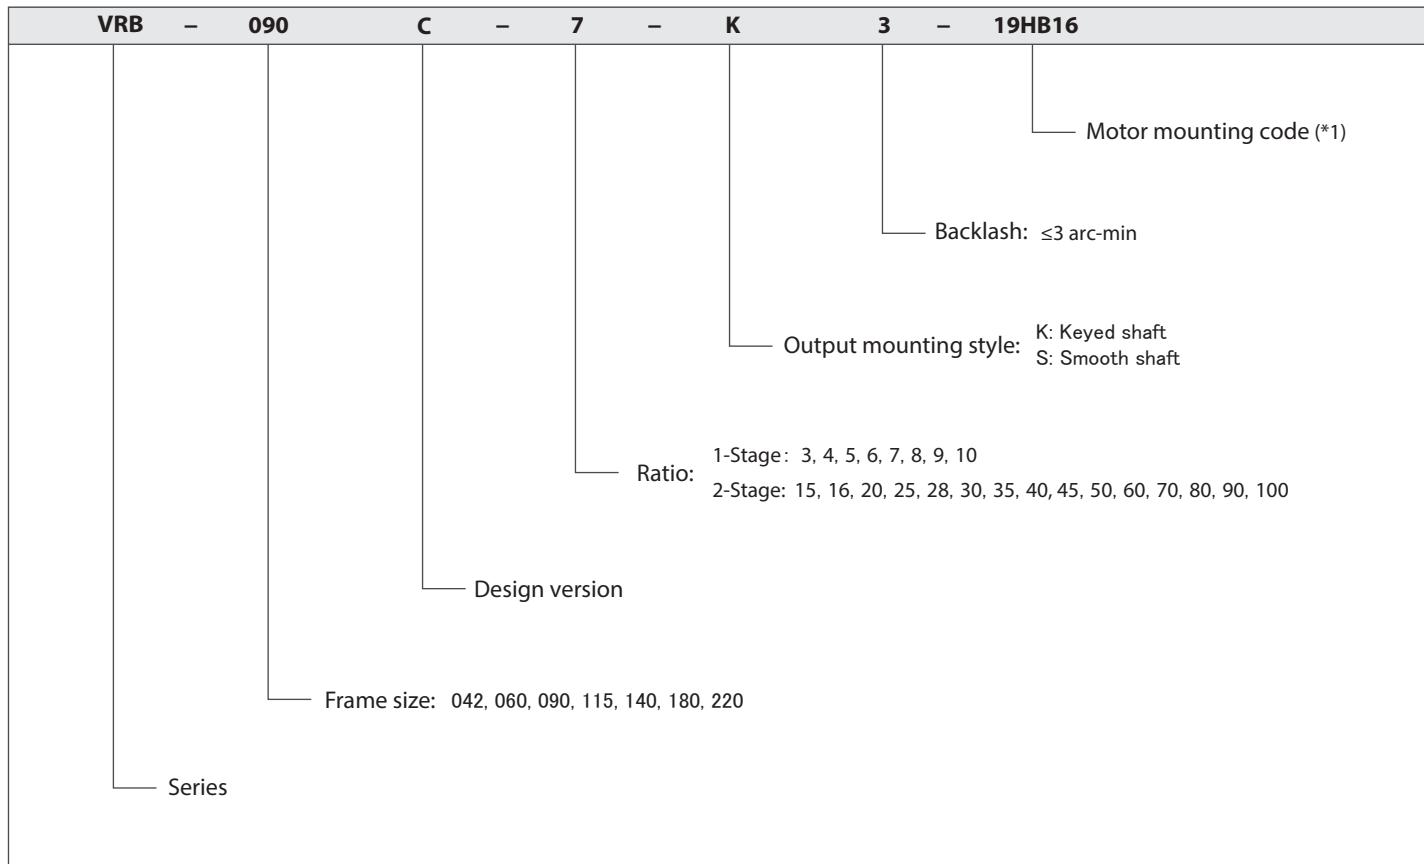

VRB SERIES Inline Planetary

VRB Series Features

- ① Carburized helical gears with proprietary secondary finishing process for higher accuracy and smooth, quiet operation. 40% higher tooth surface area than the industry standard
- ② One piece output shaft and planet carrier with two bearings straddling the planet gears. Higher stiffness, torque capacity and safety factor, with guaranteed alignment of gearing
- ③ Uncaged needle roller bearings provide excellent torque density and torsional rigidity. 43% larger bearing surface area compared to the rest of the industry
- ④ Unique labyrinth input seal design greatly reduces heat and increases system efficiency. IP65 protection is available for wash down applications
- ⑤ Optimized mounting system with active centering on motor pilot diameter guarantees alignment of motor. Motor can be installed in any orientation
- ⑥ True concentric motor shaft clamping connection, optimized for your specific motor. Reduced inertia for dynamic performance and balanced for high speed operation
- ⑦ Ring gear machined directly into the housing, not welded or pressed in. Provides greater concentricity and elimination of speed fluctuation

VRB Series Model Code

*1) Motor mounting code varies depending on the motor. Use the selection tool link below to configure the code.

Contact us for additional information or refer to our online gearhead selection tool.
Selection tool <https://www.nidec-drivetechnology.co.jp/selection/all/>

The screenshot shows the Nidec Servo Reducer Selection Tool interface. It consists of three main windows:

- Step 1: Motor selection** (Left window): Shows a list of motors: VRB-090B-0, VRB-090B-0, VRB-120B-0, VRB-130B-0, VRB-230B-0, VRB-230B-0. A note says "The motor is too small for the reducer".
- Step 2: Application selection** (Middle window): Shows a list of applications: VRB, VRB, VRB. A note says "The motor is too small for the reducer".
- Step 3: Detailed reducer series** (Right window): Shows the selected model: VRB-19HB16. It includes detailed specifications like Input Power (0.45 kW), Input Speed (1000 rpm), and Output Torque (0.05 Nm). It also shows a 3D model of the gearhead and download links for PDF, DWF, IGES, STEP, and DXF formats.

*1) At nominal input speed, service life is 20,000 hours

*2) The maximum torque when starting or stopping operation. Apply Cycle Factor f_0 , found on page 468, for higher duty cycle applications

*3) Permitted 10,000 times during service life. Based on 10% of maximum radial load and smooth output shaft

*4) The maximum torque allowed under a stress situation. Permitted 1,000 times during service life

*5) The average input speed at nominal input torque. Maintain housing temperature below permitted value

*6) The maximum intermittent input speed

*7) Torque at no load applied to the input shaft at nominal input speed

*8) The maximum radial load that the gearbox can accept

*9) The maximum axial load that the gearbox can accept

*10) The efficiency at the nominal output torque rating

*11) This does not include lost motion

*12) Contact Nidec Drive Technology for the testing conditions and environment

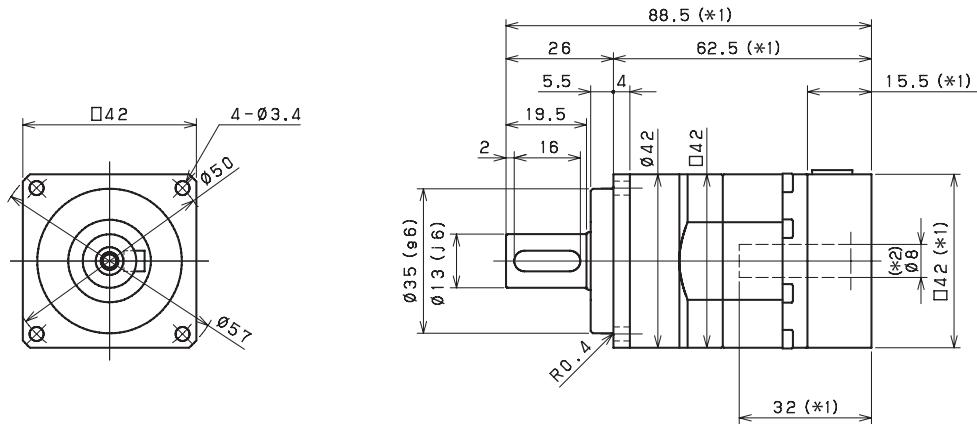

*13) IP65 (wash-down) is available as an option. Contact Nidec Drive Technology for more details

*14) Weight may vary slightly between models

*1) At nominal input speed, service life is 20,000 hours

*2) The maximum torque when starting or stopping operation. Apply Cycle Factor f_0 , found on page 468, for higher duty cycle applications

*3) Permitted 10,000 times during service life. Based on 10% of maximum radial load and smooth output shaft

*4) The maximum torque allowed under a stress situation. Permitted 1,000 times during service life

*5) The average input speed at nominal input torque. Maintain housing temperature below permitted value

*6) The maximum intermittent input speed

*7) Torque at no load applied to the input shaft at nominal input speed

*8) The maximum radial load that the gearbox can accept

*9) The maximum axial load that the gearbox can accept

*10) The efficiency at the nominal output torque rating

*11) This does not include lost motion

*12) Contact Nidec Drive Technology for the testing conditions and environment

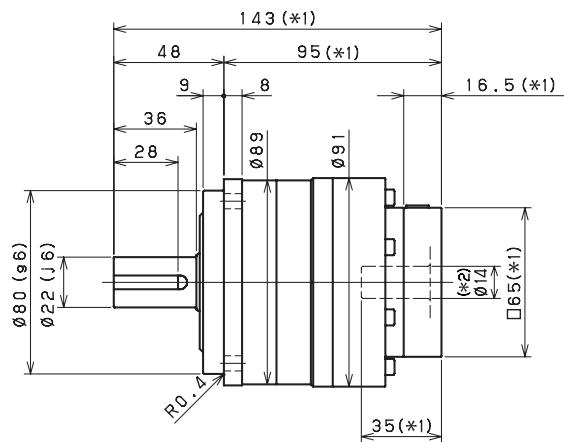

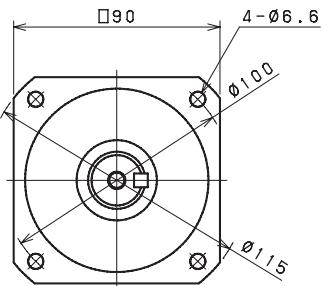

*13) IP65 (wash-down) is available as an option. Contact Nidec Drive Technology for more details

*14) Weight may vary slightly between models

*1) At nominal input speed, service life is 20,000 hours

*2) The maximum torque when starting or stopping operation. Apply Cycle Factor f_0 , found on page 468, for higher duty cycle applications

*3) Permitted 10,000 times during service life. Based on 10% of maximum radial load and smooth output shaft

*4) The maximum torque allowed under a stress situation. Permitted 1,000 times during service life

*5) The average input speed at nominal input torque. Maintain housing temperature below permitted value

*6) The maximum intermittent input speed

*7) Torque at no load applied to the input shaft at nominal input speed

*8) The maximum radial load that the gearbox can accept

*9) The maximum axial load that the gearbox can accept

*10) The efficiency at the nominal output torque rating

*11) This does not include lost motion

*12) Contact Nidec Drive Technology for the testing conditions and environment

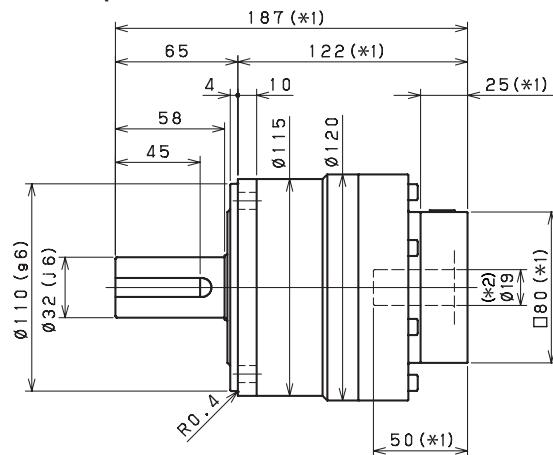

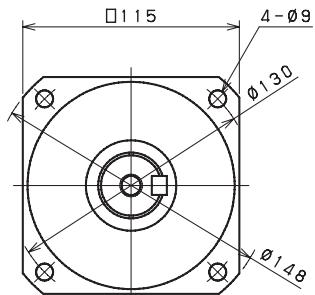

*13) IP65 (wash-down) is available as an option. Contact Nidec Drive Technology for more details

*14) Weight may vary slightly between models

VRS SERIES

Compact and precise, the VRS is the ideal solution for demanding positioning accuracy and speed requirements. This product is a proven performer in higher speed, continuous duty applications where heat reduction is critical. Equipped with two rows of robust tapered roller bearings, the VRS runs smoothly and quietly even with the most challenging dynamic and static forces.

The VRS is available with reduced backlash, less than 2 arc-min, to handle dynamic machine tool and robotic applications with ease. With maximum acceleration torques up to 3700Nm, this product is an excellent partner to higher capacity servomotor models. Our customers specify this product when the industry standard is simply not good enough.

A heatmap illustrating the performance of different systems or configurations across four key metrics: Relative Cost, Load Capacity, Duty Cycle, and Positional Accuracy. The vertical axis on the left lists three levels of performance: Optimal, Exceptional, and Suitable. The horizontal axis at the bottom represents the four metrics. The color intensity in each cell indicates the magnitude of the performance metric for that specific combination.

	Relative Cost	Load Capacity	Duty Cycle	Positional Accuracy
Optimal	High	Medium	Medium	Medium
Exceptional	Medium	Low	Low	Medium
Suitable	Low	Very Low	Very Low	Low

VRS

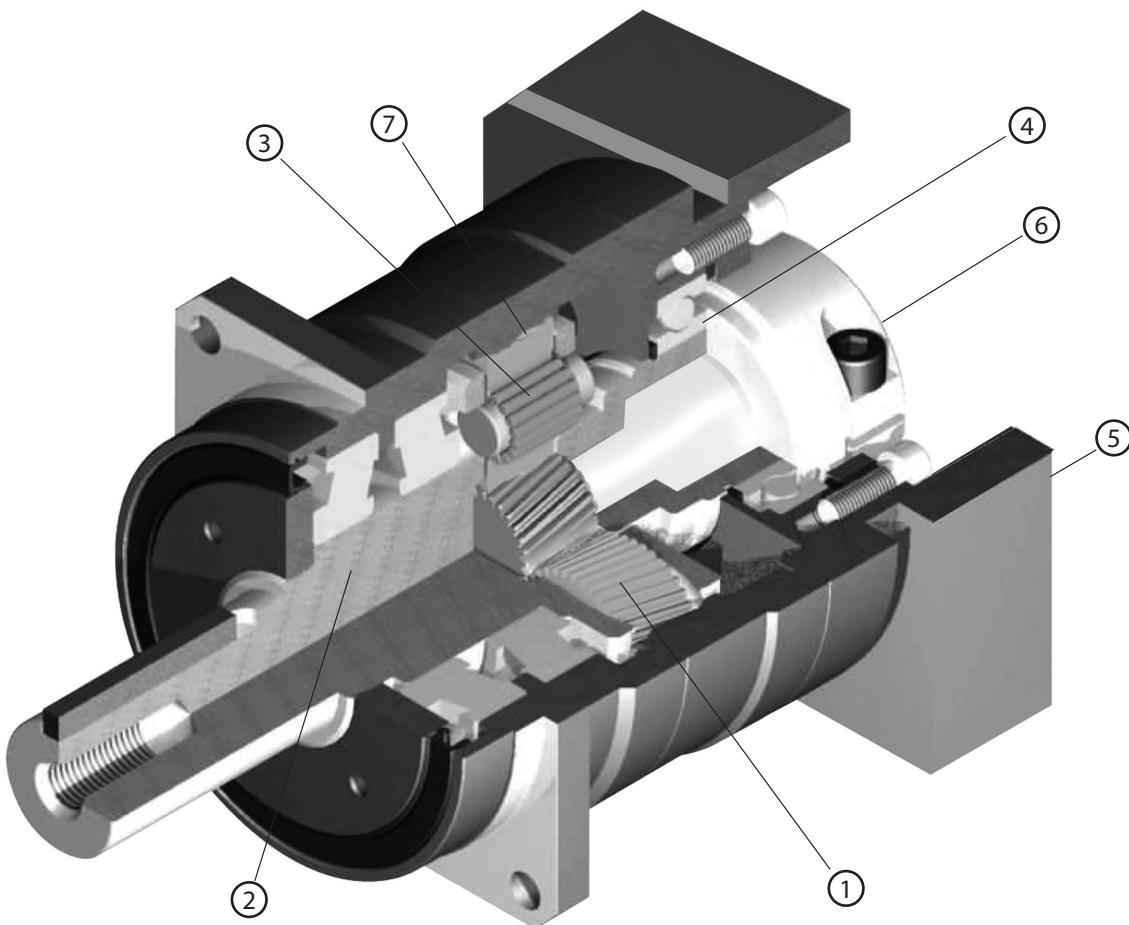

VRS SERIES

- Proven performer in high end motion control applications with demanding accuracy requirements
- Excellent fit for difficult overhung load situations or continuous duty cycles
- The widest range of frame sizes and ratios available in the market
- Best-In-class standard backlash (≤ 3 arc-min) with reduced backlash options available
- Broad range of mounting adapters offer a simple, precise attachment to any motor
- Maintenance-free solution that is lubricated for life. High performance grease allows flexible mounting in any orientation
- Industry standard through-bolt mounting style
- Assembled in the USA

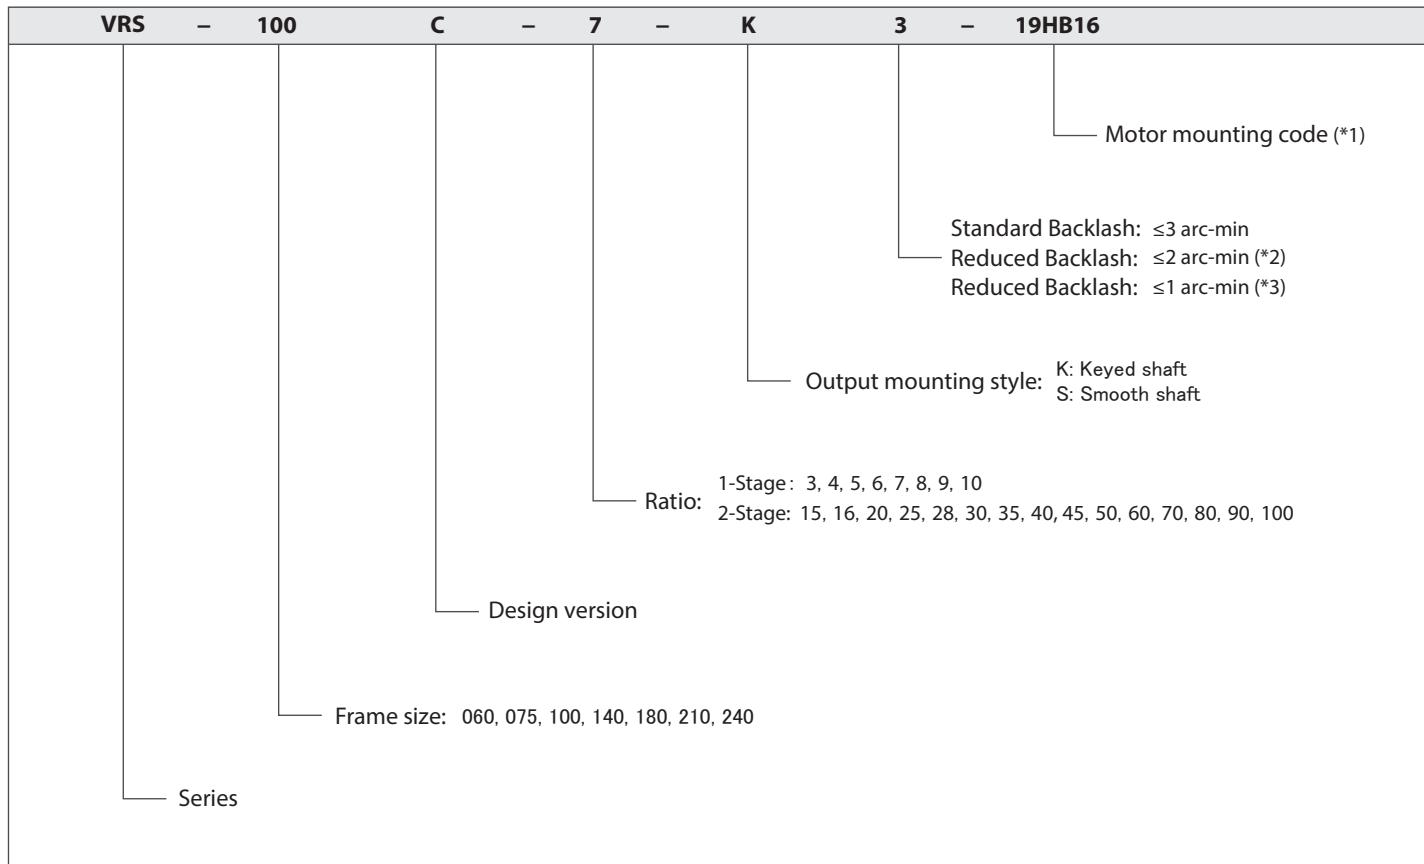

VRS SERIES Inline Planetary

VRS Series Features

- ① Carburized helical gears with proprietary secondary finishing process for higher accuracy and smooth, quiet operation
- ② One piece output shaft and planet carrier with two robust tapered bearings. Higher radial/axial load capacity, stiffness, torque density and safety factor, with guaranteed alignment of gearing
- ③ Uncaged needle roller bearings provide excellent torque density and torsional rigidity
- ④ Unique labyrinth input seal design greatly reduces heat and increases system efficiency. IP65 protection is available for wash down applications
- ⑤ Optimized mounting system with active centering on motor pilot diameter guarantees alignment of motor. Motor can be installed in any orientation
- ⑥ True concentric motor shaft clamping connection, optimized for your specific motor. Reduced inertia for dynamic performance and balanced for high speed operation
- ⑦ Ring gear machined directly into the housing, not welded or pressed in. Provides greater concentricity and elimination of speed fluctuation

VRS Series Model Code

*1) Motor mounting code varies depending on the motor. Use the selection tool link below to configure the code.

*2) Sizes 060/075, Single Stage Only

*3) Sizes 100/140/180, Single Stage Only

Contact us for additional information or refer to our online gearhead selection tool.
 Selection tool <https://www.nidec-drivetechnology.co.jp/selection/all/>

The screenshot shows the Nidec Servo Reducer Selection Tool interface, which consists of three main windows:

- Left Window:** A step-by-step guide for selecting a reducer. It includes sections for "Selection flow" (e.g., "Choose series > Choose ratio > Choose frame size > Complete"), "Application selection" (e.g., "Choose Application > Input condition > Choose frame size > Choose Motor > Complete"), and "Search reducer model" (e.g., "Search reducer model > Selection completed").
- Middle Window:** A detailed "Detailed reducer series" selection screen. It lists various series like VRL, VRT, VRB, VRD, and VRDF, each with its own set of parameters and options. The user has selected the VRL series.
- Right Window:** A "Reducer specification" and "Download dimensions" window. It provides specific details for the selected VRL-100B-8 model, including:
 - Reducer specification:**
 - Ratio: 8
 - Shaft: Shaft with key
 - Mounting: Direct
 - Shaft length: 100 mm
 - Shaft center: 400 mm
 - Shaft diameter: 40 mm
 - Shaft width: 10 mm
 - Shaft height: 10 mm
 - Shaft weight: 400 g
 - Attached motor:** AUTOMATION DIRECT
Model: VRL-100B-8
 - Motor specification:**
 - Current: 0.1 A
 - Normal torque: 0.1 Nm
 - Normal torque per 1000 rpm: 0.005 Nm
 - Max torque: 0.15 Nm
 - Max torque per 1000 rpm: 0.015 Nm
 - Max speed: 6000 rpm
 - Dimensions:** Shows standard drawings for the VRL-100B-8 model.

*1) At nominal input speed, service life is 20,000 hours

*2) The maximum torque when starting or stopping operation. Apply Cycle Factor f_0 , found on page 468, for higher duty cycle applications

*3) Permitted 10,000 times during service life. Based on 10% of maximum radial load and smooth output shaft

*4) The maximum torque allowed under a stress situation. Permitted 1,000 times during service life

*5) The average input speed at nominal input torque. Maintain housing temperature below permitted value

*6) The maximum intermittent input speed

*7) Torque at no load applied to the input shaft at nominal input speed

*8) The maximum radial load that the gearbox can accept

*9) The maximum axial load that the gearbox can accept

*10) The efficiency at the nominal output torque rating

*11) This does not include lost motion

*12) Contact Nidec Drive Technology for the testing conditions and environment

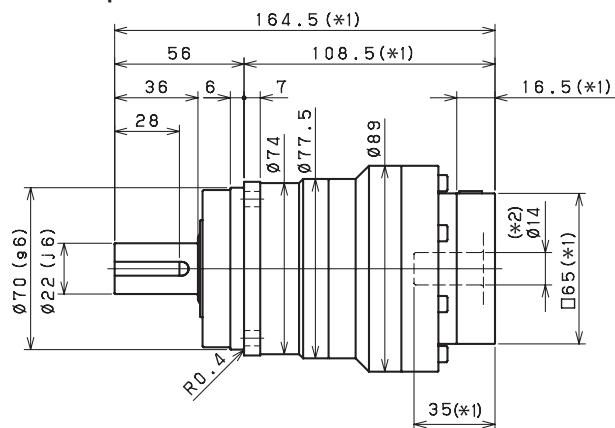

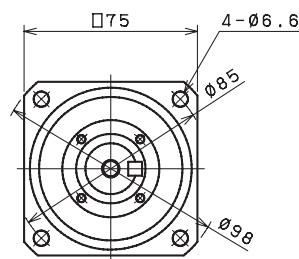

*13) IP65 (wash-down) is available as an option. Contact Nidec Drive Technology for more details

*14) Weight may vary slightly between models

*1) At nominal input speed, service life is 20,000 hours

*2) The maximum torque when starting or stopping operation. Apply Cycle Factor f_0 , found on page 468, for higher duty cycle applications

*3) Permitted 10,000 times during service life. Based on 10% of maximum radial load and smooth output shaft

*4) The maximum torque allowed under a stress situation. Permitted 1,000 times during service life

*5) The average input speed at nominal input torque. Maintain housing temperature below permitted value

*6) The maximum intermittent input speed

*7) Torque at no load applied to the input shaft at nominal input speed

*8) The maximum radial load that the gearbox can accept

*9) The maximum axial load that the gearbox can accept

*10) The efficiency at the nominal output torque rating

*11) This does not include lost motion

*12) Contact Nidec Drive Technology for the testing conditions and environment

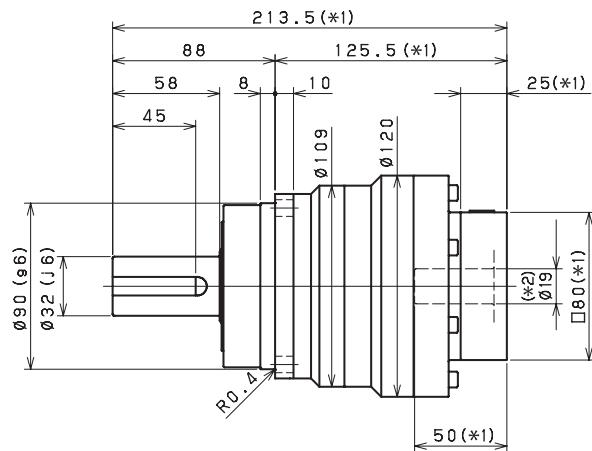

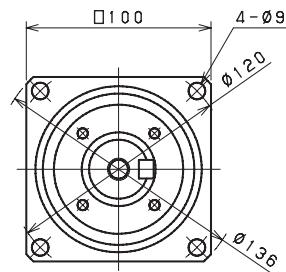

*13) IP65 (wash-down) is available as an option. Contact Nidec Drive Technology for more details

*14) Weight may vary slightly between models

VRT SERIES

The VRT series sets the new standard in applications requiring extremely high torque density and rigidity. Its compact design and robotic industry ISO flange is ideal for equipment requiring high speed, high precision indexing movement and streamlined installation. The remarkable torsional stiffness and ultra low backlash combine to provide outstanding positioning accuracy.

This product comes standard with <3 arc-min backlash, but is also available with reduced options down to <1 arc-min. The VRT is the most robust planetary solution in the marketplace and is used across a numerous range of applications including 7th axis robot shuttles, dial tables, end of arm tooling and any other axis where installation space, reduced assembly time and torque density play an important role.

	Relative Cost	Load Capacity	Duty Cycle	Positional Accuracy
Optimal	High	Medium	Low	Medium
Exceptional	Medium	High	Medium	High
Suitable	Low	Medium	High	Low

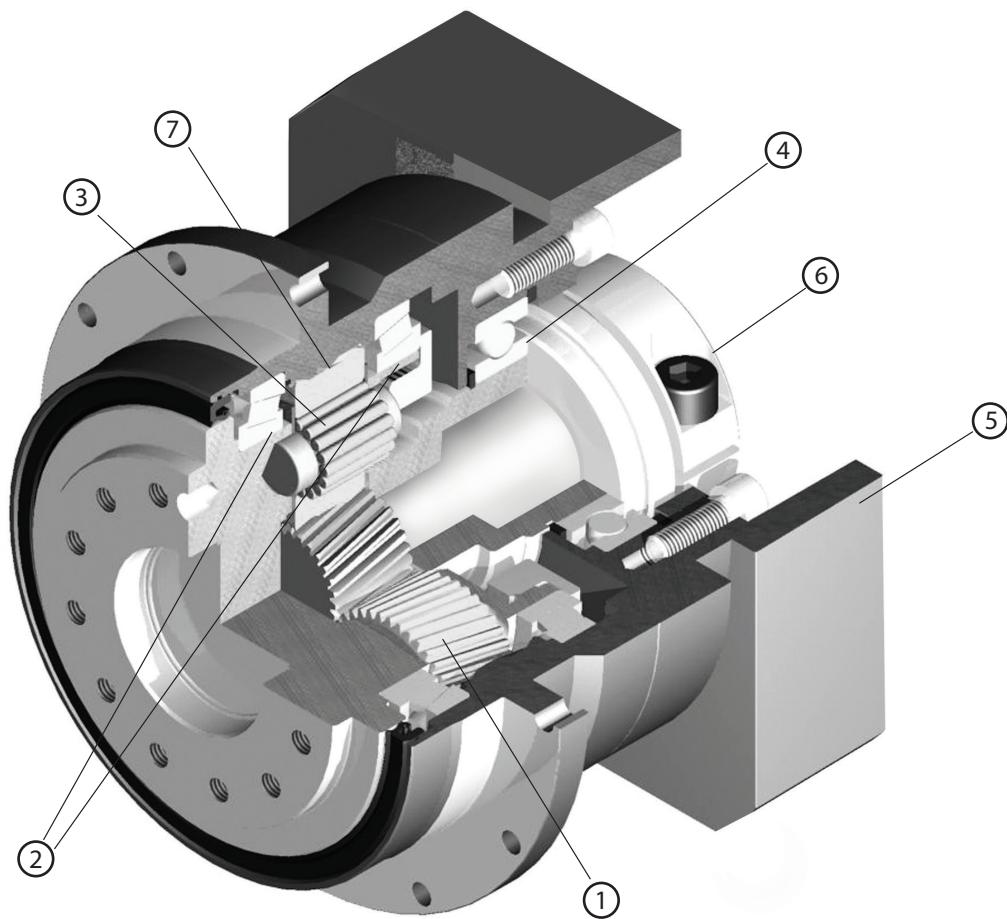

VRT SERIES

- The most compact and robust option for machine builders. Tapered roller bearings allow for high radial and axial loading
- ISO robotic mounting interface for superior flexibility and direct mounting of pinions, pulleys and turntables
- Exceptional torsional rigidity for high positional accuracy needs
- Best-In-class standard backlash (≤ 3 arc-min) with reduced backlash options available
- Broad range of mounting adapters offer a simple, precise attachment to any motor
- Maintenance-free solution that is lubricated for life. High performance grease allows flexible mounting in any orientation

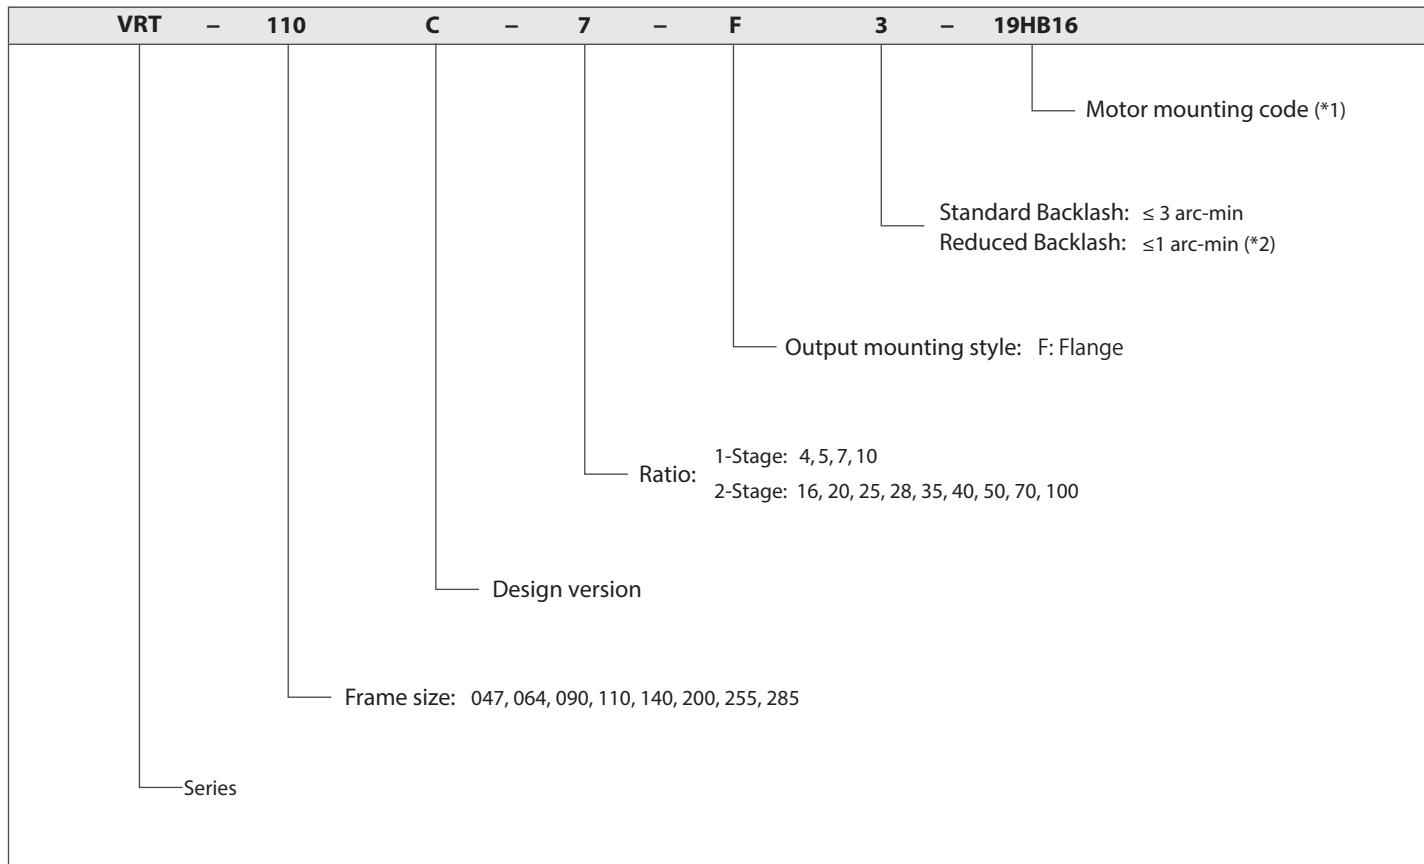

VRT SERIES Inline Planetary

VRT Series Features

- ① Carburized helical gears with proprietary secondary finishing process for higher accuracy and smooth, quiet operation
- ② One piece output shaft and planet carrier with two robust tapered bearings straddling the planet gears. Higher radial/axial load capacity, stiffness, torque density and safety factor, with guaranteed alignment of gearing
- ③ Uncaged needle roller bearings provide excellent torque density and torsional rigidity
- ④ Unique labyrinth input seal design greatly reduces heat and increases system efficiency. IP65 protection is available for wash down applications
- ⑤ Optimized mounting system with active centering on motor pilot diameter guarantees alignment of motor. Motor can be installed in any orientation
- ⑥ True concentric motor shaft clamping connection, optimized for your specific motor. Reduced inertia for dynamic performance and balanced for high speed operation
- ⑦ Ring gear machined directly into the housing, not welded or pressed in. Provides greater concentricity and elimination of speed fluctuation

VRT Series Model Code

*1) Motor mounting code varies depending on the motor. Use the selection tool link below to configure the code.

*2) Sizes 090/110/140/200 Only

Contact us for additional information or refer to our online gearbox selection tool.
 Selection tool <https://www.nidec-drivetechnology.co.jp/selection/all/>

The screenshot shows the Nidec Servo Reducer Selection Tool interface, which consists of four main steps:

- Step 1: Motor Selection** - Shows a search bar for "Motor Model" and a dropdown for "Reducer series".
- Step 2: Application Selection** - Shows a search bar for "Search reducer model" and a dropdown for "Series".
- Step 3: Detailed Reducer Series Selection** - A large table lists various reducer models (e.g., VRL-100B-B, VRL-100B-C, VRL-100B-D) with columns for "Shaft", "Flange", "Bevel", "Shaft/Flange", and "Shaft/Bevel". It includes filters for "Torque", "Reduction ratio", "Axial load", "Precision", "Speed", and "Weight".
- Step 4: Reducer Specification and Download** - Displays the selected model (VRL-100B-B) with detailed specifications like "Shaft diameter: 10mm", "Shaft length: 100mm", and "Shaft weight: 100g". It also provides download links for "Shaft dimensions" (PDF, DWG, STEP, IGES) and "Gear shaft" (PDF, DWG, STEP, IGES).

- *1) At nominal input speed, service life is 20,000 hours
- *2) The maximum torque when starting or stopping operation. Apply Cycle Factor f_0 , found on page 468, for higher duty cycle applications
- *3) Permitted 10,000 times during service life. Based on 10% of maximum radial load and smooth output shaft
- *4) The maximum torque allowed under a stress situation. Permitted 1,000 times during service life
- *5) The average input speed at nominal input torque. Maintain housing temperature below permitted value
- *6) The maximum intermittent input speed
- *7) Torque at no load applied to the input shaft at nominal input speed
- *8) The maximum radial load that the gearbox can accept
- *9) The maximum axial load that the gearbox can accept
- *10) The maximum load at output flange surface
- *11) The efficiency at the nominal output torque rating
- *12) This does not include lost motion
- *13) Contact Nidec Drive Technology for the testing conditions and environment
- *14) IP65 (wash-down) is available as an option. Contact Nidec Drive Technology for more details
- *15) Weight may vary slightly between models

*1) At nominal input speed, service life is 20,000 hours

*2) The maximum torque when starting or stopping operation. Apply Cycle Factor f_0 , found on page 468, for higher duty cycle applications

*3) Permitted 10,000 times during service life. Based on 10% of maximum radial load and smooth output shaft

*4) The maximum torque allowed under a stress situation. Permitted 1,000 times during service life

*5) The average input speed at nominal input torque. Maintain housing temperature below permitted value

*6) The maximum intermittent input speed

*7) Torque at no load applied to the input shaft at nominal input speed

*8) The maximum radial load that the gearbox can accept

*9) The maximum axial load that the gearbox can accept

*10) The maximum load at output flange surface

*11) The efficiency at the nominal output torque rating

*12) This does not include lost motion

*13) Contact Nidec Drive Technology for the testing conditions and environment

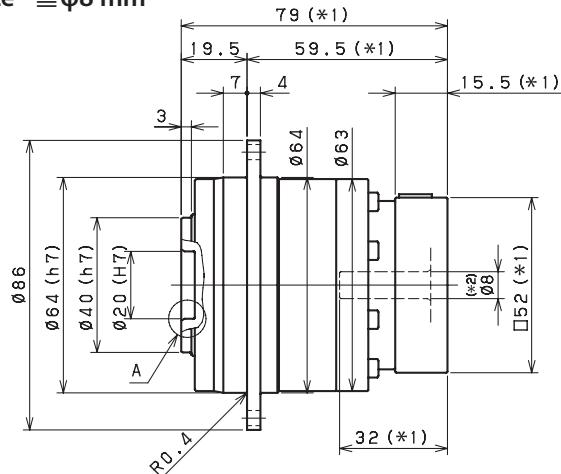

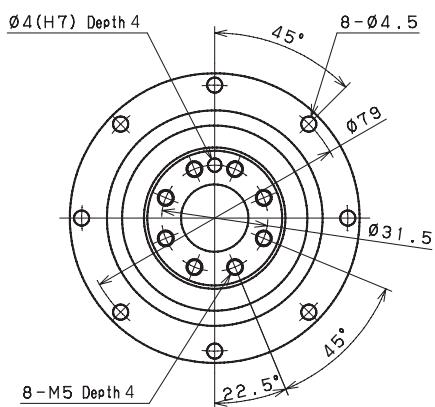

*14) IP65 (wash-down) is available as an option. Contact Nidec Drive Technology for more details

*15) Weight may vary slightly between models

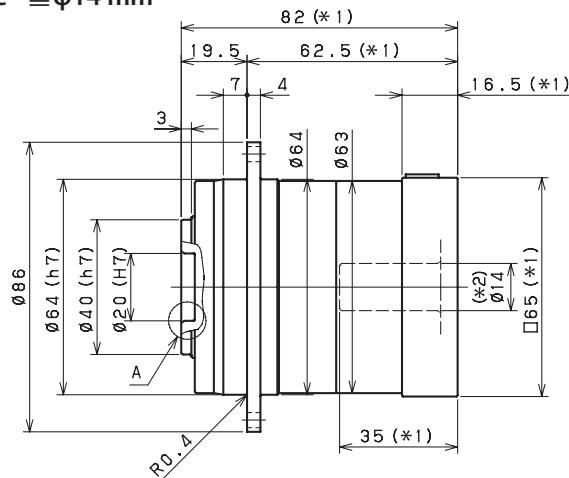

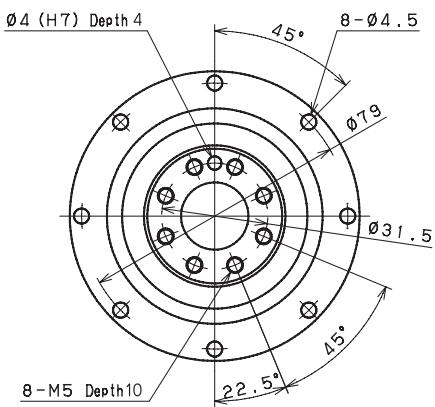

VRT SERIES Inline Planetary

VRT 110 1-Stage Dimensions

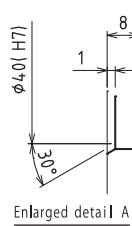

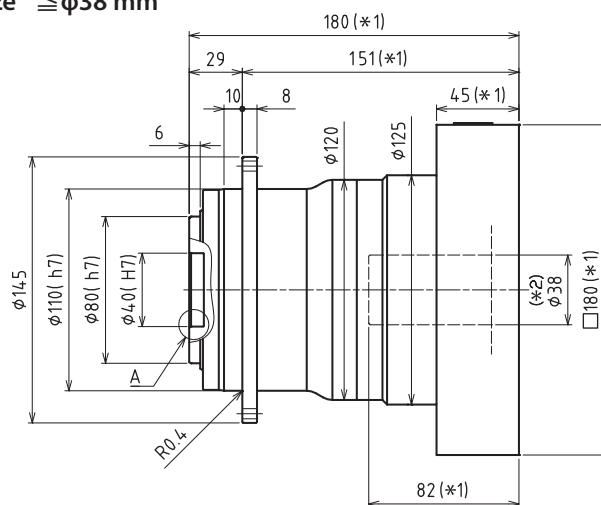

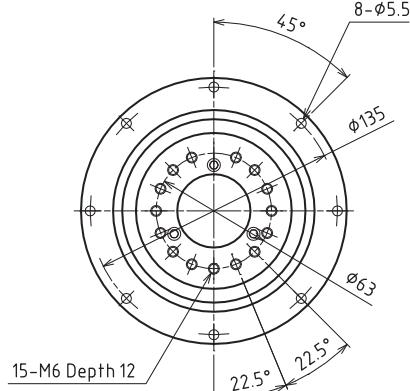

Input bore size $\leq \varnothing 19\text{ mm}$

Input bore size $\leq \varnothing 28\text{ mm}$

Input bore size $\leq \varnothing 38$ mm

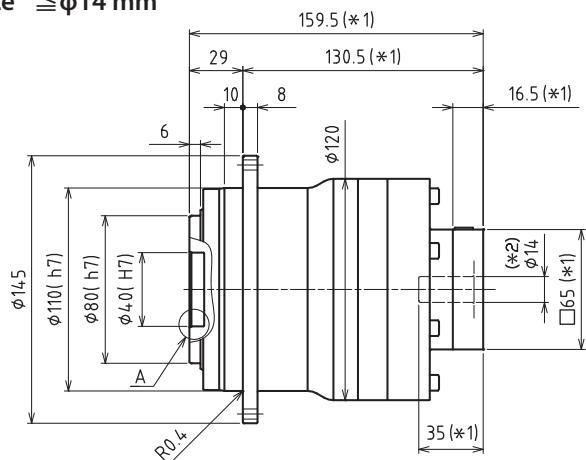

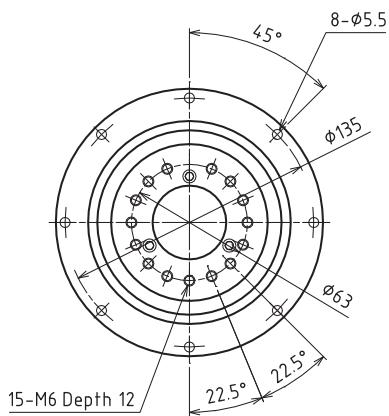

*1) Length will vary depending on motor

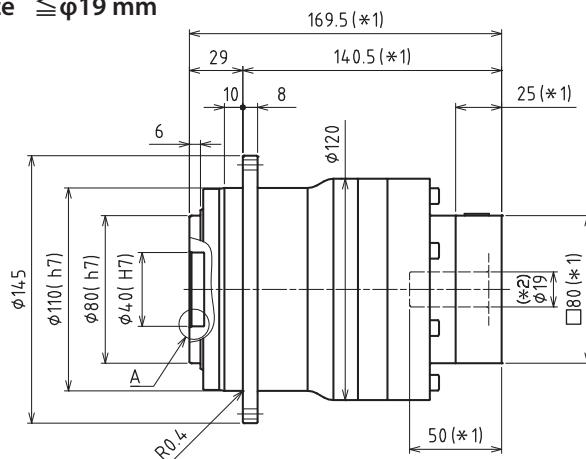

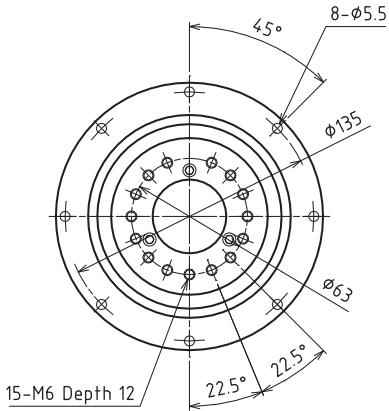

*2) Bushing will be inserted to adapt to motor shaft

VRT 110 2-Stage Dimensions

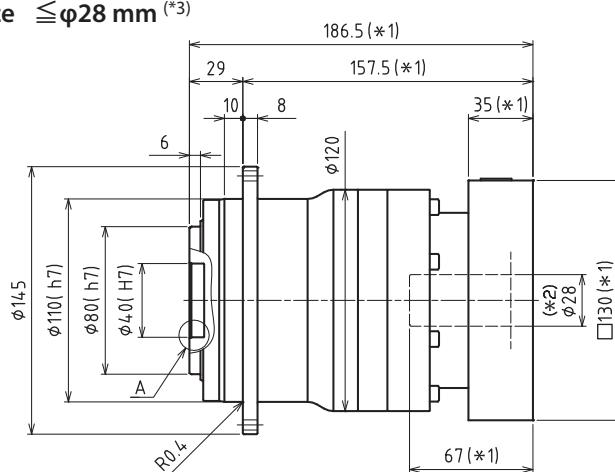

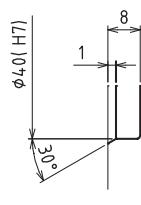

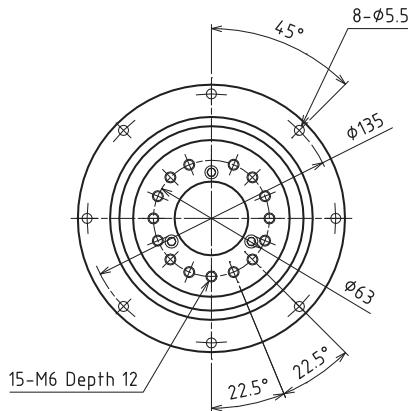

Input bore size $\leq \phi 14$ mm

Input bore size $\leq \phi 19$ mm

Input bore size $\leq \phi 28$ mm (*3)

*1) Length will vary depending on motor

*2) Bushing will be inserted to adapt to motor shaft

*3) 38mm input bore is available for this frame size. Use our online configurator to make your selection or contact us for assistance

*1) At nominal input speed, service life is 20,000 hours

*2) The maximum torque when starting or stopping operation. Apply Cycle Factor f_0 , found on page 468, for higher duty cycle applications

*3) Permitted 10,000 times during service life. Based on 10% of maximum radial load and smooth output shaft

*4) The maximum torque allowed under a stress situation. Permitted 1,000 times during service life

*5) The average input speed at nominal input torque. Maintain housing temperature below permitted value

*6) The maximum intermittent input speed

*7) Torque at no load applied to the input shaft at nominal input speed

*8) The maximum radial load that the gearbox can accept

*9) The maximum axial load that the gearbox can accept

*10) The maximum load at output flange surface

*11) The efficiency at the nominal output torque rating

*12) This does not include lost motion

*13) Contact Nidec Drive Technology for the testing conditions and environment

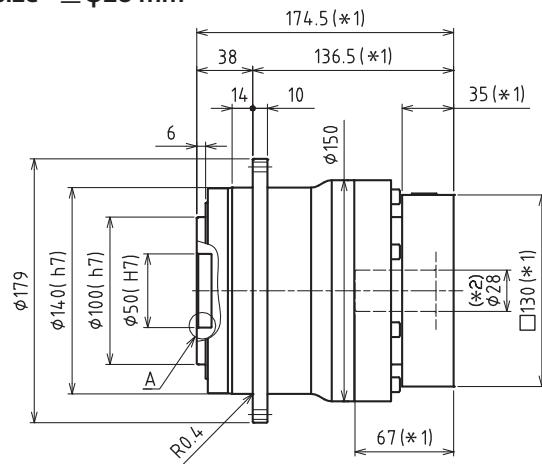

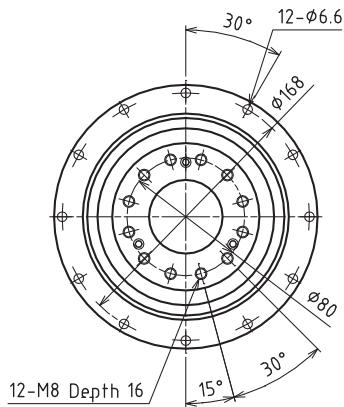

*14) IP65 (wash-down) is available as an option. Contact Nidec Drive Technology for more details

*15) Weight may vary slightly between models

Enlarged detail A

NEV SERIES

The NEV right angle gearbox is the ideal solution for servo or stepper applications running primarily in one direction. With 30 arc-minute backlash, the NEV is an excellent cost-effective, compact choice for applications such as conveyors, where positioning is not as critical. The NEV is often used in situations where our customers upgrade induction duty motors to servos. The price point of this product helps OEMs control costs, especially when updating several axes on one machine. The performance, efficiency and footprint of the NEV allows it to outperform helical bevel or worm gearboxes in a similar class.

The NEV has a lightweight aluminum frame with either a hollow or solid output shaft configuration. It can handle motors ranging between 50W and 3.5kW, achieving nominal output torque ratings ranging between 6 Nm to 90 Nm. Four frame sizes and ratios between 5:1 and 105:1 are available, as well as various wash down options, making this product ideal for applications in food & beverage.

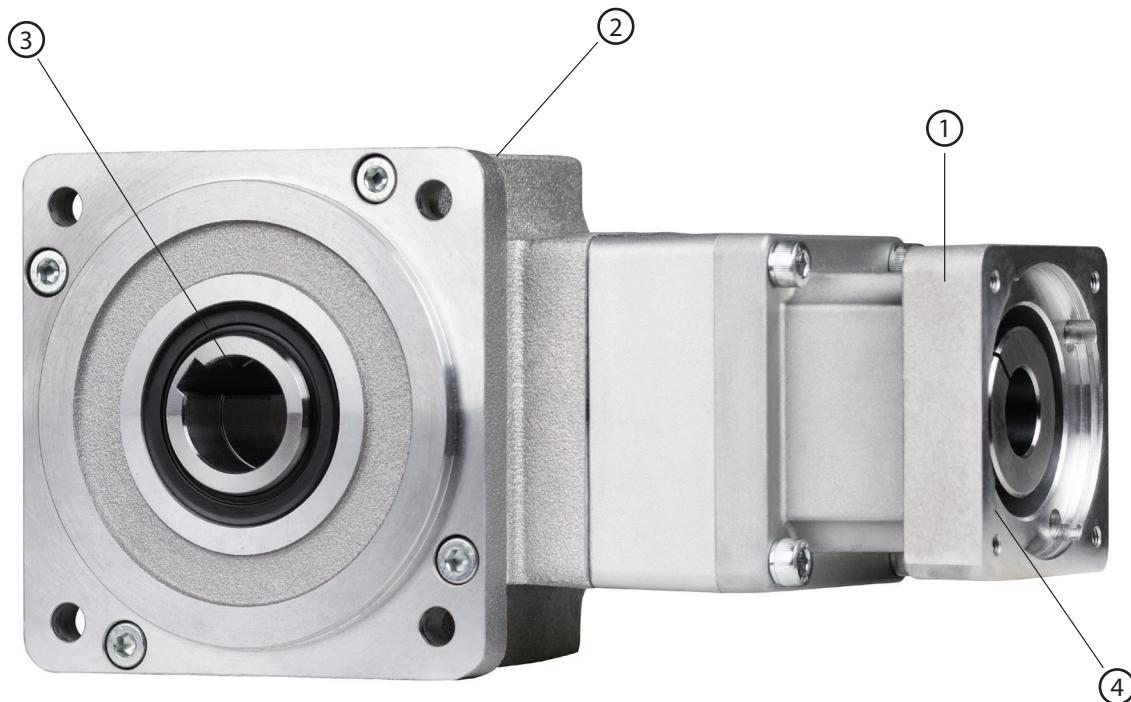

NEV SERIES

- Hollow output shaft option gives machine builders a very compact foot print
- Value engineered solution for simple servo and stepper motor applications
- Quiet operation: Helical cut gears contribute to reduced vibration and noise
- Wide range of mounting adapters offer a simple, precise attachment to any motor
- Lightweight aluminum body reduces excess weight
- Aluminum body, combined with other wash-down features can be used in harsh environments
- Maintenance-free solution that is lubricated for life. High performance grease allows flexible mounting in any orientation

NEV SERIES Right-angle Planetary

NEV Series Features

- ① Motor adapter allows for flexible mounting to any motor manufacturer
- ② Lightweight aluminum body, an excellent fit for washdown applications
- ③ Hollow or solid output shaft options
- ④ Input seal provides IP65 protection against the elements

EVL SERIES

The right angle equivalent to the VRL series, the EVL provides our customers with an excellent solution when space and clearance are a serious limitation. Helical planetary gears team up with spiral bevel gears to provide a product with robust internal construction, smooth operation and high torque density. 6 arc-min backlash allows the VRL to be applied to a wide range of applications where accuracy and dynamics are in play, but cost is of concern.

The EVL is a solid choice for servo applications in packaging, handling and automation systems. A variety of standard wash down and food grade options are available, making it an attractive option for the toughest environments. We offer the broadest selection of frame sizes and ratios, giving our customers more flexibility than ever before. Industry standard mounting dimensions allow the EVL to be implemented in legacy machine designs, saving our customers valuable time.

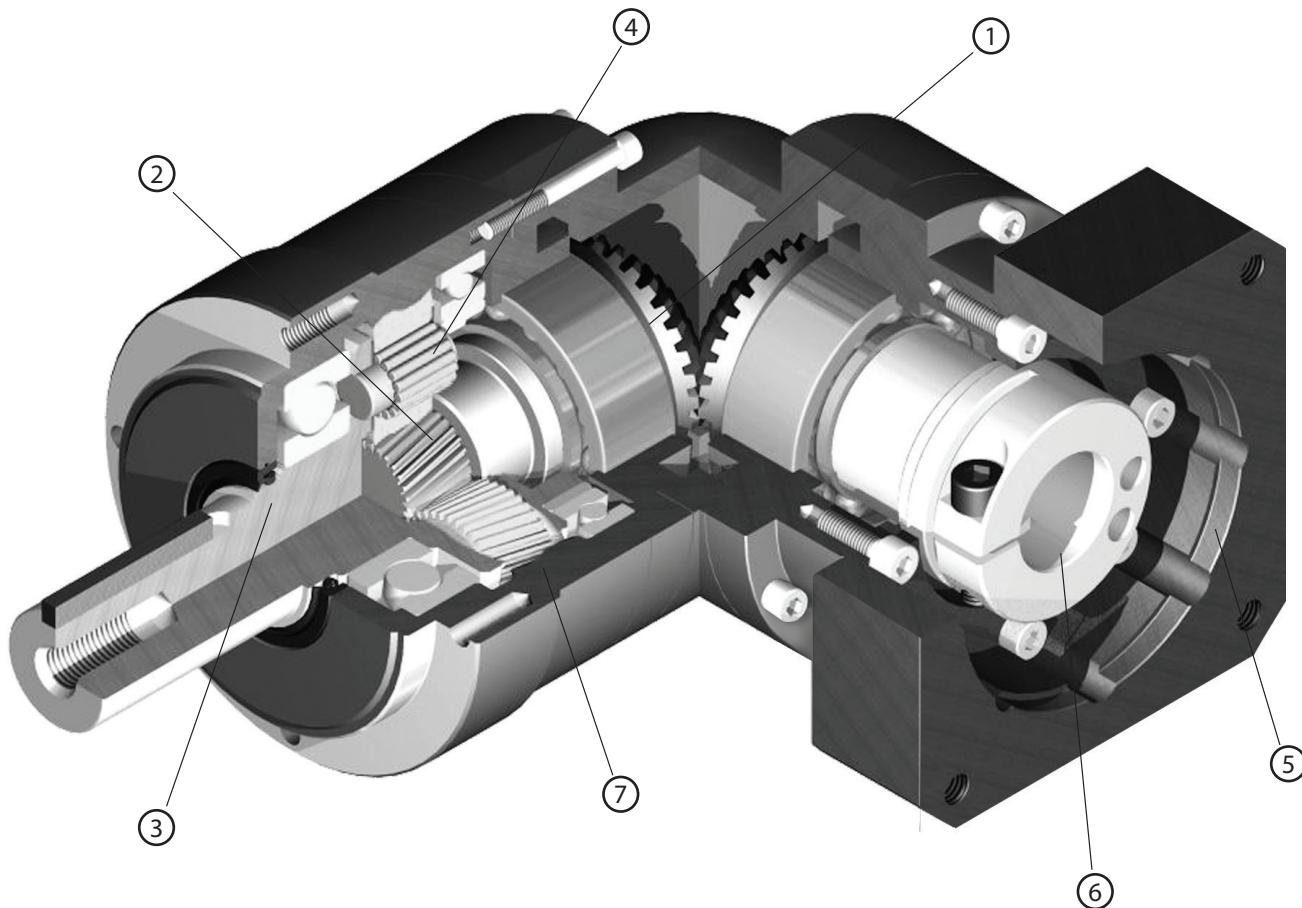

EVL SERIES

- Compact, space-saving solution for mid to high end motion control applications
- The widest range of frame sizes and ratios available in the market
- Best-In-class backlash (≤ 6 arc-min)
- Broad range of mounting adapters offer a simple, precise attachment to any motor
- Maintenance-free solution that is lubricated for life. High performance grease allows flexible mounting in any orientation
- Industry standard mounting dimensions
- Assembled in the USA

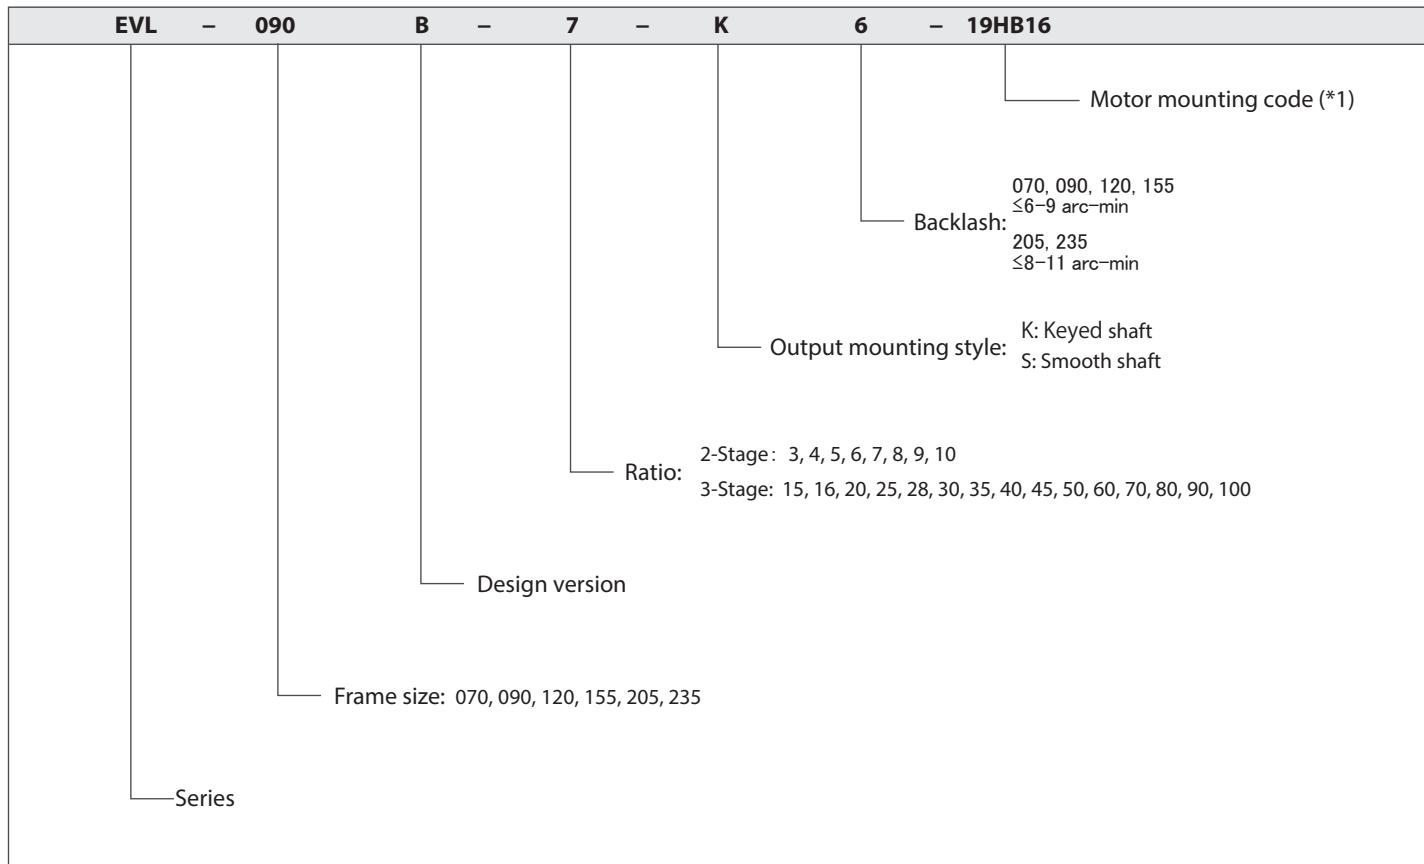

EVL SERIES Right-angle Planetary

EVL Series Features

- ① Right angle bevel gear configuration allows motor to be mounted at a 90 degree position from the gearbox, saving space
- ② Carburized helical gears with proprietary secondary finishing process for higher accuracy and smooth, quiet operation. 40% higher tooth surface area than the industry standard
- ③ One piece output shaft and planet carrier with two bearings straddling the planet gears. Higher stiffness, torque capacity and safety factor, with guaranteed alignment of gearing
- ④ Uncaged needle roller bearings provide excellent torque density and torsional rigidity. 43% larger bearing surface area compared to the rest of the industry
- ⑤ Optimized mounting system with active centering on motor pilot diameter guarantees alignment of motor. Motor can be installed in any orientation
- ⑥ True concentric motor shaft clamping connection, optimized for your specific motor. Reduced inertia for dynamic performance and balanced for high speed operation
- ⑦ Ring gear machined directly into the housing, not welded or pressed in. Provides greater concentricity and elimination of speed fluctuation

EVL Series Model Code

*1) Motor mounting code varies depending on the motor. Use the selection tool link below to configure the code.

Contact us for additional information or refer to our online gearbox selection tool.
 Selection tool <https://www.nidec-drivetechnology.co.jp/selection/all/>

The screenshot shows the Nidec Servo Reducer Selection Tool interface, which consists of four main windows:

- Top Left Window:** Shows the selection flow: "Make a selection from the motor list" (with icons for motor and frame), "Selection flow: Choose motor > Choose series, ratio > Choose frame size > Complete".
- Top Right Window:** Shows the selection flow: "Make a selection from load condition" (with icons for load and frame), "Selection flow: Series information > Input load condition > Choose frame size > Choose motor > Complete".
- Middle Left Window:** Shows the "Application selection" section with icons for gear and shaft, and the "Search reducer model" section with icons for gear and shaft.
- Middle Right Window:** Shows the "Detailed reducer series" table with columns for Series (VRB, VRL, VRG, VRFB), Appearance (Shaft, Flange, Bevel, Gearbox), and various performance parameters like Torque, Speed, and Weight.
- Bottom Right Window:** Shows the "Reduced Gearbox: Motor Series 1.0" configuration, including "Attached motor" (AUTOMATION DIRECT), "Motor specification" (Torque: 0.05 Nm, Speed: 1000 rpm), "Shaft dimensions" (Shaft dia: 10 mm, Shaft center: 40 mm), and "Download dimensions" (PDF, DWG, STEP, IGES).

*1) At nominal input speed, service life is 20,000 hours

*2) The maximum torque when starting or stopping operation. Apply Cycle Factor f_0 , found on page 468, for higher duty cycle applications

*3) Permitted 10,000 times during service life. Based on 10% of maximum radial load and smooth output shaft

*4) The maximum torque allowed under a stress situation. Permitted 1,000 times during service life

*5) The average input speed at nominal input torque. Maintain housing temperature below permitted value

*6) The maximum intermittent input speed

*7) Torque at no load applied to the input shaft at nominal input speed

*8) The maximum radial load that the gearbox can accept

*9) The maximum axial load that the gearbox can accept

*10) The efficiency at the nominal output torque rating

*11) This does not include lost motion

*12) Contact Nidec Drive Technology for the testing conditions and environment

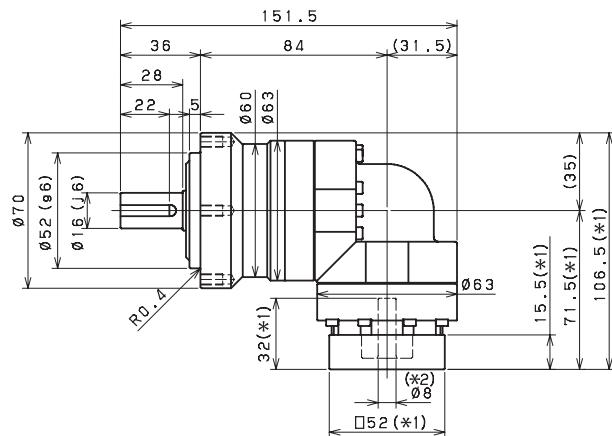

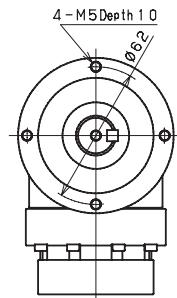

*13) Various wash-down options are available. Contact Nidec Drive Technology for more details

*14) Weight may vary slightly between models

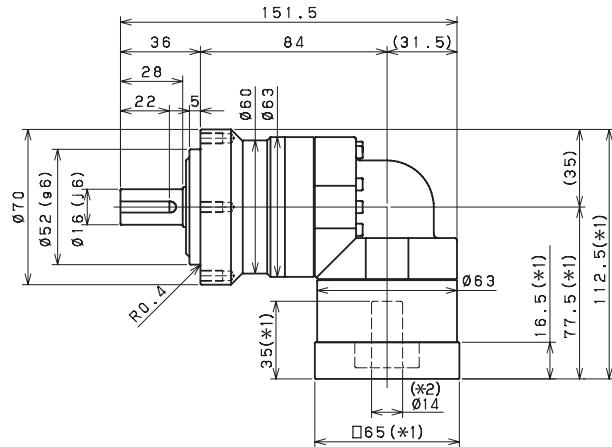

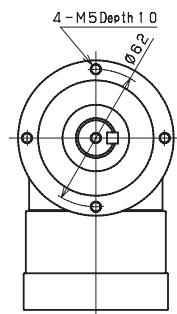

EVL SERIES Right-angle Planetary

EVL 070 2-Stage Dimensions

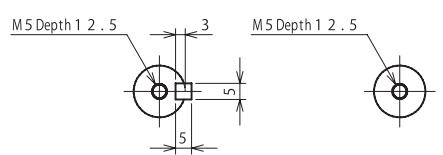

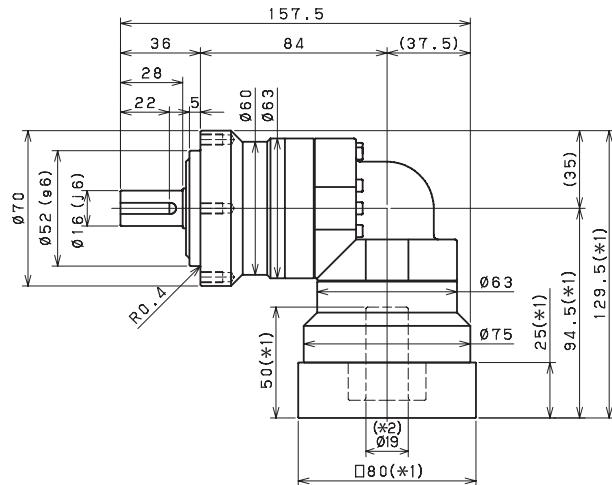

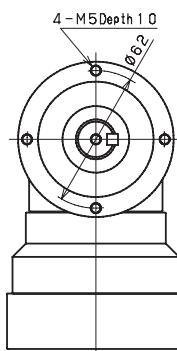

Input bore size $\leq \varphi 8\text{ mm}$

Input bore size $\leq \varphi 14\text{ mm}$

Input bore size $\leq \varphi 19\text{ mm}$

Keyed shaft

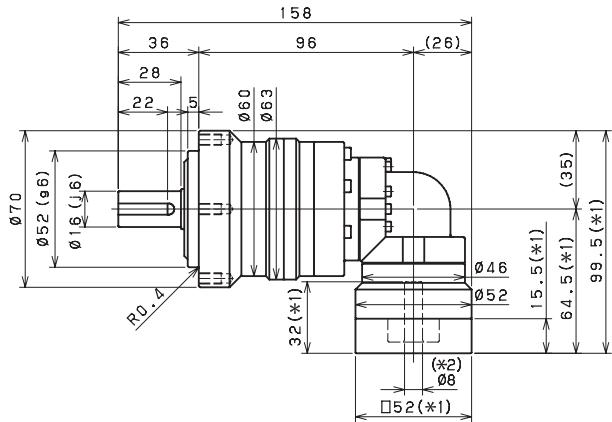

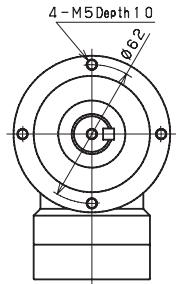

Smooth shaft

*1) Length will vary depending on motor

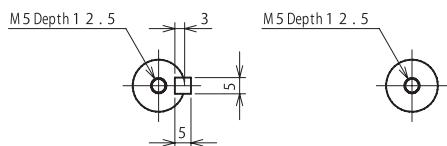

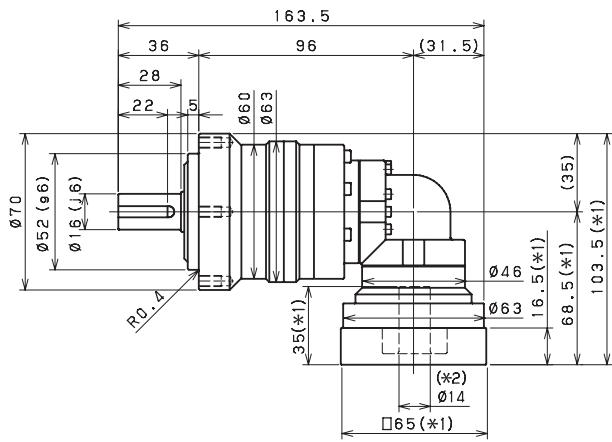

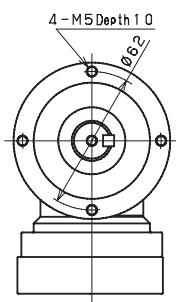

*2) Bushing will be inserted to adapt to motor shaft

*1) At nominal input speed, service life is 20,000 hours

*2) The maximum torque when starting or stopping operation. Apply Cycle Factor f_0 , found on page 468, for higher duty cycle applications

*3) Permitted 10,000 times during service life. Based on 10% of maximum radial load and smooth output shaft

*4) The maximum torque allowed under a stress situation. Permitted 1,000 times during service life

*5) The average input speed at nominal input torque. Maintain housing temperature below permitted value

*6) The maximum intermittent input speed

*7) Torque at no load applied to the input shaft at nominal input speed

*8) The maximum radial load that the gearbox can accept

*9) The maximum axial load that the gearbox can accept

*10) The efficiency at the nominal output torque rating

*11) This does not include lost motion

*12) Contact Nidec Drive Technology for the testing conditions and environment

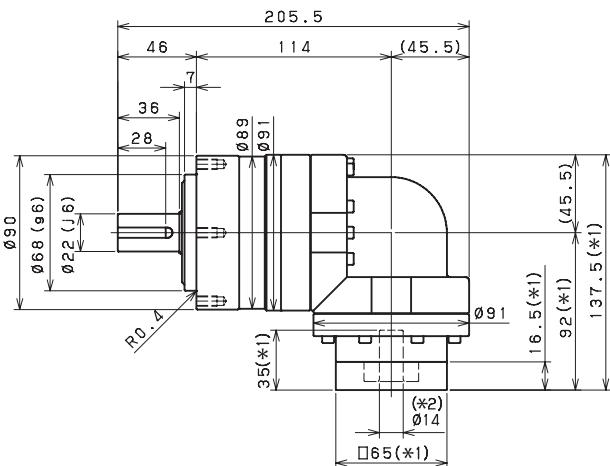

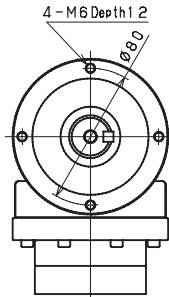

*13) Various wash-down options are available. Contact Nidec Drive Technology for more details

*14) Weight may vary slightly between models

EVB

EVB SERIES

- Compact, space-saving solution for mid to high end motion control applications
- The widest range of frame sizes and ratios available in the market
- Best-In-class backlash (≤ 4 arc-min)
- Broad range of mounting adapters offer a simple, precise attachment to any motor
- Maintenance-free solution that is lubricated for life. High performance grease allows flexible mounting in any orientation
- Industry standard mounting dimensions
- Assembled in the USA

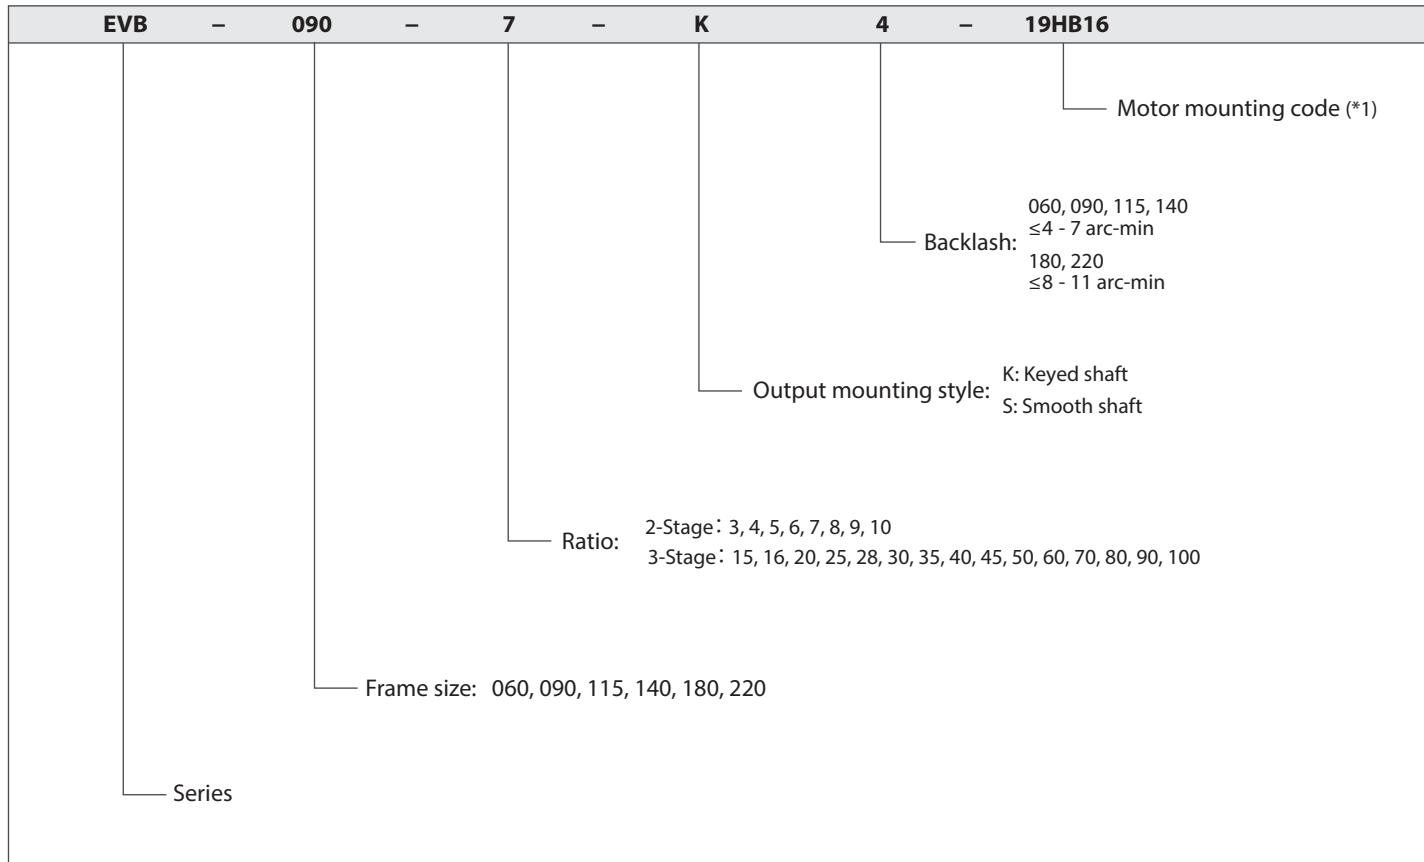

EVB SERIES Right-angle Planetary

EVB Series Features

- ① Right angle bevel gear configuration allows motor to be mounted at a 90 degree position from the gearbox, saving space
- ② Carburized helical gears with proprietary secondary finishing process for higher accuracy and smooth, quiet operation. 40% higher tooth surface area than the industry standard
- ③ One piece output shaft and planet carrier with two bearings straddling the planet gears. Higher stiffness, torque capacity and safety factor, with guaranteed alignment of gearing
- ④ Uncaged needle roller bearings provide excellent torque density and torsional rigidity. 43% larger bearing surface area compared to the rest of the industry
- ⑤ Optimized mounting system with active centering on motor pilot diameter guarantees alignment of motor. Motor can be installed in any orientation
- ⑥ True concentric motor shaft clamping connection, optimized for your specific motor. Reduced inertia for dynamic performance and balanced for high speed operation
- ⑦ Ring gear machined directly into the housing, not welded or pressed in. Provides greater concentricity and elimination of speed fluctuation

EVB Series Model Code

*1) Motor mounting code varies depending on the motor. Use the selection tool link below to configure the code.

Contact us for additional information or refer to our online gearbox selection tool.
 Selection tool <https://www.nidec-drivetechnology.co.jp/selection/all/>

The screenshot shows the Nidec Servo Reducer Selection Tool interface, which consists of three main windows:

- Left Window:** Shows the selection process: "Make a selection from the motor list" (with a VRV model shown), "Make a selection from load condition" (with a VRV model shown), "Application selection" (with a VRV model shown), and "Search reducer model" (with a VRV model shown).
- Middle Window:** Shows the "Choose Motor" screen. It includes fields for "Motor Manufacturer" (Nidec), "Motor Model" (VRV-100B-8), and "Reducer series" (VRV). It also lists "Detailed reducer series" for VRV, VRT, VRB, VR, VRG, and VRBT models, each with various options like "Shaft", "Flange", "Shaft", "Shaft", "Shaft/Flange", and "Shaft".
- Right Window:** Shows the "Reducer model" screen. It displays the selected "VRV-100B-8" and "VRV-100B-8" again. It includes sections for "Reducer specification" (with details like Ratio: 8, Motor output torque: 27 Nm, etc.) and "Motor specification" (with details like Capacity: 0.75 kW, Motor torque: 27 Nm, etc.). It also shows "Download dimensions" and "Growth chart" buttons.

*1) At nominal input speed, service life is 20,000 hours

*2) The maximum torque when starting or stopping operation. Apply Cycle Factor f_0 , found on page 468, for higher duty cycle applications

*3) Permitted 10,000 times during service life. Based on 10% of maximum radial load and smooth output shaft

*4) The maximum torque allowed under a stress situation. Permitted 1,000 times during service life

*5) The average input speed at nominal input torque. Maintain housing temperature below permitted value

*6) The maximum intermittent input speed

*7) Torque at no load applied to the input shaft at nominal input speed

*8) The maximum radial load that the gearbox can accept

*9) The maximum axial load that the gearbox can accept

*10) The efficiency at the nominal output torque rating

*11) This does not include lost motion

*12) Contact Nidec Drive Technology for the testing conditions and environment

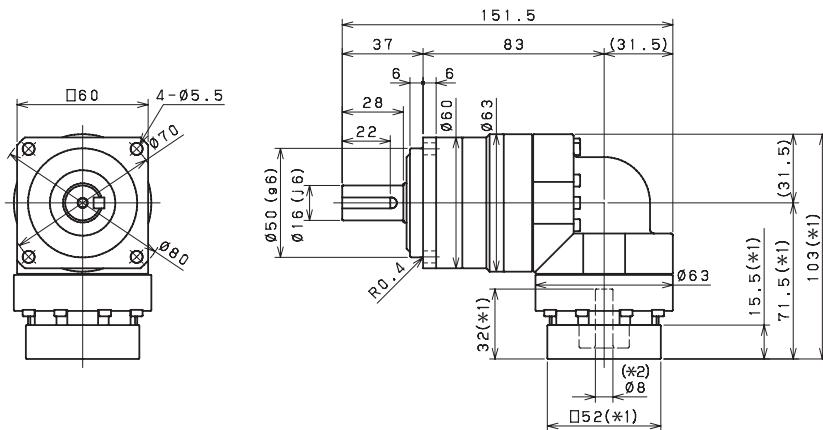

*13) Various wash-down options are available. Contact Nidec Drive Technology for more details

*14) Weight may vary slightly between models

*1) At nominal input speed, service life is 20,000 hours

*2) The maximum torque when starting or stopping operation. Apply Cycle Factor f_0 , found on page 468, for higher duty cycle applications

*3) Permitted 10,000 times during service life. Based on 10% of maximum radial load and smooth output shaft

*4) The maximum torque allowed under a stress situation. Permitted 1,000 times during service life

*5) The average input speed at nominal input torque. Maintain housing temperature below permitted value

*6) The maximum intermittent input speed

*7) Torque at no load applied to the input shaft at nominal input speed

*8) The maximum radial load that the gearbox can accept

*9) The maximum axial load that the gearbox can accept

*10) The efficiency at the nominal output torque rating

*11) This does not include lost motion

*12) Contact Nidec Drive Technology for the testing conditions and environment

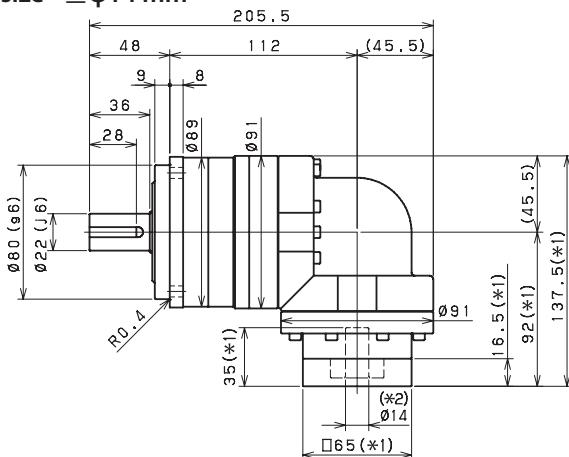

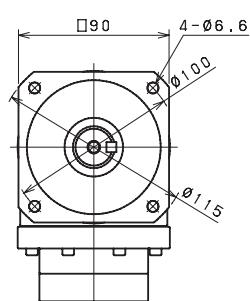

*13) Various wash-down options are available. Contact Nidec Drive Technology for more details

*14) Weight may vary slightly between models

EVS SERIES

The EVS series is the right angle equivalent to the VRS. Compact and precise, the EVS is the ideal solution for demanding positioning accuracy and speed requirements. Equipped with two rows of robust tapered roller bearings, the EVS runs smoothly and quietly even with the most challenging dynamic and static forces.

The EVS comes with ≤ 4 arc-min backlash, to handle dynamic machine tool and robotic applications with ease. With maximum acceleration torques up to 2960Nm, this product is an excellent partner to higher capacity servomotor models. Our customers specify this product when the industry standard is simply not good enough.

	Relative Cost	Load Capacity	Duty Cycle	Positional Accuracy
Optimal	High	Medium	Low	Medium
Exceptional	Medium	High	Medium	High
Suitable	Low	Medium	High	Low

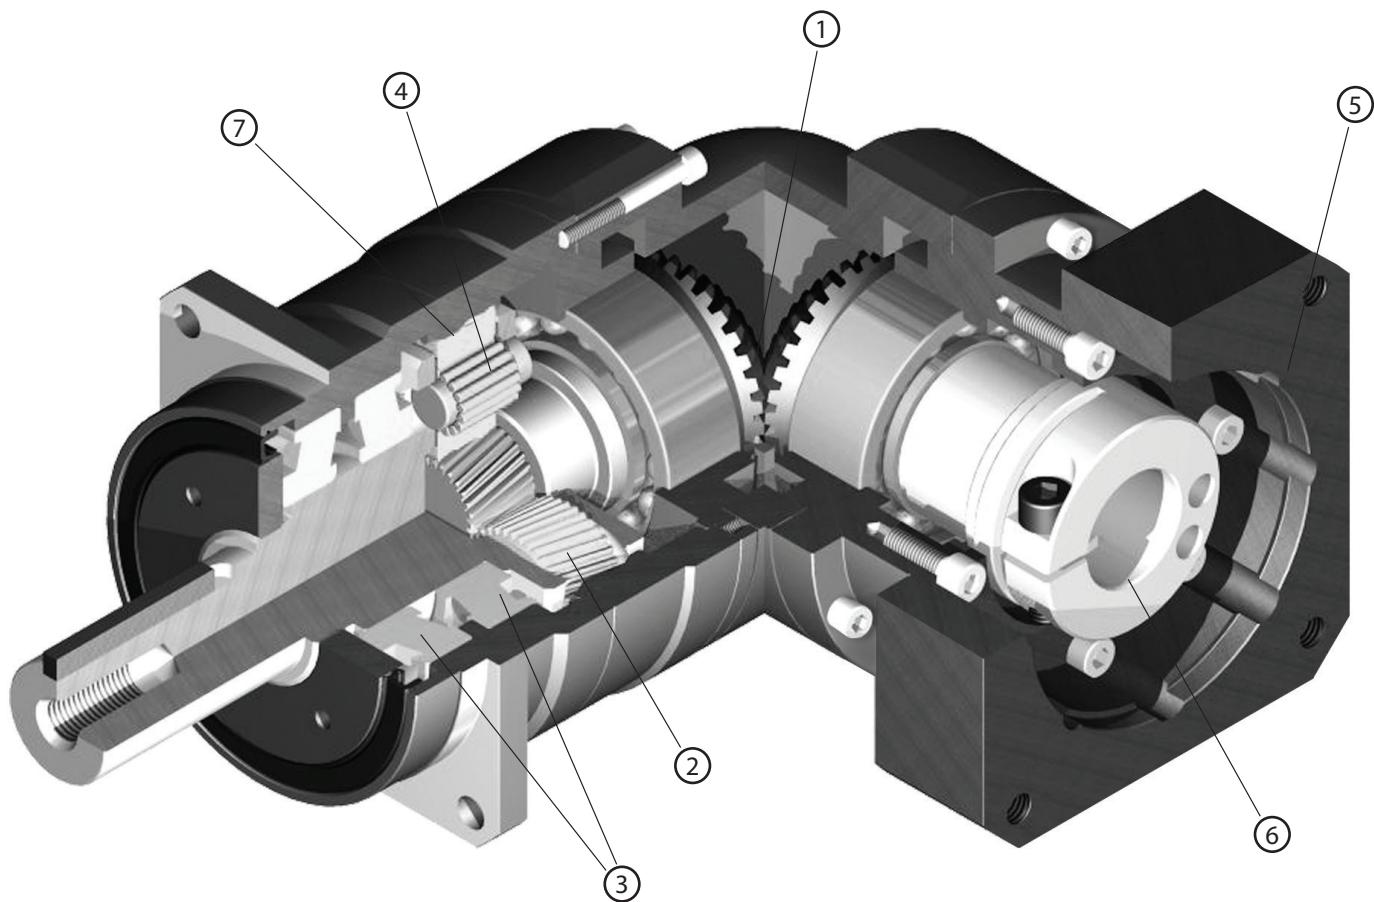

EVS

EVS SERIES

- Proven performer in high end motion control applications with demanding accuracy requirements
- Excellent fit for difficult overhung load situations with a limited space envelope
- The widest range of frame sizes and ratios available in the market
- Best-In-class standard backlash of ≤ 4 arc-min
- Broad range of mounting adapters offer a simple, precise attachment to any motor
- Maintenance-free solution that is lubricated for life. High performance grease allows flexible mounting in any orientation
- Industry standard through-bolt mounting style

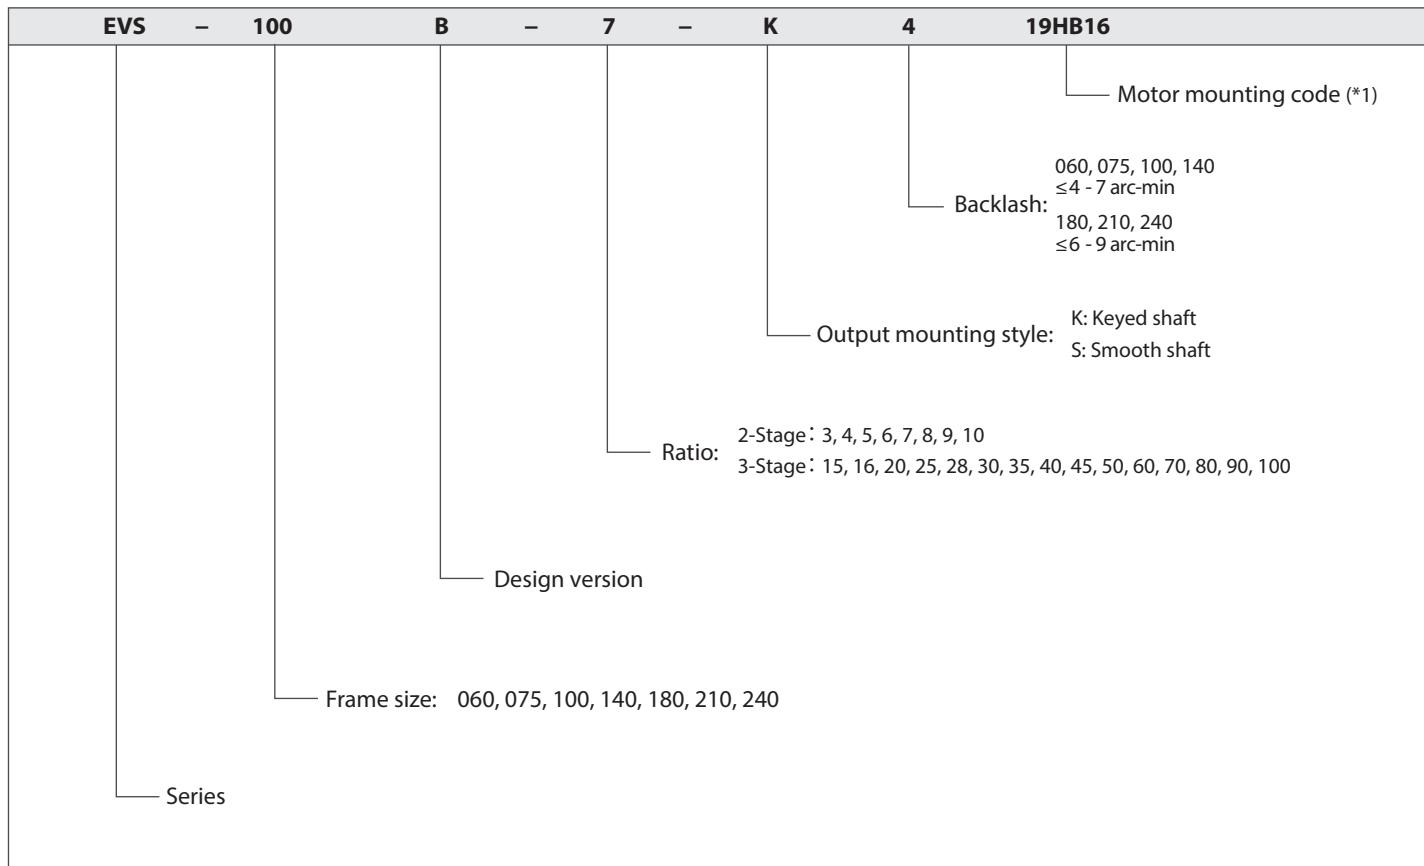

EVS SERIES Right-angle Planetary

EVS Series Features

- ① Right angle bevel gear configuration allows motor to be mounted at a 90 degree position from the gearbox, saving space
- ② Carburized helical gears with proprietary secondary finishing process for higher accuracy and smooth, quiet operation
- ③ One piece output shaft and planet carrier with dual tapered roller bearings. Higher stiffness, torque capacity and safety factor, with guaranteed alignment of gearing
- ④ Uncaged needle roller bearings provide excellent torque density and torsional rigidity
- ⑤ Optimized mounting system with active centering on motor pilot diameter guarantees alignment of motor. Motor can be installed in any orientation
- ⑥ True concentric motor shaft clamping connection, optimized for your specific motor. Reduced inertia for dynamic performance and balanced for high speed operation
- ⑦ Ring gear machined directly into the housing, not welded or pressed in. Provides greater concentricity and elimination of speed fluctuation

EVS Series Model Code

*1) Motor mounting code varies depending on the motor. Use the selection tool link below to configure the code.

Contact us for additional information or refer to our online gearbox selection tool.
[Selection tool https://www.nidec-drivetechnology.co.jp/selection/all/](https://www.nidec-drivetechnology.co.jp/selection/all/)

The screenshot shows the three-step process of the Servo Reducer Selection Tool:

- Step 1: Motor Selection**
 - Make a selection from the motor list.
 - Choose motor > Choose series, ratio > Choose frame size > Complete.
- Step 2: Application Selection**
 - Make a selection from load condition.
 - Series information > Input load condition > Choose frame size > Choose motor > Complete.
- Step 3: Reducer Selection**
 - Select reducer model > Search reducer model.
 - Detailed reducer series:

*1) At nominal input speed, service life is 20,000 hours

*2) The maximum torque when starting or stopping operation. Apply Cycle Factor f_0 , found on page 468, for higher duty cycle applications

*3) Permitted 10,000 times during service life. Based on 10% of maximum radial load and smooth output shaft

*4) The maximum torque allowed under a stress situation. Permitted 1,000 times during service life

*5) The average input speed at nominal input torque. Maintain housing temperature below permitted value

*6) The maximum intermittent input speed

*7) Torque at no load applied to the input shaft at nominal input speed

*8) The maximum radial load that the gearbox can accept

*9) The maximum axial load that the gearbox can accept

*10) The efficiency at the nominal output torque rating

*11) This does not include lost motion

*12) Contact Nidec Drive Technology for the testing conditions and environment

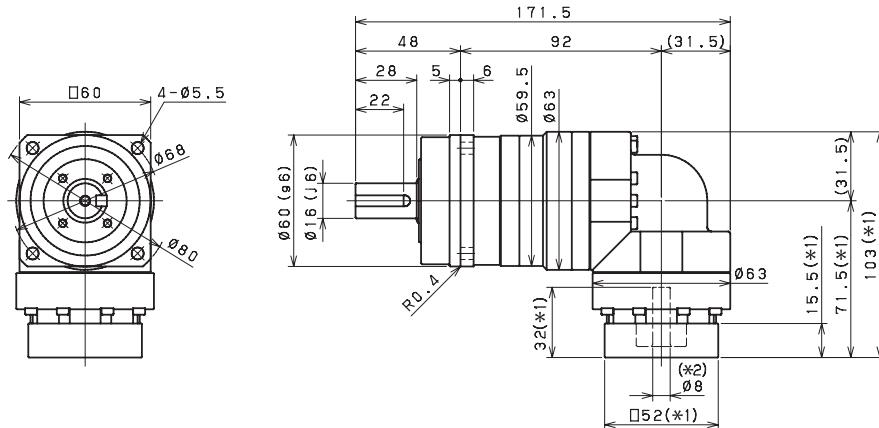

*13) Various wash-down options are available. Contact Nidec Drive Technology for more details

*14) Weight may vary slightly between models

*1) At nominal input speed, service life is 20,000 hours

*2) The maximum torque when starting or stopping operation. Apply Cycle Factor f_0 , found on page 468, for higher duty cycle applications

*3) Permitted 10,000 times during service life. Based on 10% of maximum radial load and smooth output shaft

*4) The maximum torque allowed under a stress situation. Permitted 1,000 times during service life

*5) The average input speed at nominal input torque. Maintain housing temperature below permitted value

*6) The maximum intermittent input speed

*7) Torque at no load applied to the input shaft at nominal input speed

*8) The maximum radial load that the gearbox can accept

*9) The maximum axial load that the gearbox can accept

*10) The efficiency at the nominal output torque rating

*11) This does not include lost motion

*12) Contact Nidec Drive Technology for the testing conditions and environment

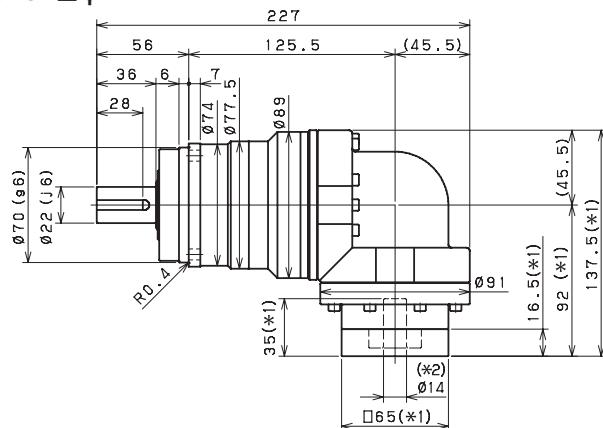

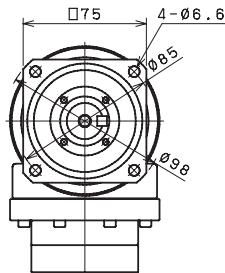

*13) Various wash-down options are available. Contact Nidec Drive Technology for more details

*14) Weight may vary slightly between models

*1) At nominal input speed, service life is 20,000 hours

*2) The maximum torque when starting or stopping operation. Apply Cycle Factor f_0 , found on page 468, for higher duty cycle applications

*3) Permitted 10,000 times during service life. Based on 10% of maximum radial load and smooth output shaft

*4) The maximum torque allowed under a stress situation. Permitted 1,000 times during service life

*5) The average input speed at nominal input torque. Maintain housing temperature below permitted value

*6) The maximum intermittent input speed

*7) Torque at no load applied to the input shaft at nominal input speed

*8) The maximum radial load that the gearbox can accept

*9) The maximum axial load that the gearbox can accept

*10) The efficiency at the nominal output torque rating

*11) This does not include lost motion

*12) Contact Nidec Drive Technology for the testing conditions and environment

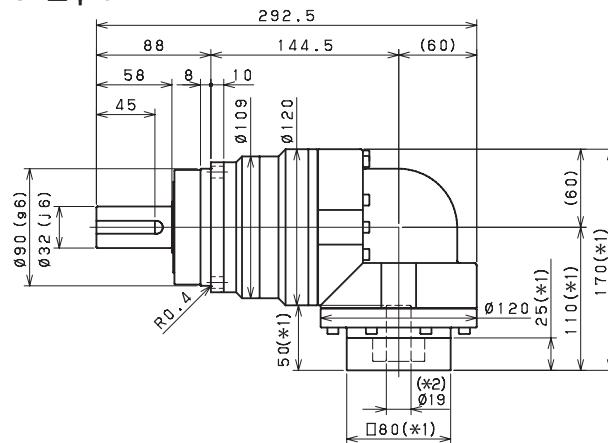

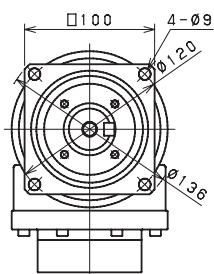

*13) Various wash-down options are available. Contact Nidec Drive Technology for more details

*14) Weight may vary slightly between models

EVT SERIES

The EVT combines the compactness and performance of the VRT series with a right angle bevel system to provide the ultimate space saving solution for highly dynamic applications. The ISO flange interface allows for easy mounting of index tables, pinions, timing belt pulleys and other mechanical components without the need for a coupling.

The EVT is advantageous in applications requiring high accuracy, torsional stiffness and moment loading. Oversized dual tapered roller bearings allow the EVT to handle larger radial and thrust forces found in applications within the machine tool, aerospace or robotics industries. Available ratios range from 3:1 to 100:1—a total of 20 ratio configurations, giving machine builders more design flexibility than ever before.

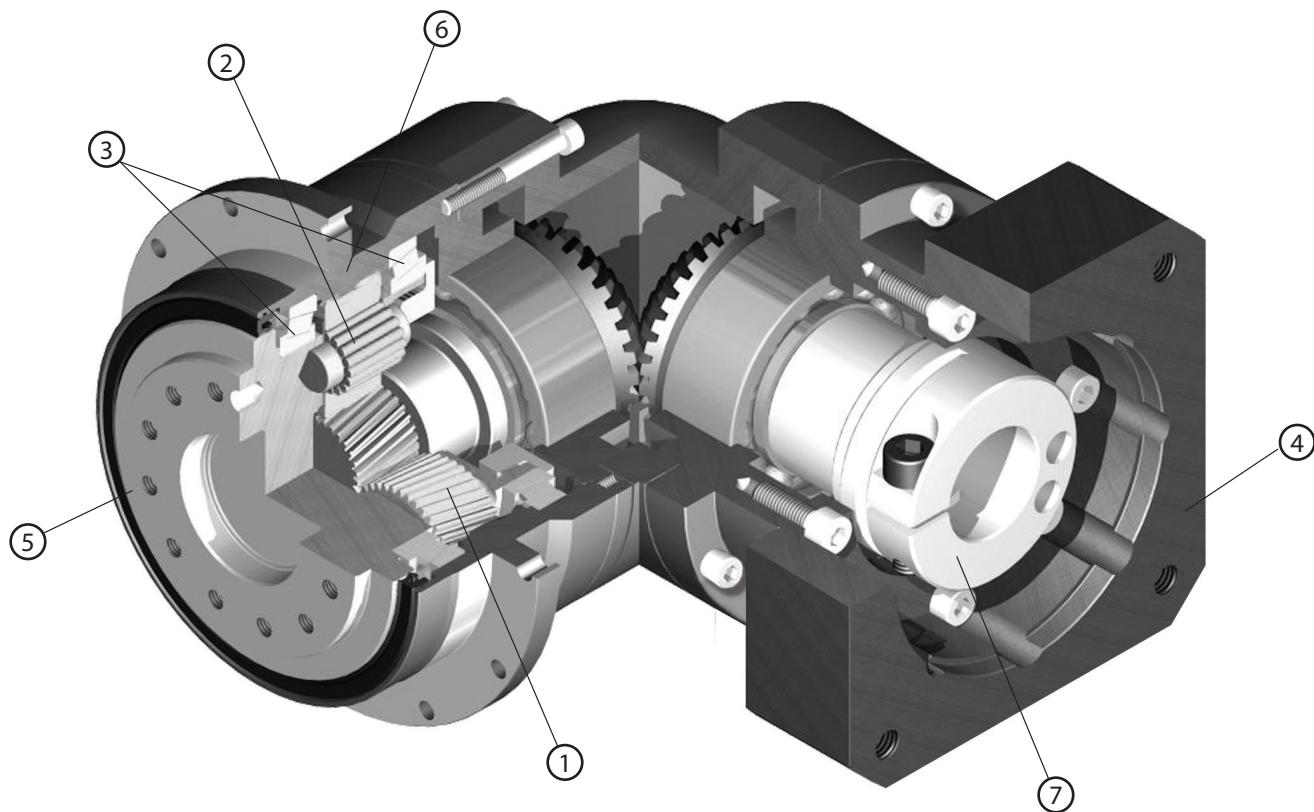

EVT

EVT SERIES

- The most compact and robust option for machine builders
- ISO robotics industry mounting interface allowing superior flexibility in mounting of pinions, pulleys and turntables
- Best-in-class backlash (≤ 4 arc-min)
- Space-saving design, when minimal envelope is required
- Exceptional torsional rigidity for high positional accuracy needs
- Broad range of mounting adapters offer a simple, precise attachment to any motor
- Maintenance free solution that is lubricated for life. High performance grease allows flexible mounting in any orientation

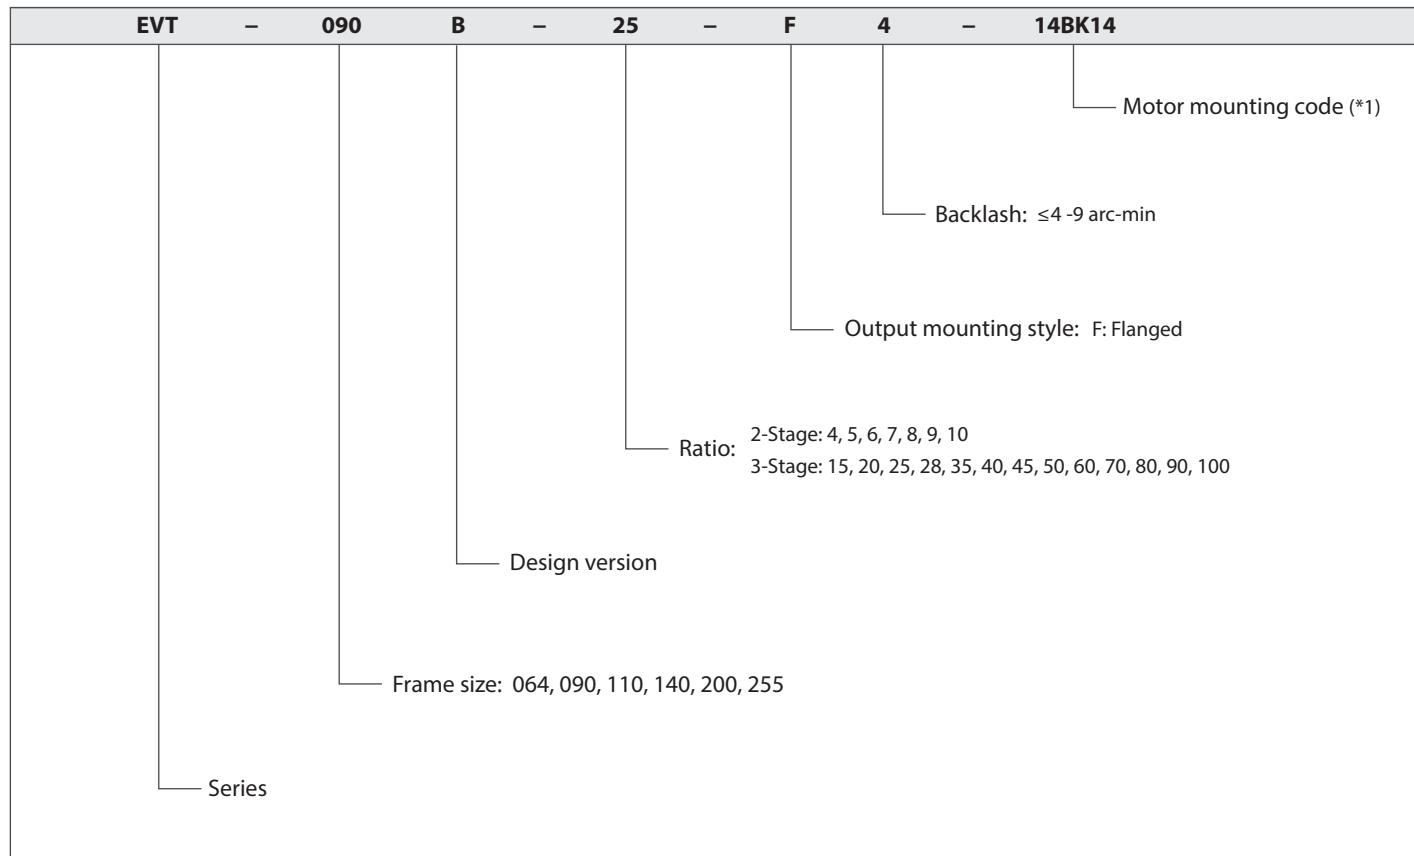

EVT SERIES Right-angle Planetary

EVT Series Features

- ① Carburized helical gears with proprietary secondary finishing process for higher accuracy and smooth, quiet operation
- ② Uncaged needle roller bearings allow for higher rigidity and torque
- ③ One piece output shaft and planet carrier with two robust tapered bearings straddling the planet gears. Higher radial/axial load capacity, stiffness, torque density and safety factor, with guaranteed alignment of gearing
- ④ Optimized mounting system with active centering on motor pilot diameter guarantees alignment of motor. Motor can be installed in any orientation
- ⑤ ISO output flange allows easy mounting to indexing tables, pinions, timing belt pulleys and other mechanical components
- ⑥ Ring gear machined directly into the housing, not welded or pressed in. Greater concentricity and elimination of speed fluctuation
- ⑦ True concentric motor shaft clamping connection, optimized for your specific motor. Reduced inertia for dynamic performance and balanced for high speed operation

EVT Series Model Code

*1) Motor mounting code varies depending on the motor. Use the selection tool link below to configure the code.

Contact us for additional information or refer to our online gearbox selection tool.
[Selection tool https://www.nidec-drivetechnology.co.jp/selection/all/](https://www.nidec-drivetechnology.co.jp/selection/all/)

The screenshot shows the Nidec Servo Reducer Selection Tool interface, which consists of three main windows:

- Step 1: Motor Selection**
 - Shows a search bar for "Motor Model" and a dropdown for "Reducer series".
 - Filters include: Application selection, Motor Manufacturer (Nidec), Reducer series (VRB), Motor Model (Select), Ratio (Select), and Output style (Shaft, Flange).
 - Results list: VRU-910B-B, VRU-990B-B, VRU-120B-B, VRU-150B-B, VRU-180B-B, VRU-210B-B.
- Step 2: Reducer Selection**
 - Shows a detailed view of the selected VRU-120B-B reducer.
 - Reducers available: VRU-120B-B, VRU-150B-B, VRU-180B-B, VRU-210B-B.
 - Notes: The motor is too small for the reducer.
- Step 3: Detailed Specification and Download**
 - Shows the detailed specification for the selected VRU-120B-B reducer.
 - Attachments: Motor specification, Motor specification (PDF), Dimensions (PDF), and Technical drawings (PDF).
 - Download options: PDF, CDR, IGES, STEP, DXF, DWG, and STL.

- *1) At nominal input speed, service life is 20,000 hours
- *2) The maximum torque when starting or stopping operation. Apply Cycle Factor f_0 , found on page 468, for higher duty cycle applications
- *3) Permitted 10,000 times during service life. Based on 10% of maximum radial load and smooth output shaft
- *4) The maximum torque allowed under a stress situation. Permitted 1,000 times during service life
- *5) The average input speed at nominal input torque. Maintain housing temperature below permitted value
- *6) The maximum intermittent input speed
- *7) Torque at no load applied to the input shaft at nominal input speed
- *8) The maximum radial load that the gearbox can accept
- *9) The maximum axial load that the gearbox can accept
- *10) The moment is the maximum load at output flange surface
- *11) The efficiency at the nominal output torque rating
- *12) This does not include lost motion
- *13) Contact Nidec Drive Technology for the testing conditions and environment
- *14) Various wash-down options are available. Contact Nidec Drive Technology for more details
- *15) Weight may vary slightly between models

EJM SERIES

An excellent choice for customers looking for a highly flexible, yet value-priced servo rated gearbox without sacrificing performance or durability. The EJM series comes in six different frame sizes to meet a wide range of application requirements and can support servo motors with up to 7.5kW capacity. Solid, hollow and double extended output shaft options allow for flexible machine design. The all-aluminum housing construction offers weight savings of up to 30% with improved thermal horsepower over cast iron.

The EJM series comes vent free and lubricated for life with synthetic oil, making it a reliable, maintenance-free solution. This product is ideally suited for applications within the packaging, material handling and general automation markets.

A heatmap illustrating the performance matrix across four categories: Optimal, Exceptional, Suitable, and Poor. The columns represent different performance metrics: Relative Cost, Load Capacity, Duty Cycle, and Positional Accuracy. The rows represent the categories. The color scale indicates performance levels, with white being the best and dark gray being the worst.

	Relative Cost	Load Capacity	Duty Cycle	Positional Accuracy
Optimal	White	Dark Gray	Dark Gray	Dark Gray
Exceptional	White	Dark Gray	Dark Gray	Dark Gray
Suitable	White	Dark Gray	Dark Gray	Dark Gray
Poor	Dark Gray	Dark Gray	Dark Gray	Dark Gray

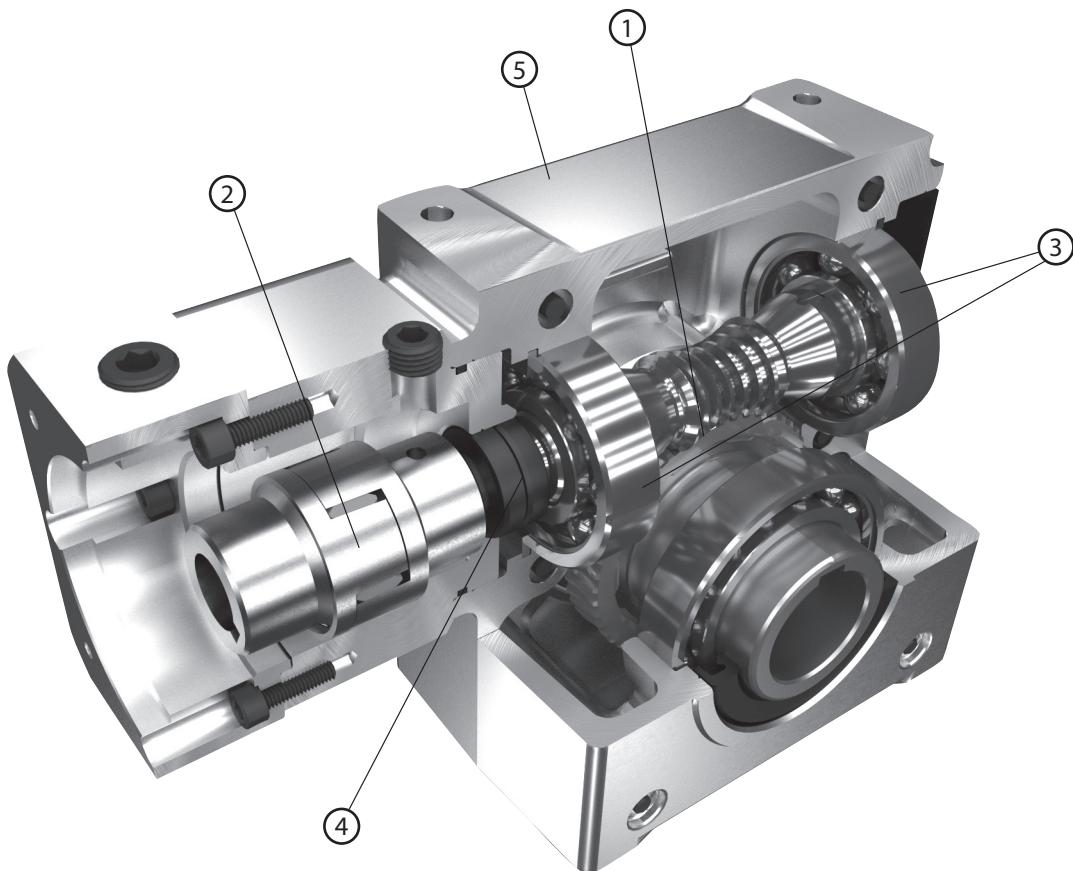

EJM

EJM SERIES

- Value engineered solution for less demanding servo applications
- Lightweight aluminum housing offers weight savings combined with improved thermal horsepower over cast iron
- Maintenance free solution; vent free and lubricated for life with synthetic oil
- Rated torque up to 614 Nm (up to 7.5 kw servo motor capacity)

EJM SERIES Right-angle Worm

EJM Series Features

- ① Globoidal gear set – between 3-8 teeth in contact at once, allowing 300% shock load capacity
- ② Integrated zero backlash coupling provides fast, error free alignment
- ③ Ball bearings help reduce friction and heat, as compared to tapered roller designs
- ④ Double oil seal and o-ring provide IP65 protection
- ⑤ Thermally efficient, lightweight aluminum housing

EJL SERIES

The EJL series is the perfect option for dynamic servo applications requiring high accuracy in a cost-effective package. The EJL series is available in 3 backlash levels, as low as 1 arc-min, to satisfy a variety of applications. Output options include single and dual shaft, hollow bore with keyway, hollow bore with shrink disc and robotic ISO flange. EJL is available in ratios as high as 90:1 in a single stage and maximum acceleration torque as high as 6250Nm.

Hardened and ground worms and bronze alloy wheels deliver high torque, smooth operation, and superior shock load absorption. Oversized taper roller bearings accommodate high radial forces. A unique 3 bearing arrangement maintains proper worm bearing preload over all allowable temperature ranges.

	Relative Cost	Load Capacity	Duty Cycle	Positional Accuracy
Optimal	High	Medium	Medium	Medium
Exceptional	Very High	Medium	Medium	Medium
Suitable	Medium	Medium	Medium	Medium

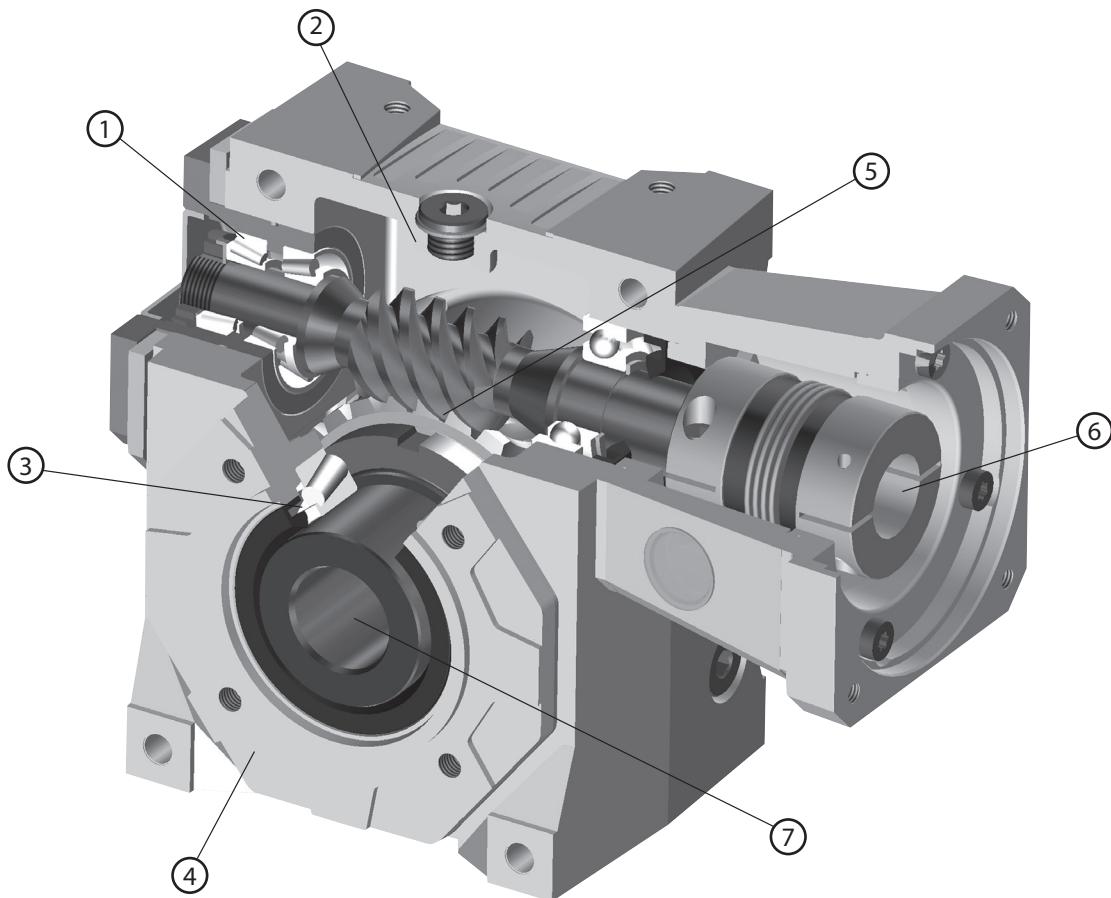

EJL

EJL SERIES

- Best price-performance ratio among all servo worm gearheads
- Three levels of backlash, as low as 1 arc-min to meet any application requirement
- Output options include single and dual shaft, hollow bore with keyway, hollow bore with shrink disc and robotic ISO flange
- 11 frame sizes with ratios up to 90:1 in a single stage

EJL SERIES Right-angle Worm

EJL Series Features

- ① Tapered bearing input with constant preload over all allowable temperature ranges. High stiffness and long life
- ② Maintenance-free, lubricated for life with high performance synthetic oil
- ③ Oversized tapered roller bearing at the output provides unmatched radial load and tilting moment capacity
- ④ Single piece housing made of cast and heat treated aluminum magnesium alloy offering superior rigidity and low weight (Sizes 125-200 utilize a cast iron housing)
- ⑤ Optimized gear contact pattern. 90% of teeth in contact resulting in excellent wear resistance and low backlash maintained throughout the life of the gearhead
- ⑥ Simple servomotor mounting. Adapter plates designed to mount to any motor and a high stiffness bellows coupling to eliminate shaft misalignment
- ⑦ Wide range of output options include single shaft, dual shaft, keyed hollow, shrink disc and robotic ISO flange

V1 ~ V6	Motor attachment dimensions are made to fit your servo motor.						

EJH SERIES

With its cast iron housing design, the EJH is a rugged, reliable performer for any dynamic servo application. This product is an ideal fit for machine builders transitioning from mechanical or hydraulic systems to all-electric servo drives. Unlike traditional worm gearboxes out on the market, the EJH utilizes a globoidal gear mesh, resulting in 300% shock load capacity and a quiet, smooth running drive.

With torque capability up to 7800 in. lb. and backlash as low as 6 arc-min, the EJH is well suited for metals, plastics or rubber processing machinery applications requiring a robust, compact solution. Nidec Drive Technology Corporation can customize this product to fit your needs by offering a variety of solid shaft, hollow shaft or shrink disc output mounting options.

	Relative Cost	Load Capacity	Duty Cycle	Positional Accuracy
Optimal	High	Medium	Low	Medium
Exceptional	Very Low	Medium	Very High	Medium
Suitable	Medium	High	Medium	High

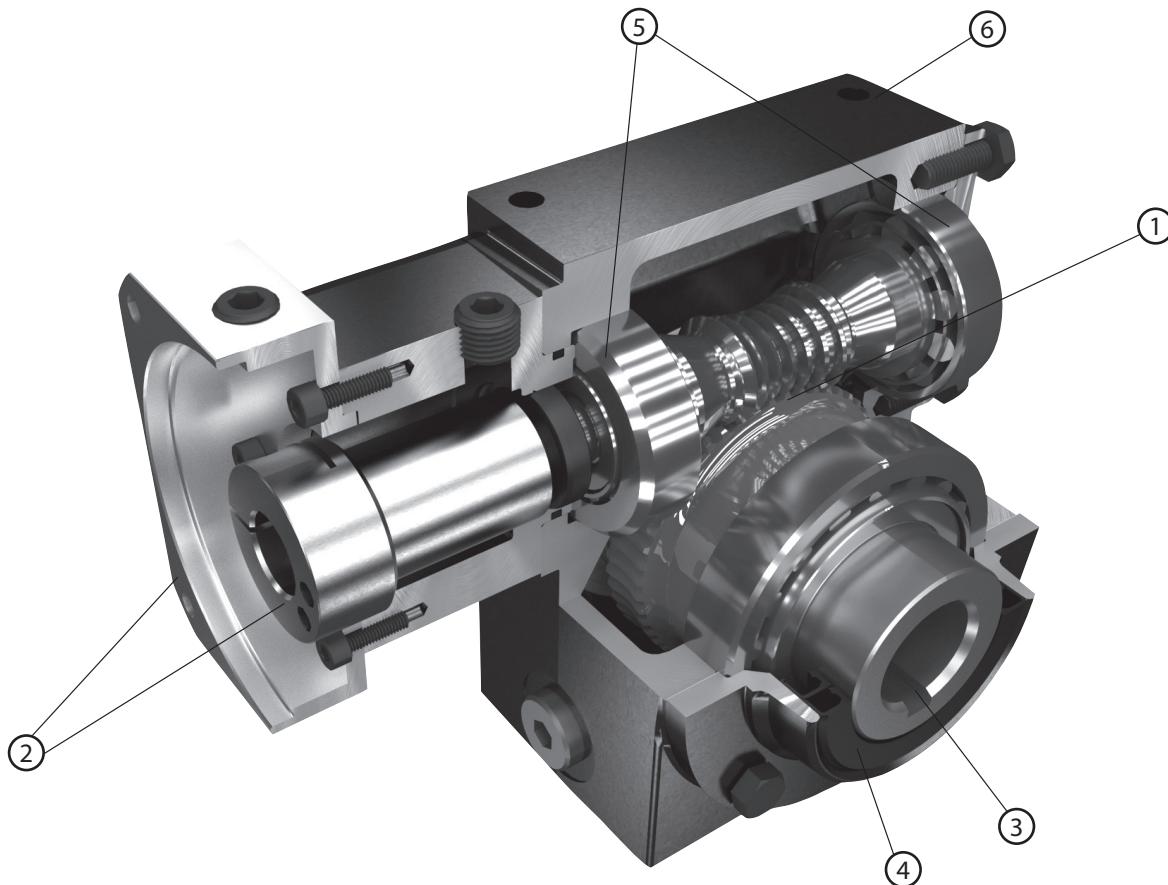

EJH

EJH SERIES

- Compact design – exact reduction ratios from 5:1 – 60:1 available in a single stage
- Mid-range performance with backlash as low as 6 arc-min
- Robust cast iron housing design for heavy industry applications
- Five frame sizes to choose from with nominal output torque up to 475Nm

EJH SERIES Right-angle Worm

EJH Series Features

- ① Globoidal gear set – between 3-8 teeth in contact at once, allowing 300% shock load capacity
- ② Adapter-bushing connection allows simple mounting to virtually any servomotor manufacturer
- ③ Wide range of output mounting styles available—hollow shaft, solid shaft, flange mount, shrink disc
- ④ Double oil seal and o-ring provide IP65 protection
- ⑤ Tapered roller bearings provide high radial and thrust load capability
- ⑥ Cast iron housing for improved durability in heavy industrial applications

EJP SERIES

The EJP series is ideal for demanding applications requiring high efficiency, torsional rigidity and zero backlash. It's lightweight, black anodized aluminum housing and dual input/output seals allow for excellent environmental protection with minimal maintenance. The EJP is part of our modular design platform, which means it can be mounted to any servomotor manufacturer with ease.

Our internal design captures both sides of the gear tooth to completely eliminate backlash and guarantee it for the life of the product. Exact reduction ratios allow for simplified servo tuning. Ratios 5:1 through 60:1 are available in a single stage, resulting in a more compact design. The face mounting option gives customers the ability to directly attach components such as tables, pinion gears and timing belt pulleys, eliminating the need for couplings.

	Relative Cost	Load Capacity	Duty Cycle	Positional Accuracy
Optimal	High	Medium	Low	Medium
Exceptional	Medium	High	Medium	High
Suitable	Low	Medium	High	Low

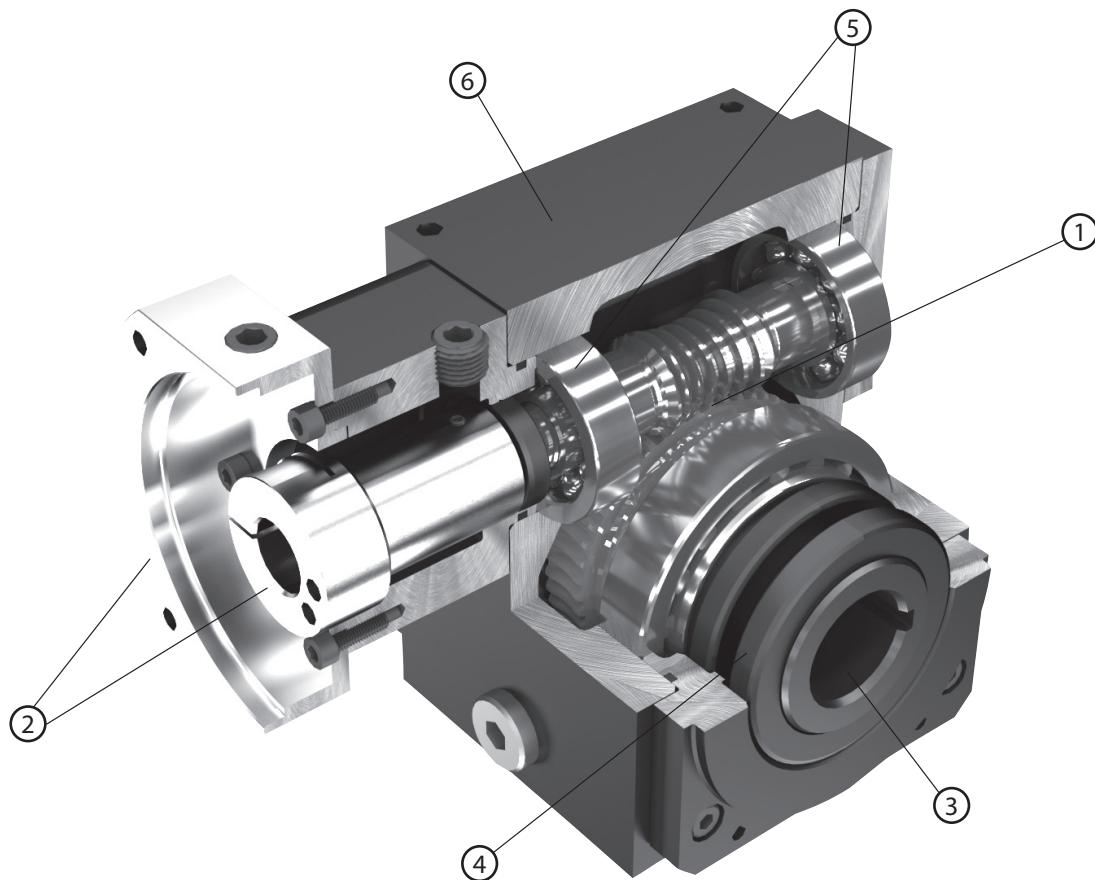

EJP SERIES

- Performance leader in its category
- High positional accuracy and torsional rigidity combined with low noise and exceptionally smooth operation. Zero backlash available
- Wide range of output mounting options
- Compact design – up to 60:1 available in a single stage configuration

EJP SERIES Right-angle Worm

EJP Series Features

- (1) Globoidal gear set – between 3-8 teeth in contact at once, allowing 300% shock load capacity
- (2) Adapter–bushing connection allows simple mounting to virtually any servomotor manufacturer
- (3) Wide range of output mounting styles available – hollow shaft, solid shaft, face mount, shrink disc
- (4) Double oil seal and o-ring provide IP65 protection
- (5) Ball bearings help reduce friction and heat
- (6) Anodized, thermally efficient aluminum housing

EJS SERIES

The EJS Series from Nidec Drive Technology Corporation offers features which cannot be found in today's market. Standard adapters are available for easy mounting to both, servo and AC induction motors. Dual bearings on the input shaft ensure proper alignment of the motor and gearbox. This design allows the gearbox to be mounted in any orientation.

Smooth, rounded surfaces help eliminate free-standing water and prevent bacteria growth. IP69K protection combined with 316 stainless steel allows this product to stand up to the harshest production environments. The EJS is the only servo grade right angle gearbox in the market that has been certified 3A, NSF and EHEDG. This product is well suited for applications in meat & poultry, fruits & vegetables, seafood processing, dairy and pharmaceuticals.

Optimal									
Exceptional									
Suitable									
	Relative Cost	Load Capacity	Duty Cycle	Positional Accuracy					

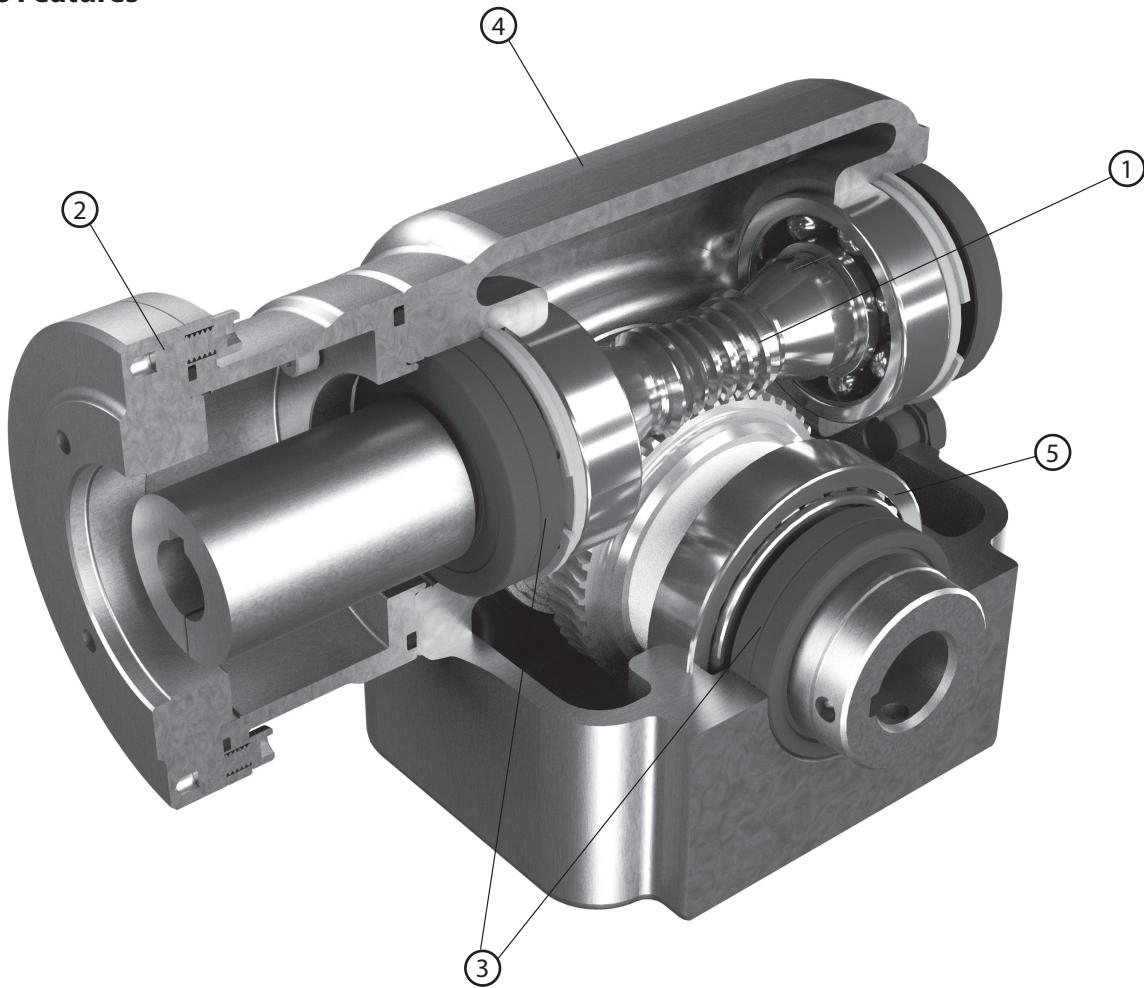

EJS SERIES

- ▶ IP69K ingress protection with smooth, rounded 316 stainless housing
- ▶ Certified by 3A, NSF and EHEDG
- ▶ Easy mounting to stainless steel servo or NEMA motors
- ▶ 5 frame sizes with output torque up to 721 Nm

EJS

EJS SERIES Right-angle Worm

EJS Series Features

- ① Globoidal gear set – between 3-8 teeth in contact at once, allowing 300% shock load capacity
- ② Motor adapters designed to fit face mounted stainless steel servo or induction motors
- ③ Double input and output seals; Nitrile or Viton options
- ④ Smooth, round stainless steel housing with electro-polished surface
- ⑤ Tapered roller bearings

*1) Torque at no load applied to the input shaft at 2,000 rpm

*2) The maximum radial load the gearbox can accept

*3) The maximum axial load the gearbox can accept

*4) The efficiency at the nominal output torque rating

*5) Measured with no load applied to the input shaft at 2,000 rpm

*6) Weight may vary slightly between models

V1 ~ V10		Motor attachment dimensions are made to fit your servo motor.				

STH SERIES

The STH is an excellent fit for mid-range index table applications that require high accuracy, flexible mounting and a large hollow shaft. This product sets the standard for rotary positioning performance of large inertia loads at an exceptional value. The STH comes with backlash as low as 2 arc-min and indexing accuracy down to +/- 60 arc-sec. With a large cross roller bearing, the STH can achieve a max tilting moment load capacity of 200Nm and a maximum radial load of 5000N—a perfect match for mid-size steel or aluminum tables as well as end of arm tooling.

The STH utilizes Nidec Drive Technology Corporation's modular design concept by integrating a VRL070 or EVL070 planetary gearbox at the input section. This allows the STH to achieve reduction ratios from 12:1 to 400:1. Motor mounting is easy with our vast selection of mounting plates. The 85mm hollow shaft provides clearance for wiring, tubing or ball screws to be passed through to effectors, filters or any other active machinery. Contact us if you need assistance upgrading from legacy mechanical camming devices or pneumatics.

	Relative Cost	Load Capacity	Duty Cycle	Positional Accuracy
Optimal	High	Medium	Medium	Medium
Exceptional	Medium	Low	Low	Medium
Suitable	Low	Medium	Medium	Medium

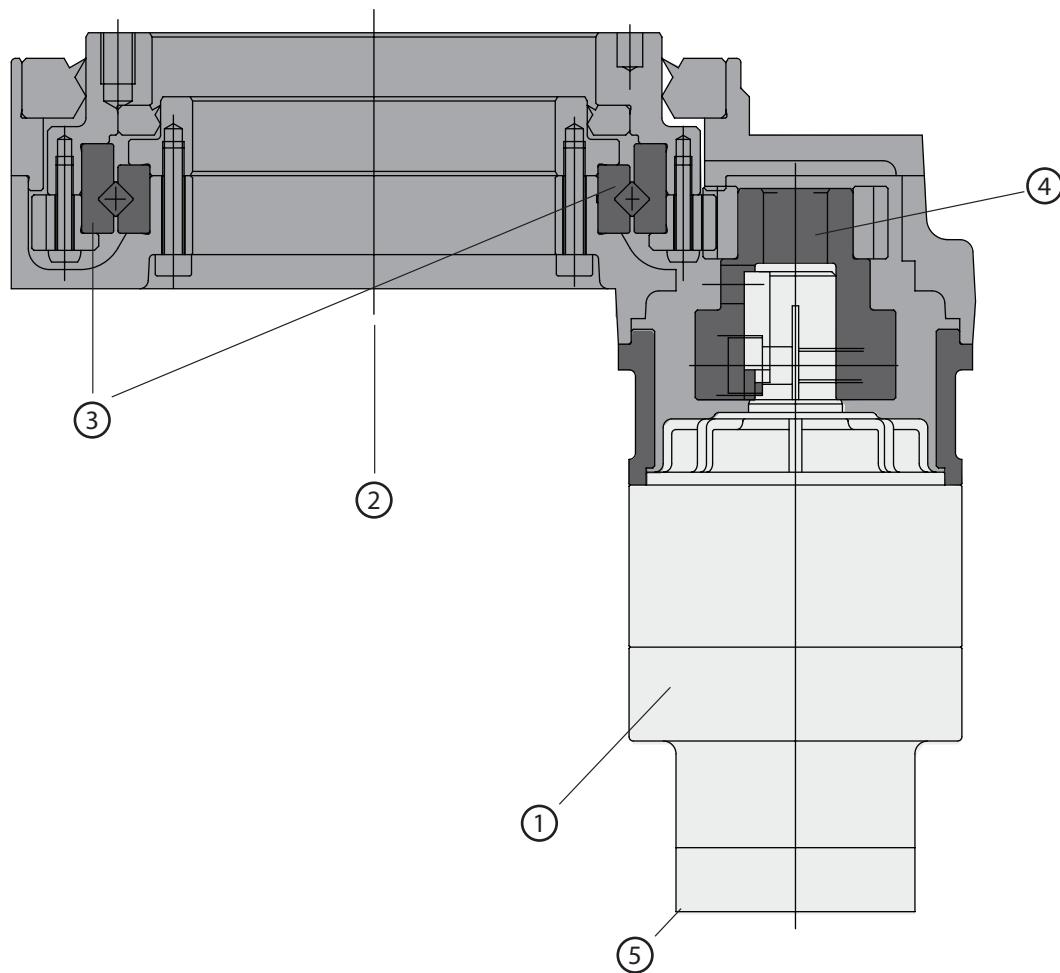

STH SERIES

- 85mm pass through hole allows pass through of air lines, wiring or other peripheral components
- ≤ 2 arc-min backlash with ± 60 arc-sec indexing accuracy
- Reduction ratios from 12:1 up to 400:1
- 5000N radial load capacity, ideal for mid-range index table applications
- Broad range of mounting adapters offer a simple, precise attachment to any motor
- Maintenance-free solution that is lubricated for life. High performance grease allows flexible mounting in any orientation
- Assembled in the USA with immediate delivery

STH SERIES Hollow Rotary Index Tables

STH Series Features

- ① VRL070 or EVL070 input section for ratios up to 400:1
- ② 85 mm hollow bore diameter
- ③ Heavy duty cross-roller bearing
- ④ 4:1 output gear
- ⑤ Optimized motor mounting system with active centering on motor pilot guarantees alignment of motor

STHEL7 4-Stage Dimensions

STR SERIES

With factory automation equipment using servo systems, overall machine performance can be greatly affected if critical elements are not considered during the design phase. Factors, such as backlash can cause premature wear, vibration, inefficiency, poor rigidity and control instability. Long settling times can affect productivity and positioning accuracy. The STR series is our ultra high precision solution that addresses these concerns and offers proven mechanical reliability.

This versatile solution features programmable output motions with low-wear rolling contact. Larger inertia load transmission is achieved with internal cam ratio reduction while maintaining powerful torque with less motor horsepower. The STR's unique no-back-lash preloaded mechanism improves the overall dynamics to force output motions to a new level of rigidity and accurate servo controller performance. The compact design reduces footprint while offering high speed rotation with large bending moment capacity.

	Relative Cost	Load Capacity	Duty Cycle	Positional Accuracy
Optimal	High	Medium	Low	Medium
Exceptional	Medium	High	Medium	High
Suitable	Low	Medium	Medium	Medium

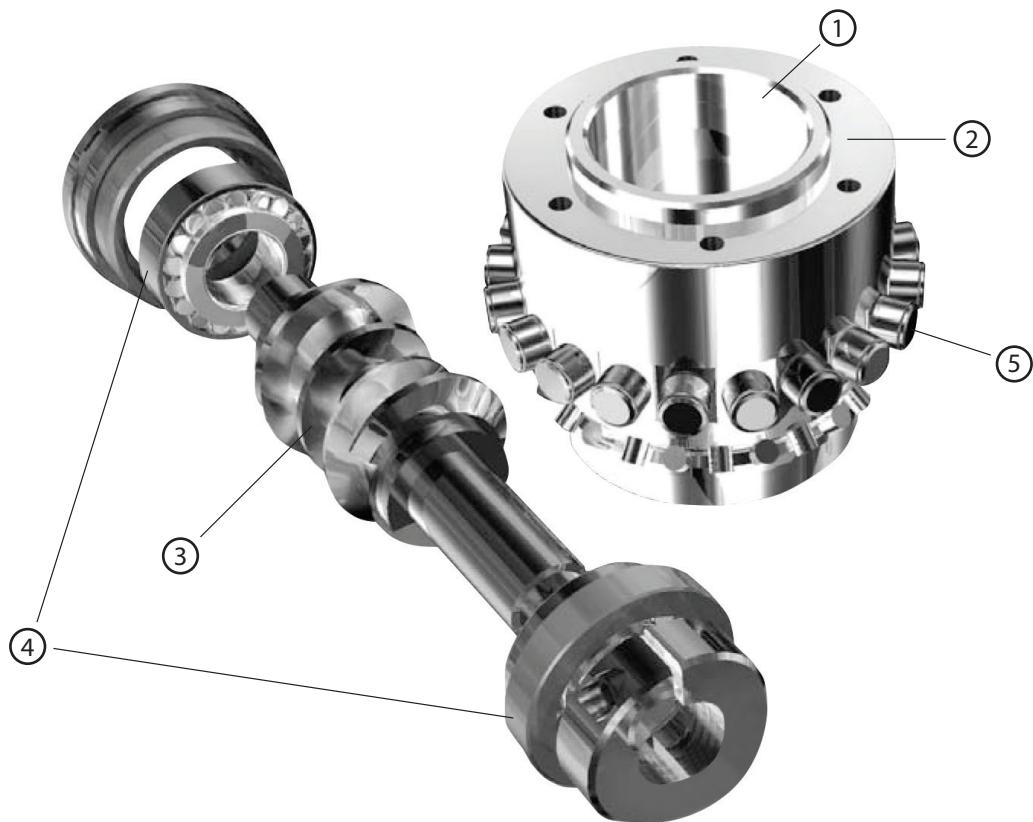

STR SERIES

- Zero Backlash – a unique preload mechanism to completely eliminate backlash and deliver motion that is true to input commands
- Highest level of positioning accuracy and runout accuracy, which is difficult to attain with other gearing technologies. Exceptional with direction reversing applications
- Output shaft is a solid piece cross roller bearing designed for durability against axial and radial loads
- Compatible with nearly any servomotor
- Reduction ratios up to 2000:1 are possible using a planetary primary stage
- Lightweight, compact aluminum alloy housing for minimal footprint
- Excellent fit for rotary pick and place applications, large dial tables and robotic joints
- Maintenance free solution using grease lubrication, can be mounted in any position

STR SERIES Hollow Rotary Index Tables

STR Series Features

- ① Oversized hollow output shaft
- ② Turret with integral cross-roller bearing
- ③ Globoidal cam
- ④ Tapered roller bearings
- ⑤ Needle roller cam followers

ERH SERIES

The ERH series is a compact, robust cycloidal reducer designed for servo applications. This product features high reduction ratios in a compact form factor. Its key advantage is exceptional shock load capacity, which eliminates the need to oversize the reducer for that requirement. The dual pin housing of the ERH cycloidal provides the ability to adjust one wheel against the other, allowing us to reduce the output shaft backlash to less than 6 arc-minutes. Rolling contact contributes to minimal friction and high efficiency. Torque transmission elements experience compression—they do not shear. The long output shaft bearing span provides solid overhung load capability.

The ERH is ideal for applications operating in heavier industrial environments, but requiring servomotor mounting and good accuracy. Its compactness offers advantages against helical gearing, which requires additional stages to achieve higher reduction ratios. Its high efficiency against worm gears allows our customers to downsize and still enjoy larger output power. The end result is longer service life and tremendous energy saving.

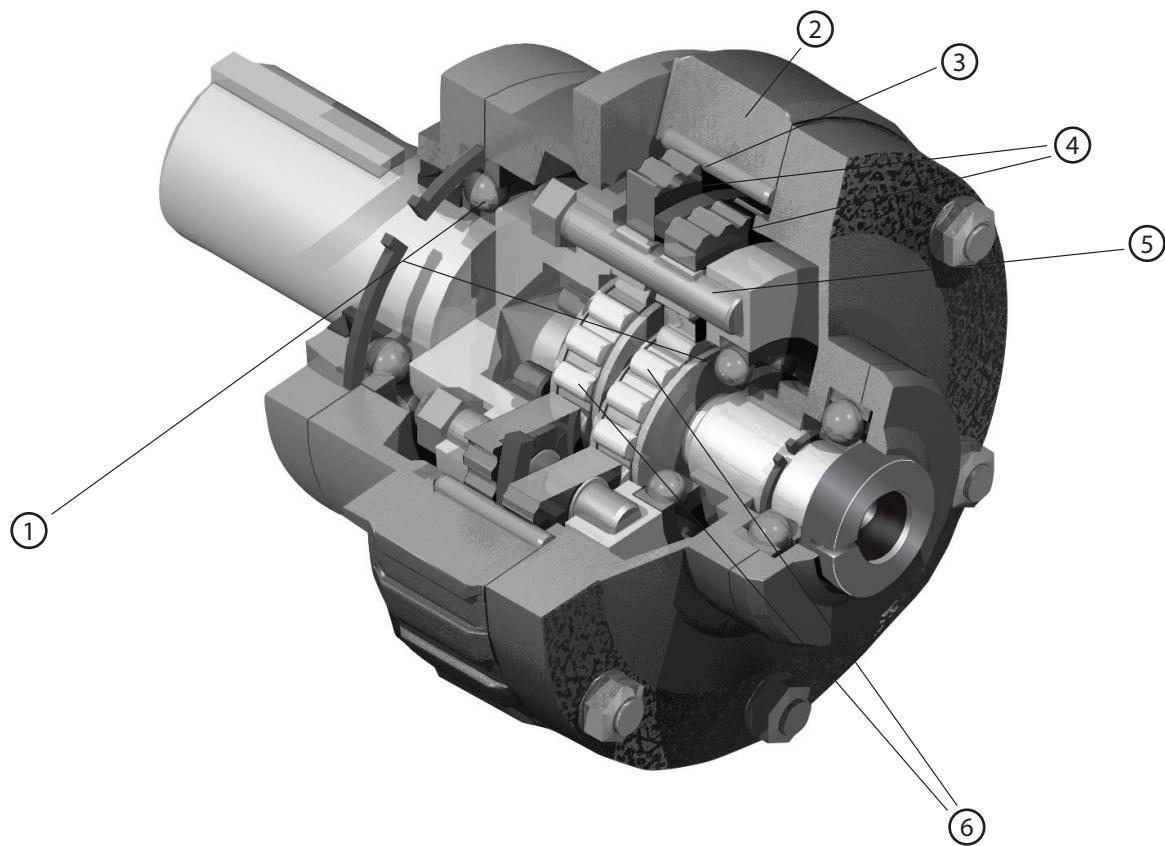

ERH SERIES

- ▶ High efficiency cycloidal reducer design
- ▶ Exceptional shock load capacity
- ▶ Various mounting options: Base, Flange, Ring, Hollow
- ▶ Reduction ratios up to 71:1 offered in a single stage
- ▶ Assembled in the USA

ERH SERIES Cycloidal Reducer

ERH Series Features

- ① Output shaft bearings
- ② Internal pin housing
- ③ Internal pins
- ④ Wheels
- ⑤ Carrier pins
- ⑥ Eccentric roller bearings

Options & Modifications

Build Your Ideal Gearbox

Nidec Drive Technology Corporation realizes that even with our vast range of products, you may not find exactly what you need for your application. We are highly capable of supplying custom solutions for OEMs, which include completely customized gearboxes or gear sets, modified standard designs and integrated product assemblies to meet unique application requirements.

We work closely with our OEM customers during early phases of development to create special designs that can overcome the harshest environments, tightest space constraints and most demanding positioning requirements. Whether your application requires weight relief, cost-down considerations, special coatings or materials of construction, Nidec Drive Technology can develop a product to meet your target.

- ① Housing Coatings and Surface Finishes: White Epoxy, Steel-It, Nickel Plating, Black Oxide
- ② Motor Mounting: Custom motor adapters, integrated assemblies
- ③ Ingress Protection: IP65 Protection available using special input seals, output seals and sealants
- ④ Output Shaft Materials of Construction & Modifications: 300 Series Stainless, 400 Series Stainless, 17-4PH Stainless, Nickel Plating, Special Width, Special Length
- ⑤ Lubrication: Food Grade, Low Temperature, High temperature, Vacuum-rated

Note: The following options and modifications may require minimum order quantities.

Contact Nidec Drive Technology for additional details.

Standard Planetary Washdown and Food Grade Options

Food, beverage, pharmaceutical and cosmetics equipment builders compete on their ability to deliver more innovative processing and packaging, with higher throughput and less downtime. Strict hygiene regulations require equipment to be cleaned often with water, steam and harsh chemicals that can quickly destroy ordinary machine components. These operating conditions pose challenges for gearbox manufacturers and Nidec Drive Technology is up to the task.

Nidec Drive Technology offers standard washdown and food grade options for our planetary products in a select group of configurations.

These options include stainless steel output shaft and fasteners, IP65 ingress protection, white epoxy, Steel-it paint or nickel plating and food grade lubrication. These options are outlined below. Our industry experts can help you determine the right protection for your application and environment.

Series	VRL			
Frame Size	050	070	090	120
1-Stage Ratios	3, 4, 5, 7, 10			
2-Stage Ratios	15, 16, 20, 25, 28, 30, 35, 40, 50, 70, 100			

* Nickel plating not available as standard option for VRL-050

Series	VRB			
Frame Size	042	060	090	115
1-Stage Ratios	3, 4, 5, 7, 10			
2-Stage Ratios	15, 16, 20, 25, 28, 30, 35, 40, 50, 70, 100			

* Nickel plating not available as standard option for VRB-042

Series	VRS		
Frame Size	060	075	100
1-Stage Ratios	3, 4, 5, 7, 10		
2-Stage Ratios	15, 16, 20, 25, 28, 30, 35, 40, 50, 70, 100		

* Nickel plating not available as standard option for VRS

Series	VRT		
Frame Size	064	090	110
1-Stage Ratios	4, 5, 7, 10		
2-Stage Ratios	16, 20, 25, 28, 35, 40, 50, 70, 100		

* Nickel plating not available as standard option for VRT

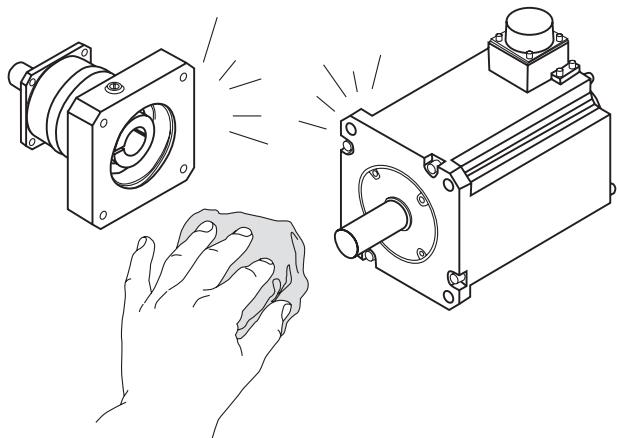

Model Code

VRB	—	090C	—	7	—	K	3	—	19HB16	—	XV
Series	Frame Size	Ratio	Output shaft style	Backlash	Adapter code	Washdown and Food Grade Options					
Order Code Description of Features											
C		IP 65 Protection Only									
W		Standard Grease, Food Grade White Epoxy									
S		Standard Grease, Steel-It™ Paint									
J		Standard Grease, Nickel Plated Output Housing									
F		Food Grade Grease, Standard Paint									
X		Food Grade Grease, Food Grade White Epoxy									
G		Food Grade Grease, Steel-It™ Paint									
K		Food Grade Grease, Nickel Plated Output Housing									
V		Stainless Steel Shaft & Fasteners, IP65 Protection									
* First letter represents grease and coating combination. Second letter represents shaft material & ingress protection. Select "C" for IP65 protection only.											

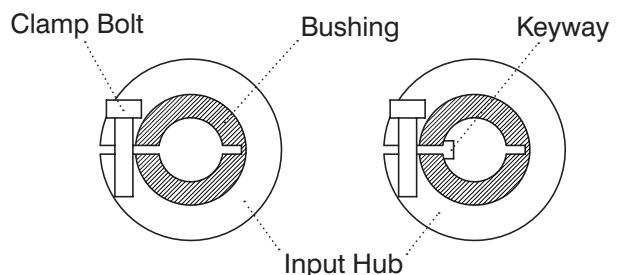

Installation Instructions and Safety Precautions

Inspection and Preparations

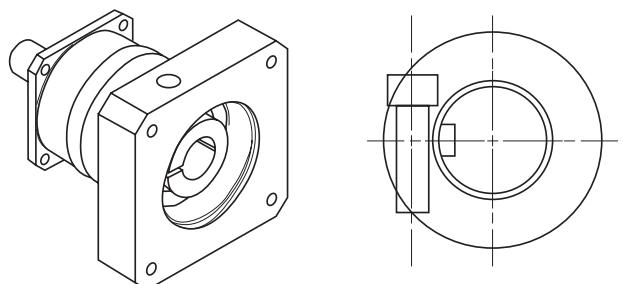

- A. Upon delivery of the gearbox, confirm that you received the exact model that was specified on your purchase order.
- B. Inspect for shipping damage. Notify the shipping agent immediately if any damage is discovered.
- C. Remove the protective covering from the output shaft.

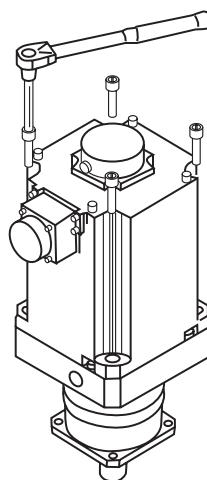

- D. Clean and de-grease the motor mounting surface and shaft, as well as the gearbox mounting surface, input hub bore, and shaft bushing (if included). This cleaning is very important for the shaft and bushing, to prevent slip during motion.

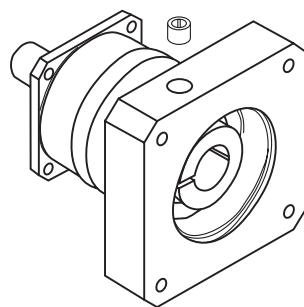

- B. Carefully align the shaft bushing (if included) so that the opening in the bushing aligns with the opening in the input hub. It is also recommended that the motor shaft keyway (if present) aligns with the opening in the input hub clamp.

- C. Rotate the gearbox input hub so that the clamp bolt is aligned with the access hole. Loosen the clamp bolt.
- D. Remove the motor key (if supplied), as it is not required for proper installation and operation.

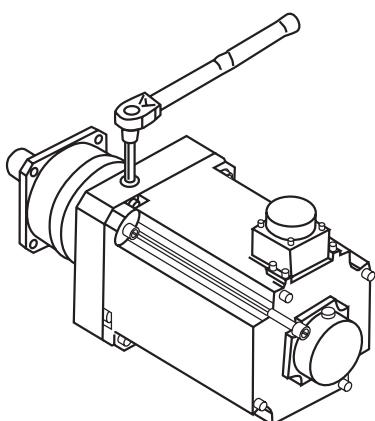

- E. Slowly slide the motor into the gearbox, so that the motor shaft enters the gearbox input hub with motor shaft keyway (if present) aligned with gearbox input shaft clamp opening. Install the four motor flange bolts in a cross-wise pattern, to ensure proper alignment of motor to gearbox. Tighten the bolts to the proper torque using a torque wrench (see Table A).

- A. Remove the access hole plug, allowing access to the motor shaft clamp.

Table A

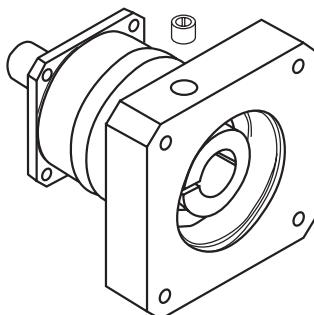

Motor Installation Bolt Size	Tightening Torque	
	(Nm)	(in lbs)
M3	1.1	9.7
M4	2.5	22.1
M5	5.1	45.1
M6	8.7	77
M8	21	186
M10	42	372
M12	72	637

- F. Tighten the gearbox input shaft clamp bolt to the proper torque using a torque wrench (see Table B).

Table B

Clamp Bolt Size	Tightening Torque	
	(Nm)	(in lbs)
M3	1.9	16.8
M4	4.3	38.1
M5	8.7	77
M6	15	133
M8	36	318
M10	71	628
M12	125	1106

- G. Re-install the access hole plug into the motor adapter plate. Assembly is complete.

Safety Precautions

- A. Avoid use in wet or corrosive areas, unless the gearbox is specified for these environments.
- B. Ambient temperature in the area of the gearbox must be in the range of 0° -40°C, unless the gearbox is built to withstand a different temperature range.
- C. The gearbox (with motor) must be firmly attached to a vibration-free frame or fixture.
- D. The gearbox has been lubricated and can be operated immediately.
- E. At initial operation, check the direction of shaft rotation, then apply the load gradually.
- F. Avoid excessive loads.
- G. Ensure that the motor speed does not exceed the maximum RPM specified for the gearbox.
- H. Watch for the following problems and discontinue motion immediately:
 - a. Sharp increase in temperature
 - b. Abnormal noise
 - c. Unstable output speed
- I. The gearbox is not designed to be disassembled.
- J. The gearbox is lubricated for its lifetime with appropriate grease. No re-lubrication is required.

IP 65 Versions

If you have received an IP65 version of the gearbox, be sure to seal between the gearbox and motor interface with a sealant to ensure an IP65 rating of the gearbox / motor assembly. Also apply sealant to the access hole plug during step "G". Please contact Nidec Drive Technology with any questions.

Motor Mounting Codes

Motor Mounting Codes

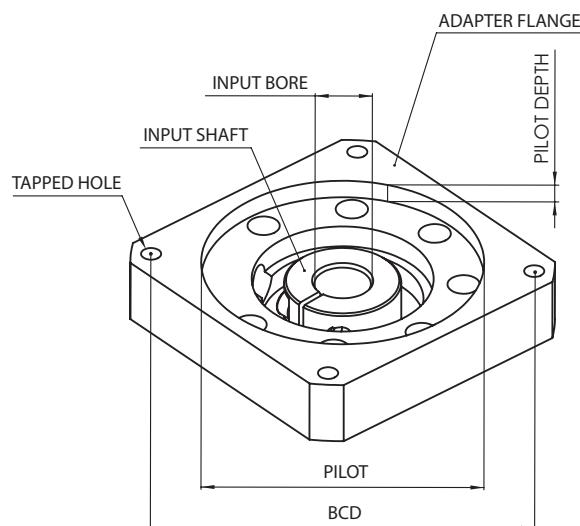

Our motor mounting codes can be configured automatically using our online selection tool. These tables supply the details behind these codes. The tables start with Input Bore measurement and the Part # Code, which are indicated at the end of every model code. For each Part # Code, the Pilot, BCD, Tapped Hole, and Pilot Depth, are explained.

Please note that even though the Part# Code may have the same letters (i.e. DC, FB, HA, etc), the Pilot and BCD dimensions may not be the same if a different input bore diameter. Locate the table by input bore diameter first, and then find the appropriate adapter Part# Code to check the dimensions. If you have any questions, contact Nidec Drive Technology for support.

Motor Mounting Codes

Motor Mounting Codes

Our motor mounting codes can be configured automatically using our online selection tool. These tables supply the details behind these codes. The tables start with Input Bore measurement and the Part # Code, which are indicated at the end of every model code. For each Part # Code, the Pilot, BCD, Tapped Hole, and Pilot Depth, are explained.

Please note that even though the Part# Code may have the same letters (i.e. DC, FB, HA, etc), the Pilot and BCD dimensions may not be the same if a different input bore diameter. Locate the table by input bore diameter first, and then find the appropriate adapter Part# Code to check the dimensions. If you have any questions, contact Nidec Drive Technology for support.

Input Bore (mm)	Part# Code	Pilot (mm)	BCD (mm)	Tapped Hole	Pilot Depth (mm)

Online Planetary Sizing and Selection Tool

Nidec Drive Technology Corporation's online Selection Tool makes it simple to configure our planetary product. The online Selection Tool has an extensive list of Servo Motor Specifications, Requirements and Application Specifications. See the Selection Tool example screens below to guide, support and help you with your application needs.

Selection Tool Screen Example 1

The screenshot shows the initial steps of the selection process:

- Make a selection from the motor list**: Shows a gear icon and a motor icon with an arrow.
- Selection flow**: Choose motor -> Choose series, ratio -> Choose frame size -> Complete.
- Make a selection from load condition**: Shows a belt conveyor icon and a motor icon with an arrow.
- Selection flow**: Series information -> Input load condition -> Choose frame size -> Choose motor -> Complete.
- Application selection**: Shows a gear icon and a motor icon with an arrow.
- Selection flow**: Choose Application -> Input condition -> Choose frame size -> Choose motor -> Complete.
- Search reducer model**: Shows a search bar with options VRS-060p, VRT-042p, EVS-060p, and a motor icon with an arrow.
- Selection flow**: Select reducer model -> Selection completed.

- Select a Nidec Drive Technology planetary gearbox series
- Select a Ratio that would put you near the rpm range for your application

Selection Tool Screen Example 5

Frame size Life [hrs] Judge Note

VRB-060-10	20000+	OK	
VRB-060-10	-	NA	
VRB-115-10	-	NA	
VRB-140-10	-	NA	
VRB-180-10	-	NA	
VRB-220-10	-	NA	

*Above life is a calculated one which does not guarantee the product life.
**OK means that the calculated life is more than 20,000 hours.

Notes Solutions

- Exceed maximum output torque. Reduce maximum torque.
- Exceed maximum input speed. Lower maximum input speed or choose smaller ratio.
- Exceed maximum radial load. Reduce maximum radial load.
- Exceed maximum axial load. Reduce maximum axial load.
- Exceed permitted moment. Reduce maximum loads (radial, axial), or shorten the distance.
- Some of the factors (maximum torque, load or speed) exceed the capacity. Ease up on conditions such as torque, speed, operating time, load, or distance.

- The proper Nidec Drive Technology reducer frame size has been selected based on your application's criteria

- Select the Motor Manufacturer for your application from the list
- Select the appropriate motor via the "Motor Model" drop down box"
- The manufacture Motor Model list includes new and former servo motors
- The sizing program does not select the servo motor drive

Selection Tool Screen Example 7

Reducer model VRB-060-10-K3-19FA19 (Shaft with key)

VRB-060-10-S3-19FA19 (Smooth shaft)

Reducer specification

Ratio	10
Backlash	3 arc-min
Nominal output torque	18 Nm
Maximum output torque	35 Nm
Allowable average input speed	3000 rpm
Maximum permissible input speed	6000 rpm
Permitted radial load (Applied to the output shaft center)	640 N
Permitted axial load (Applied to the output side bearing)	530 N

Attached motor

Manufacturer	Rockwell Automation/Allen Bradley
Model	MPF-A430P

Motor specification

Capacity	1.0 kW
Nominal torque	5.99 Nm
Maximum torque	19.8 Nm
Nominal speed	5000 rpm
Maximum speed	5000 rpm

*The actual appearance might be different.
Refer to the motor manufacturer's catalog for details.

Load condition

Average output torque	5 Nm
Maximum output torque	8 Nm
Average output speed	21 rpm
Maximum output speed	38 rpm
Average radial load	20 N
Maximum radial load	20 N
Average axial load	30 N
Maximum axial load	30 N

Customer Service and Support

Distinction in Service and Support

Nidec Drive Technology Corporation has invested heavily in building a global customer service and application support network that will meet the evolving needs of our customers. By leveraging our global infrastructure, our OEM customers maintain their competitiveness and profitability at home while able to expand into emerging markets abroad without any drop-off of service and support.

Nidec DTC pledges that we will continue to expand our service and support network footprint globally, and continuously strive for perfection as a dependable partner to our customers. In this section you will learn about our service and support capabilities that we will leverage in order to provide you peace of mind.

Online and Phone Support

Resolve your technical issues quickly and accurately, without disrupting your business. When you do business with Nidec Drive Technology, your company and your customers have immediate access to our global network of support centers and resources. Whether you need help designing, installing, and maintaining equipment or diagnosing an operating issue, Nidec DTC will deliver the tools and information that you need in order to insure that your equipment is running to perfection.

Contact your local sales office for immediate support either over the phone or in the field. A list of locations can be found in the back of this catalog. All customer accounts in North America have a dedicated Technical Support Engineer, knowledgeable about your business, on-standby ready to support you and your customers. If you do not know who to contact, please call our 1-800 number in order to get properly directed to the right person for help.

For online support, please visit our website in order to download any drawings, instruction manuals, or technical performance specifications that you require. All catalogs and brochures are easily downloadable on the website. If you prefer to inquire about an issue or for more information, please do not hesitate to submit your request online or email us at the address listed below.

Training Services

Investing our time in you, so together we build better, more competitive product for your customer. As the industrial world becomes increasingly competitive, new technologies are introduced every year requiring manufacturers to constantly rationalize and update existing designs. As a result, successful manufacturers realize the absolute need for product training.

Nidec DTC has a network of engineers that are factory trained and authorized to provide your workforce solid training on our products and basic power transmission concepts. The main objective of our standard program and materials is to better empower your workforce to size and select gearboxes for any motion control applications. We provide this service at no cost to our customers, because we see the value in building a more knowledgeable customer and helping them more quickly react to equipment design revisions when needed.

Other manufacturers are not as forthcoming with sharing information with their customers, an attempt to hide their higher manufacturing costs or to use unreleased performance data as a "product differentiator". Nidec DTC views their customers as long term partners and trains and shares information freely based on that vision.

Training classes can be conducted online, at any of our sales branches or offices, or at key distributor branches when requested. Nidec DTC can also bring the training session to your facility in order to make better use of your time and costs. A thorough hands-on training seminar can be provided at our North American headquarters in Glendale Heights, where customers can get the opportunity to completely assemble and test our products.

The Nidec DTC training program options provide support for any budget. Our training programs improve your employees' skill and knowledge competencies in the areas of power transmission and motion control while addressing any location, time, travel and productivity constraints. Contact your local sales office today in order to get a product refresher on your calendar.

The Nidec Drive Technology Corporation Warranty

1. **STANDARD WARRANTY.** With the exception of shaft seals, which is a normal wear item, Seller warrants that the products manufactured by the Seller to be free from defects in materials and workmanship under normal use and proper maintenance for:

VR, EV Planetary Products.....	5 years
ER Cycloidal Products.....	2 years
EJ Servo Worm Products.....	5 years
EJM Series.....	2 years
ST Rotary Index Tables.....	1 year

- a. If within such period any product shall be proved to the Seller's reasonable satisfaction to be defective, such product shall be repaired or replaced at our option. The Seller's obligation and Buyer's exclusive remedy will be limited to such repair or replacement and shall be conditioned upon the Seller receiving written notice of any alleged defect no later than thirty (30) days after its discovery within the warranty period.
- b. Shipping terms for any repaired or replaced product will be FOB shipping point unless negotiated otherwise. If necessary, Seller reserves the right to inspect the product claimed to be defective at Buyer's location or place of installation. Travel time and expenses for any Seller service personnel provided to Buyer's premises to affect such repair or replacement will be at the Buyer's expense. Seller reserves the right to satisfy our warranty obligation in full by reimbursing the Buyer for all payments made to Seller and Buyer shall thereupon return the product to Seller.
- c. These warranties shall not be effective if the product has been subject to overload, misuse, negligence, or accident, or if the product has been repaired or altered outside of Seller's factory or authorized control in any respect which, in our judgment, adversely affects its condition or operation. Buyer shall establish, to our satisfaction, that the product has at all times, been properly assembled, installed, serviced, maintained, tested, operated and used in accordance with the current maintenance and operating instructions of Seller and has not been altered or modified in any manner without our prior written consent.
- d. The Seller's warranty obligation shall not be effective for components or products hereunder where the product 1) is consumed by normal wear and tear, 2) is consumed by an application that was above the rated capacity, and 3) has a normal life that is fundamentally shorter in the length of time than the standard warranty as outlined, hereunder.
- e. No extended warranty will be offered on wear items unless otherwise agreed to in writing by Nidec Drive Technology management at the time of the sale.
- f. Descriptions or representations of the products provided by the Seller's employees, sales representatives, and distributors, regardless written or verbal, should not be construed as an expressed or implied warranty that would supersede any element of this standard warranty. Expressed or implied warranties are acceptable but only on a case-by-case basis as determined necessary by the Seller. A separate expressed or implied warranty must be provided in writing and confirmed by Nidec DTC management in order to be valid at the time of sale.
- g. THE STANDARD WARRANTY AS DESCRIBED HEREIN SHALL BE IN LIEU OF ALL OTHER WARRANTIES EXPRESSED OR IMPLIED RELATED TO THE SELLER'S PRODUCTS, INCLUDING ALL IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS, AND SHALL BE IN LIEU OF ANY OBLIGATIONS OR LIABILITY ON THE SELLER'S BEHALF.

Standard Terms and Conditions

STANDARD TERMS AND CONDITIONS

1. **SHIPPING AND PAYMENT TERMS.** Unless otherwise specified, shipping terms are FOB shipping point, and payment terms are net 30 days. All payments are to be made in United States funds.
2. **TAXES AND SECURITY INTEREST.** Unless otherwise specified, the prices stated do not include any taxes which may now or hereafter be applicable to the products or performance of any services by Seller. Buyer agrees to pay or reimburse Seller for any such required taxes and all connected penalties and interests, or in lieu thereof, Buyer shall provide Seller with tax exemption documents acceptable to the taxing authorities involved. Buyer, by acceptance of the goods ordered, represents and warrants that Buyer is solvent and able to pay for the goods in accordance with the terms of sale. As security for payment of the purchase price for the products and all other amounts due from the Buyer under these Terms, Buyer hereby grants Seller a security interest in the products and agrees to execute and permit Seller to file and record all documents which may be requested by Seller in order to create, perfect, evidence and establish the foregoing security interest. If Buyer fails to pay any amount when due, or, prior to payment of all amounts due, removes all or any part of the products from Buyer's premises, we shall exercise any or all of the rights and remedies given to secured parties under the UCC of the State of Illinois, and under similar laws of any other state, if applicable.
3. **RETURN GOODS.** No product will be accepted for return unless authorized with appropriate returned goods number assigned. In all cases, freight charges must be prepaid. Buyer will be responsible for any damages incurred in transit to goods being returned. Title shall pass to Seller upon Seller's acceptance of return goods.
4. **CANCELLATION.** Terms, once accepted and approved by Seller, shall not be canceled or altered by Buyer, and Buyer shall not otherwise cause the work or shipment to be delayed, except with the consent of and upon the terms and conditions approved by Seller in writing. Orders canceled or suspended with our consent are subject to cancellation and/ or other charges as determined by Seller.
5. **DELAY IN DELIVERIES.** In no event shall Seller be liable for nondelivery or delays in delivery of products, or in the performance of any other obligations, arising directly or indirectly from acts of God, acts (including delay or failure to act) of any governmental authority (de jure or de facto), war (declared or undeclared), riot, fires, floods, weather, labor disputes, sabotage, epidemics, factory shutdowns or alterations, embargoes, delays, shortages or inability to procure transportation, labor, manufacturing facilities or materials, failure to obtain timely instructions or information from Buyer, or inability due to causes of any other kind beyond our control. The foregoing provisions shall apply even though such cause may occur after performance of our obligations has been delayed for other causes.
6. **INDEMNIFICATION.** Buyer shall notify Seller promptly in writing and in all events within ten (10) days after its occurrence, of any accident or malfunction involving the products which results in injury to or death of any persons, property damage or economic loss of any kind, and Buyer shall cooperate fully with Seller in investigating and determining the cause of any such accident or malfunction. Buyer further agrees to indemnify and hold Seller harmless from and against all claims and damages imposed upon Seller or incurred arising, directly or indirectly, from Buyer's failure to perform or satisfy any of the Terms described herein.
7. **GENERAL PROVISIONS.** These Terms shall be governed, construed and enforced in accordance with the laws of the State of Illinois, and shall be binding upon and inure to the benefit of any successors, assigns, and legal Distributors of Seller and Buyer. The Terms are not assignable without Seller's prior written approval. A judicial or administrative declaration in any jurisdiction of the invalidity of any one or more of the provisions of the Terms in any jurisdiction, nor shall such declaration have any effect on the validity of interpretation of the Terms outside that jurisdiction.

8. **MINIMUM ORDER CHARGE.** The minimum charge on an order will be \$60.00.
9. **BOXING ORDER CHARGE.** No charge is made for standard boxing or crating required by transportation companies for domestic shipments. Cost of special boxing, export boxing, cartage to steamer or transfer expenses will be added to the invoice unless charges are shown to be included in the prices.

Any and all Terms are subject to change prior to Buyer's acceptance of these Terms.

PROPERTY AND PATENT RIGHTS

1. Seller retains for itself any and all property rights, including but not limited to all patent, copyright, and trade secret rights, to any software materials and to all designs, engineering details, documentation, and other data pertaining to any product designed in connection herewith and to all right of discovery, invention or patent rights arising out of the work done in connection herewith. Buyer expressly agrees that it will not assert any property rights herein, except the right for itself and subsequent owners to use the product.
2. Buyer acknowledges that any software materials constitute valuable trade secrets of Seller and are unpublished works on which Seller holds the sole and exclusive copyright. Buyer agrees to maintain and protect the confidentiality of these trade secrets and agrees not to disclose them or use them for any purpose not contemplated by this Agreement. Buyer agrees to formulate and adopt appropriate safeguards in light of its own operating activities, to insure protection of the confidentiality of these trade secrets. Buyer shall immediately notify Seller of any information which comes to its attention which indicates that there has been any loss of confidentiality of Seller trade secret information.

SUBMISSION AND ACCEPTANCE OF ORDERS

1. All orders and contracts are subject to acceptance or rejection by an officer of Seller or any individual authorized by Seller in writing, at the main offices of Seller, which approval or rejection shall in all cases be in writing to the Buyer, and no order or contract shall be binding until so accepted. Seller reserves the right to refuse any business originating in the Territory of the Buyer, for any reason which in the considered judgment of Seller is sufficient grounds for refusal.
2. On orders and contracts of a deferred-payment nature, all such payment and credit extensions are subject to final review and approval by Seller. Seller may accept such orders or contracts, withhold shipment after initial acceptance if for any reason the Buyer's credit has become impaired.

SHIPMENTS AND SHIPPING INFORMATION

1. All shipments, from whatever source, shall be contingent upon prior approval of the order or contract by Seller, and after such prior approval, upon the effect of strikes, accidents, embargoes, priorities, or any cause natural or otherwise, beyond the control of this Seller. Seller, in effect, assumes no liability hereunder for its failure to make shipment on any order or contract.
2. All Products are prepared by Seller for North American land shipment only under this Agreement. Any special preparations, for water shipment or foreign trade outside of the North Americas, must be arranged for as a special consideration.
